### Study Programs

General information regarding the credit system at the Albert Szent-Györgyi Medical School .....	20
Suggested study plans .....	22
Compulsory practices in summer .....	34
Extracurricular Scientific Activity .....	35
Recommended textbooks for medical students .....	49
Syllabuses	
Basic Module .....	58
Pre-clinical Module .....	88
Clinical Module.....	109
Vow to be made by 1 <sup>st</sup> year medical students .....	166
Oath to be taken by medical graduates .....	166

## BRIEF HISTORY OF THE UNIVERSITY OF SZEGED

Before the 12<sup>th</sup> century, intellectual and scholarly life concentrated in the monasteries. With the growing professionalisation of society in the 12<sup>th</sup> and 13<sup>th</sup> centuries, demand increased for educated professionals. The universities appeared in Europe from the 11<sup>th</sup>-12<sup>th</sup> century. Medieval universities were established for the study of arts, law, theology and medicine. Universities were not defined by location and space but by individuals banded together as a corporation. The end of the medieval period signalled the arrival of modern universities where teaching and research met.

In **1581**, following the establishment of universities in other regions of Central and Eastern Europe, *István Báthory*, the Prince of Transylvania, issued a founding document for a higher educational institute in Kolozsvár (Cluj-Napoca). The Jesuit Academy (*Societatis Jesu Academia Claudiopolitana*) was organized with two faculties, the Faculty of Philosophy and the Faculty of Theology. The academy was meant to have the rank of a university from the beginning; Prince Báthory endowed the institute with the right to confer baccalaureate and master's degrees on its students. At that time, the university held a unique place in the intellectual activity of Hungary; it was the only institute for higher education in Hungary.

The academy was soon closed due to religious and political turmoil, but the Jesuits re-established it and the institute gained more stability and prestige in the 17<sup>th</sup> century.

From **1753**, according to a decree passed by the Holy Roman Empress and Queen of Hungary and Bohemia, *Maria Theresia*, the institute functioned as a university, where teaching was carried out in German. She was one of the most significant proponents of enlightened absolutism; her educational reforms were highly lauded. **1774** saw not only the introduction of mandatory education but also the start of change for the University of Kolozsvár. After the Society of Jesus had been abolished, Maria Theresia entrusted the *Piarists* with the reorganization of the institute. As a result of the restructuring—in addition to the Faculties of Theology and Arts—two new faculties were established, the Faculty of Law (1774) and the Faculty of Medicine-Surgery (**1775**).

Later on, these faculties served as the basis for the *Hungarian Royal University of Kolozsvár*, which was founded by King *Francis Joseph I* and the Hungarian Parliament in **1872**. In **1881**, the university was renamed after the king and bore his name until 1940.

In 1919, the university had to leave its founding place and after a brief stay in Budapest, found new home in Szeged. From **1921** until 1940 the *Ferenc József Tudományegyetem* (Francis Joseph University) gained more and more prestige. When in **1940** the university was divided and part of it moved back to Kolozsvár, the remaining staff and students, the laboratories and the library were reorganized. The university took the name of *Miklós Horthy*, who was a former Governor of Hungary. The first rector of this institute was *Albert Szent-Györgyi*, who received the most prestigious award of sciences in 1937, the Nobel-price, for his research conducted at the university.

After World War II the institute assumed the name University of Szeged. In **1951** the Faculty of Medicine formed an independent institution under the name *Medical University of Szeged*. The pharmacy training was started as an independent faculty (separate from the medical faculty) in **1957**, and the Division of Dentistry as part of the Faculty of Medicine in **1962**. The English-Language Program for foreign students was established in **1985**. From **1999** there is also a German-Language Program at the Faculty of Medicine. In **1987** the University assumed the name of its former Biochemistry Professor, Dean of the Faculty of Medicine, Rector, and Nobel Prize Laureate, Albert Szent-Györgyi who was first to isolate vitamin C, extracted from paprika.

In **2000** the Albert Szent-Györgyi Medical University became again an integrated part of the University of Szeged. The Faculty of Medicine and the Faculty of Pharmacy functioned as the *Albert Szent-Györgyi Medical and Pharmaceutical Center* until July 2007. In the year 2004 the English-language dentistry program was launched and the Faculty of Dentistry was founded in January **2007**.

The faculties obtain their basis for education by running a high-level clinical and research work. The task of the faculties is represented by three different fields: education, research-work, prevention-treatment.

*The University of Szeged is one of the most distinguished universities in Hungary and is proud to be considered as the intellectual successor of the University of Kolozsvár founded in 1581.*

## MANAGEMENT OF THE UNIVERSITY OF SZEGED

Address: 6720 Szeged, Dugonics tér 13.  
Tel.: + 36 62 544-001

### **RECTOR**

Prof. Dr. LÁSZLÓ ROVÓ MD. PH.D. DSC.

### **CHANCELLOR**

Dr. JUDIT FENDLER MBA, MSc.

### **VICE RECTOR FOR STRATEGIC INITIATIVES**

Prof. Dr. MÁRTA SZÉLL M.D., PH.D., DSC.

### **VICE RECTOR FOR SCIENTIFIC AFFAIRS AND INNOVATION**

Prof. Dr. ZOLTÁN KÓNYA Ph.D., D.Sc.

### **VICE RECTOR FOR EDUCATION**

Prof. Dr. KLÁRA GELLÉN PH.D

### **VICE RECTOR FOR INTERNATIONAL AND PUBLIC RELATIONS**

Prof. Dr. PÉTER ZAKAR PH.D., D.Sc.

## MANAGEMENT OF THE ALBERT SZENT-GYÖRGYI SCHOOL OF MEDICINE

6720 Szeged, Tisza Lajos krt. 109.  
Tel.: + 36 62 545-016, Fax: + 36 62 545-478

### **DEAN**

PROF. GYÖRGY LÁZÁR M.D., Ph.D., D.Sc.

### **VICE DEAN FOR GENERAL AND POSTGRADUATE EDUCATIONAL AFFAIRS**

PROF. GÁBOR NÉMETH M.D., PH.D

### **VICE DEAN FOR EDUCATIONAL AFFAIRS**

PROF. DUX MÁRIA M.D. PH.D., D.SC.

### **VICE DEAN FOR SCIENTIFIC AFFAIRS**

PROF. TAMÁS MOLNÁR M.D. PH.D., D.SC.

### **VICE DEAN FOR ECONOMIC AFFAIRS**

DR. NORBERT BUZÁS PH.D.

### **HEAD OF THE DEAN'S OFFICE**

DR. NÓRA FŐZŐ LLD.

**DEAN'S REPRESENTATIVES:****ADMISSION AND RECRUITMENT AFFAIRS (FOREIGN LANGUAGE PROGRAMS):**

PROF. PETÁK FERENC PH.D. D.SC.

**EDUCATIONAL AFFAIRS OF THE GERMAN LANGUAGE MEDICAL PROGRAM:**

PROF. MÁRIA DUX M.D., PH.D.

**PRECLINICAL EDUCATIONAL AFFAIRS:**

DR. LÍVIA FÜLÖP PH.D.

**CLINICAL EDUCATION AFFAIRS:**

PROF. GYULAI ROLLAND M.D., PH.D., D.SC.

**SCIENTIFIC AFFAIRS:**

DR. JÓZSEF MALÉTH PH.D.

**FOREIGN STUDENTS' SECRETARIAT**

Address: 6720 Szeged, Szőkefalvi-Nagy Béla utca 6.

## ORGANIZATIONAL UNITS

### **Pre-Clinical Departments**

**Department of Anatomy, Histology and Embryology** (ANATÓMIAI, SZÖVET- ÉS FEJLŐDÉSTANI INTÉZET)  
(Szeged, Kossuth Lajos sugárút 38. Tel: + 36 62 545-665, Fax: + 36 62 545-707, E-mail: office.anatomy@med.u-szeged.hu)

Head of Department: Prof. habil. ANTAL NÓGRÁDI M.D., Ph.D., D.Sc.

### **Department of Behavioural Sciences**

(MAGATARTÁSTUDOMÁNYI INTÉZET)

(Szeged, 6722 Szentháromság utca 5. Tel.: + 36 62 545-968, E-mail: office.magtud@med.u-szeged.hu)

Head: Dr. habil. OGUZ KELEMEN M.D., Ph.D.

### **Section of Gerontology**

(GERONTOLÓGIAI OKTATÁSI RÉSZLEG)

Head: Dr. habil. SÁNDOR BENKŐ Ph.D.

### **Department of Biochemistry** (BIOKÉMIAI INTÉZET)

(Szeged, Dóm tér 9. Tel.: + 36 62 545-096, Fax: + 36 62 545-097, E-mail: office.biochem@med.u-szeged.hu)

Head of Department: Dr. habil. TAMÁS CSONT M.D., Ph.D.

### **Department for Medical Communication and Translation**

(ORVOSI SZAKNYELVI KOMMUNIKÁCIÓS ÉS FORDÍTÓKÉPZŐ CSOPORT)

(Szeged, Kossuth L. sgt. 35. Tel/Fax: +36 62 342-498, E-mail: office.szakford@med.u-szeged.hu)

Head of Department: Dr. habil. CSILLA KERESZTES Ph.D.

### **Department of Medical Biology** (ORVOSI BIOLÓGIAI INTÉZET)

(Szeged, Somogyi Béla u. 4. Tel.: + 36 62 545-109, Fax: + 36 62 545-131, E-mail: office.mdbio@med.u-szeged.hu)

Head of Department: Prof. ZSOLT BOLDOGKŐI, Ph.D., D.Sc.

### **Department of Medical Chemistry** (ORVOSI VEGYTANI INTÉZET)

(Szeged, Dóm tér 8. Tel.: + 36 62 545-136, Fax: + 36 62 545-971, E-mail: office.mdche@med.u-szeged.hu)

Head of Department: Prof. habil. TAMÁS MARTINEK D. Chem., Ph.D., D.Sc.

### **ELKH-SZTE Biomimetic Research Group**

(ELKH-SZTE Biomimetikus Rendszerek Kutatócsoport)

(Szeged, Dóm tér 8., Tel.: +36-62-545-136)

Head: Prof. habil. TAMÁS MARTINEK D. Chem., Ph.D., D.Sc.

### **Department of Medical Physics and Informatics** (ORVOSI FIZIKAI ÉS ORVOSI INFORMATIKAI INTÉZET)

(Szeged, Korányi fasor 9. Tel.: + 36 62 545-077, E-mail: office.dmi@med.u-szeged.hu)

Head of Department: Prof. habil. FERENC PETÁK Ph.D., D.Sc.

**Department of Medical Microbiology**

(ORVOSI MIKROBIOLÓGIAI INTÉZET)

(Szeged, Dóm tér 10. Tel.: + 36 62 545-115, Fax: + 36 62 545-113, E-mail: office.omi@med.u-szeged.hu)

Head of Department: Dr. KATALIN BURIÁN, MD., Ph.D.

**Department of Immunology**

(IMMUNOLÓGIA TANSZÉK)

(Szeged, Szőkefalvi-Nagy Béla utca 6. Tel.: + 36 62 342 826, E-mail: office.immun@med.u-szeged.hu)

Head of Department: KRISZTINA BUZÁS DR. KÖRMÖNDINÉ, Ph.D.

**Department of Pathophysiology** (KÓRÉLETTANI INTÉZET)

(Szeged, Szőkefalvi-Nagy Béla utca 6., Tel.: + 36 62 545-994, Fax: + 36 62 545-710, E-mail: office.patph@med.u-szeged.hu)

Head of Department: Prof. habil. ZOLTÁN RAKONCZAY, M.D., Ph.D., D.Sc.

**Department of Pharmacology and Pharmacotherapy**

(FARMAKOLÓGIAI ÉS FARMAKOTERÁPIAI INTÉZET)

(Szeged, Dóm tér 12. Tel.: + 36 62 545-682, Fax: + 36 62 545-680, E-mail: office.phcol@med.u-szeged.hu)

Head of Department: Prof. Dr. habil. ISTVÁN BACZKÓ M.D., Ph.D.

**ELKH-SZTE Research Group for Cardiovascular Pharmacology, Eötvös Loránd Research Network, Szeged, Hungary**

(ELKH -SZTE KERINGÉSFARMAKOLÓGIAI KUTATÓCSOPORT)

(Szeged, Dóm tér 12. Tel.: + 36 62 545-683, Fax: + 36 62 545-680)

Head: Prof. Dr. habil. ANDRÁS VARRÓ, M.D., Ph.D., D.Sc.

E-mail: varro.andras@med.u-szeged.hu

**Department of Physiology** (ÉLETTANI INTÉZET)

(Szeged, Dóm tér 10. Tel.: + 36 62 545-101, Fax: + 36 62 545-842, E-mail: office.phys@med.u-szeged.hu)

Head of Department: Prof. habil. ANTAL BERÉNYI, M.D., Ph.D.

**Department of Public Health** (NÉPEGÉSZSÉGTANI INTÉZET)

(Szeged, Dóm tér 10. Tel.: + 36 62 545-119, Fax: + 36 62 545-120, E-mail: office.puhe@med.u-szeged.hu)

Head of Department: Prof. EDIT PAULIK, M.D. Ph.D.

**Institute of Surgical Research** (SEBÉSZETI MŰTÉTTANI INTÉZET)

(Szeged, 6720 Szőkefalvi-Nagy Béla utca 6. Tel.: + 36 62 545-103, Fax: 545-743, E-mail: office.expsur@med.u-szeged.hu)

Head of Department: Dr. Andrea Szabó, M.D., Ph.D.

**Department of Cell Biology and Molecular Medicine** (SEJTBiológia és Molekuláris Medicina Tanszék)

(Szeged, Somogyi Béla u. 4. Tel./Fax: + 36 62 544-569, E-mail: office.molmed@med.u-szeged.hu)

Head: Dr. ESZTER FARKAS

**Department of Sports Medicine** (SPORTORVOSTANI TANSZÉK)

(H-6725 Szeged, Tisza Lajos krt. 107. 1st floor 147.office, Tel: +36-62-54-5032, E-mail: office.dsm@med.u-szeged.hu)

Head: Dr. LÁSZLÓ TÖRÖK

**Clinics, Clinical and Diagnostic Departments****Department of Anesthesiology and Intensive Therapy** (ANESZTEZIOLÓGIAI ÉS INTENZÍV TERÁPIÁS INTÉZET)

(Szeged, Semmelweis u. 6. Tel.: + 36 62 545-168, E-mail: office.aiti@med.u-szeged.hu)

Head of Department: Prof. BARNA BABIK, M.D., Ph.D., D.Sc.

**Department of Aviation and Space Medicine** (REPÜLŐ- ÉS ŰRORVOSI TANSZÉK)

(Kecskemét, Balaton u. 17. Tel.: + 36 76-581-600/3170, Fax: +36 76 581-622, E-mail: office.repurt@med.u-szeged.hu)

Head of Department: Prof. habil. SÁNDOR ANDRÁS SZABÓ, M.D., Ph.D.

**Department of Health Economics (EGÉSZSÉG-GAZDASÁGTANI INTÉZET)**

(Szeged, Kossuth Lajos sgt. 35. Tel.: +36- 70 439 9209, E-mail: office.healthecon@med.u-szeged.hu)

Head of Department: Dr. Habil. NORBERT BUZÁS

**Department of Laboratory Medicine**

(LABORATÓRIUMI MEDICINA INTÉZET)

(Szeged, Semmelweis u. 6. Tel.: + 36 62 545-751, Fax: +36 62 544-559, Email: office.clab@med.u-szeged.hu)

Head of Department: Dr. habil. IMRE FÖLDESI, Pharm.D., Ph.D.

**Department of Clinical Microbiology**

(KLINIKAI MIKROBIOLÓGIAI DIAGNOSZTIKAI INTÉZET)

Szeged, Semmelweis u. 6. Tel.: +36 62 545-398, Tel./Fax: +36 62 545-712, Email: office.mlab@med.u-szeged.hu)

Head of Institute: Dr. KATALIN BURIÁN, MD., Ph.D.

**Department of Dermatology and Allergology (BŐRGYÓGYÁSZATI ÉS ALLERGOLÓGIAI KLINIKA)**

(Szeged, Korányi fasor 6. Tel.: + 36 62 545-277, Fax: +36 62 545-954, E-mail: office.derma@med.u-szeged.hu; edu.derma@med.u-szeged.hu)

Head of Department: Prof. ROLLAND GYULAI, M.D., Ph.D., D.Sc.

**Dermatology Research Group**

(HUN-REN - SZTE DERMATOLÓGIAI KUTATÓCSOPORT)

(Szeged, Korányi fasor 6. Tel.: + 36 62 546-465)

Hungarian Academy of Sciences - University of Szeged

Head: Prof. habil. LAJOS KEMÉNY, M.D., Ph.D., D.Sc.

**Department of Emergency Medicine (SÜRGŐSSÉGI BETEGELLÁTÓ ÖNÁLLÓ OSZTÁLY)**

(Szeged, Semmelweis u. 6. Tel.: +36 62 545-934, E-mail: office.sbo@med.u-szeged.hu)

Head of the Department: Dr. ZOLTÁN PETŐ M.D.

**Department of Family Medicine (CSALÁDORVOSI INTÉZET ÉS RENDELŐ)**

(Szeged, Tisza Lajos krt 109. Tel: +36-62-545-553, Fax: +36-62-342-331, E-mail: office.model@med.u-szeged.hu)

Head of Department: Dr. Gergely Ágoston M.D. Ph.D.

**Department of Forensic and Legal Medicine (IGAZSÁGÜGYI ORVOSTANI INTÉZET)**

(Szeged, Kossuth Lajos sugárút 38. Tel:+36-62-545-159, Fax: +36-62-545-893, E-mail: office.ioi@med.u-szeged.hu)

Acting Head of Department: Dr. ROLAND WEICZNER, M.D., Ph.D.

**Departments of Internal Medicine****Department of Internal Medicine (Western Division)**

(Szeged, Kálvária sgt. 57., Secretary: Tel.: + 36 62 545-189, Fax: + 36 62 545-185, E-mail: office.in1st@med.u-szeged.hu)

Head of Department: Prof. habil. CSABA LENGYEL, M.D., Ph.D.,

**Division of Geriatry and Chronic Diseases (GERIÁTRIAI ÉS KRÓNIKUS BELGYÓGYÁSZATI OSZTÁLY)**

(Szeged Kálvária sgt. 57., "A" building Tel.: +36 62 553-853)

Head of Division: MÁRIA FERENCSEK, M.D.

**Division of Infectology (INFEKTOLÓGIAI OSZTÁLY)**

(Szeged, Állomás utca 3. Tel.: +36 62 342606)

Head of Division: ANNAMÁRIA LETOHA M.D.

**Dialysis Center**

(FMC MAGYARORSZÁGI EGÉSZSÉGÜGYI KFT.  
DIALÍZIS CENTRUM)

(Szeged, Szőkefalvi-Nagy Béla utca, Tel.: +36 62 545-585)

Head of Center: ZOLTÁN ONDRIK, M.D.

**Division of Endocrinology and Diabetology**

(ENDOKRINOLÓGIA ÉS DIABETOLÓGIA OSZTÁLY)

(Szeged, Kálvária sgt. 57., "H" Building Tel./Fax: + 36 62 545-211)

Head of Division: Prof. habil. TAMÁS VÁRKONYI, M.D., Ph.D.

**Division of Nephrology**

(NEFROLÓGIAI OSZTÁLY)

(Szeged, Kálvária sgt. 57., "H" building Tel./Fax: + 36 62 545-211)

Head of Division: Prof. habil. GYÖRGY ÁBRAHÁM, M.D., Ph.D.

**Division of Gastroenterology**

(GASZTROENTEROLÓGIA OSZTÁLY)

(Szeged, Kálvária sgt. 57., "E" Building Tel./Fax: 36 62 545-211)

Head of Division: Prof. habil. TAMÁS MOLNÁR, M.D., Ph.D., D.Sc

**Department of Internal Medicine (Southern Division)****Second Department of Internal Medicine and Cardiological Center**

(II. SZ. BELGYÓGYÁSZATI KLINIKA ÉS KARDIOLÓGIAI KÖZPONT)

(Szeged, Semmelweis u. 8. Tel.: + 36 62 545-220, Fax: + 36 62 544-568)

Head of Department: Dr. SZILI TÖRÖK TAMÁS M.D., Ph.D., D.Sc.

**Section of Invasive Cardiology (INVAZÍV KARDIOLÓGIAI RÉSZLEG)**

(Szeged, Semmelweis u. 8. Building B. Tel: +36 62 544-915, 544-962, 545-473,

Fax: +36 62 544- 915)

Head of Section: RUZSA ZOLTÁN, M.D. Ph.D.

**Divison of Cardiac Surgery (SZÍVSEBÉSZETI OSZTÁLY)**

(Szeged, Semmelweis u. 8. Fel: +36 62 545-183, Fax: +36 62 544-563)

Head of Division: BARI GÁBOR, M.D. Ph. D.

**Department of Oral and Maxillofacial Surgery (ARC-, ÁLLCSONT- ÉS SZÁJSEBÉSZETI KLINIKA)**

(6725 Szeged, Kálvária sgt. 57. Tel.: + 36 62 341170, E-mail: office.maxillo@med.u-szeged.hu)

Head of Department: Prof. habil. JÓZSEF PIFFKÓ D.M.D., M.D., Ph.D.

**Department of Medical Genetics (ORVOSI GENETIKAI INTÉZET)**

(Szeged, Somogyi Béla u. 4. Tel.: + 36 62 545-134, Fax: + 36 62 545-699, E-mail: office.ogen@med.u-szeged.hu)

Head of Department: Dr. habil. MÁRTA SZÉLL, M.D., Ph.D.

**Department of Rehabilitation Medicine (REHABILITÁCIÓS MEDICÍNA TANSZÉK)**

(Szeged, Tisza Lajos krt. 97. Tel: +36-30- 293 4319, E-mail: office.rehabmedicina@med.u-szeged.hu)

Head of the Department: Dr. GÁBOR FAZEKAS

**Department of Preventive Medicine (PREVENTÍV MEDICÍNA TANSZÉK)**

(Szeged, Korányi fasor 8-10. Tel: +36-62-342-171, E-mail: office.rehab@med.u-szeged.hu)

Head of Department: Prof. habil. GYÖRGY LÁZÁR, M.D., Ph.D., D.Sc.

### **Transfusiology Section (TRANSZFÚZIOLÓGIAI TANSZÉK)**

(Szeged, Semmelweis u. 8. Tel.: +36 62 544-963, E-mail: office.trans@med.u-szeged.hu)

Head of Department: Dr. IMELDA MARTON, M.D. Ph.D.

### **Department of Urology (UROLOGIAI KLINIKA)**

(Szeged, Kálvária sugárút 57. Tel./Fax: + 36 62 341-140, + 36 62 341-152, E-mail: office.urologia@med.u-szeged.hu)

Head of Department: Prof. habil. ZOLTÁN BAJORY, M.D., Ph.D., D.Sc.

## **LIST OF EDUCATIONAL ADVISORS AND RESEARCH CONSULTANTS**

Research at the bench or on a clinical basis provides a very important perspective for future physicians. It gives the students a chance to pursue common goals with faculty mentors and may give a glimpse into potential careers. Students are strongly encouraged to consider research opportunities. See your scientific research consultant at each department.

## ACADEMIC CALENDAR 2025/2026

### ACADEMIC PERIODS

	<b>1st (Fall) semester:</b>	<b>2nd (Spring) semester:</b>
<b>Education period:</b>	from September 8 to December 13, 2025	from February 9 to May 16, 2026
<b>Examination period:</b>	from December 15, 2025 to January 31, 2026	from May 18 to July 4, 2026
<b>Repeat examination period:</b>	from February 2 to February 7, 2026	from June 29 to July 4, 2026
<b>Breaks:</b>	Winter break: from December 24, 2025 to January 03, 2026 (The university is closed. There are no examinations.)	Spring break: from April 2 to April 7, 2026
<b>Holidays:</b>	October 23, November 1, 2025	May 1, May 25, 2026

For other important dates and deadlines, please check the relevant Info Sheet posted on the website of the Foreign Students' Secretariat.

## TUITION FEES

Students are required to pay their tuition fee according to the academic year in which they have started their first year studies at the University of Szeged. More: [www.med.u-szeged.hu/fs/tuition-fee](http://www.med.u-szeged.hu/fs/tuition-fee)

In case the students' academic progress does not follow the suggested study plan, tuition fee is calculated according to the following:

Fee of attending <u>three or more</u> compulsory subjects	100% of one semester's tuition fee*
Fee of attending <u>one or two</u> compulsory subjects	max. 50% reduction of one semester's tuition fee can be requested*
Fee of attending solely compulsory elective / elective / criteria subject	max. 50% reduction of one semester's tuition fee can be requested
Fee of taking subject(s) that do not involve class attendance	max. 50% reduction of one semester's tuition fee can be requested

\*Examination course fee / compulsory elective / elective / criteria subjects are included!

Vays of paying your tuition fees:

Online on Neptune by going on "Finances" > "To be paid", or via money transfer

Make sure that the exact amount of your tuition fee is credited to the University's account. When transferring your tuition fee, please keep in mind that the bank commission charges have to be paid by the student. In the Remarks/Comments field please indicate your legal name, name of the program and your year.

**Payment can be made by transfer to the following bank account:**

#### USD ACCOUNT

**University of Szeged**  
**IBAN: HU94-10004012-10008016-00220332**  
**Bank name: Hungarian State Treasury**  
**(correspondent: Hungarian National Bank,**  
**SWIFT code: MANEHUHB)**  
**Bank address: H-1054 Budapest, Hold u. 4.**  
**Swift code: HUSTHUHB**

#### EUR ACCOUNT

**Bank address: H-1054 Budapest, Hold u. 4.**  
**Swift code: HUSTHUHB**

Fees are subject to change. For updates please check the relevant Info Sheet.

## GENERAL GUIDELINES

**1.) Registration:** Students have to **register for each semester** in order to have an active student status. Students who are not registered properly are not entitled to attend the classes.

#### **Registration requirements:**

- **Tuition fee** has to be credited to the University's bank account in full before registration.
- Valid **residence permit**. Please check on the NEPTUN (under My Data/ Personal Information / Records) whether you have submitted a copy of your valid residence permit. If it was renewed recently, please present the original and a copy to the Secretariat.
- Valid **health insurance** (If it was renewed recently please present the original and a copy at the Secretariat.)
- **Summer practice** evaluation sheet (if required)
- Settled outstanding balance for **youth hostel fees** and **medical treatment costs**
- Valid **medical fitness certificate** (completed medical check-up by the occupational health doctor)

**2.) Payment of the tuition fee:** The deadline of payment is always specified in the information sheets published to the students before the beginning of the upcoming semester. Proof of payment has to be submitted to the Secretariat. Students have to make sure that the exact amount of the tuition fee is credited to the University's account until the deadline. Late payment is not possible.

**3.) Neptun course registration:** Students have to sign up for their courses in the NEPTUN (computer-based academic system) each semester. Students failing to meet this requirement are not entitled to attend the classes. The number of course registrations in a subject is limited: one course can be registered 3 times during the period of studies. Make sure you sign up for all your courses (both the lectures and practices, examination courses, physical education -2 semesters required).

#### **4.) Residence permit**

<https://www.med.u-szeged.hu/fs/current-students/student-life-in-szeged> download info from 'Residence Permit'

#### **5.) Health Insurance**

All students must have a valid health insurance during their stay in Hungary.

<http://www.med.u-szeged.hu/fs/medical-treatment-of/medical-treatment-of>

**6.) Attendance of classes:** If the absence does not exceed 15% of the total number of classes, students are not obliged to provide a certificate justifying the absence. If the absence falls between 15% and 25% of the total number

of classes, students may only make up for the missed classes if they provide a certificate. The departments have the right to refuse the acceptance of a semester if the student missed more than 25 % of the practicals and did not make up for the absences.

**7.) Obligation to report changes to the Secretariat:** If there is a change in your personal data (address, e-mail address, telephone number etc.) you are required to *notify the Secretariat and correct the data in the Neptun*. If you have to leave Szeged for a longer period of time during the lecture period due to substantial reasons (hospitalization, extraordinary family issues), you need to request permission in writing. Applications have to be handed in at the Foreign Students' Secretariat.

## **8.) General information regarding the examinations:**

### **General information before you sign up for your exams:**

- All exams including date, time and place is posted in the NEPTUN.
- Exam dates can be postponed before the NEPTUN closes the registration (*usually* 24 hours before the date of the exam. Clicking the course code, one can determine the closing of registration.) However, it is your duty to secure another date and time for your exam when you make changes.
- Students not showing up on an exam will lose one chance unless their absence is justified.
- A successful examination can be improved only in one subject / semester.

### **Procedures for unsuccessful exams:**

- Repeated exam can be scheduled at the earliest by the 3<sup>rd</sup> working day following the unsuccessful exam.
- Unsuccessful exams can be repeated 2 times during the exam period. Upon request, a repeated exam can be taken before a committee. The exam committee is appointed by the Department Chair. Repeated exams with committee can be scheduled only for exam dates announced in the Neptun.
- 3<sup>rd</sup> repeat chance can be granted to those who have **only one exam left**. (In these cases the chances should be decreased by one when students sign up for the course for the 3<sup>rd</sup> time). Requests have to be handed in at the Foreign Students' Secretariat.
- In the repeat examination period only repeated exams can be taken. First examinations – even with a former absent registration – cannot be taken in the repeat examination week!
- In exceptional cases (hospitalization, extraordinary family issues) further examination chances can be requested from the Dean. Examinations granted as an exceptional equity can be taken only till the end of second week following the repeat examination period. Supporting documents must be attached to the application.

*Further details are available in the relevant Info Sheet.*

## **EXPRESSIONS**

**Compulsory Elective Subject** (including Behavioral Science Subjects – only for medical students): There is a given number of credit points that has to be acquired in Compulsory Elective Subjects in the certain modules. One can choose freely from the subjects offered, however it is strongly recommended to follow the Suggested Study Plan.

**Compulsory Subject:** It is obligatory to take the subject in the module given.

**Contact hours:** Contact hours are the units of time required for a teacher to present subject material and to assess a student's performance. Contact hours include lectures, seminars, practical demonstrations, consultation hours and assessment.

**Course requirement:** The course requirement defines the precondition of a certain course. The course requirement can either be a **subject** or an **examination requirement**. In case of the *subject requirement* a course can be signed up for only if the examination defined in the course requirement has been completed successfully. In case of the *examination requirement* the examination of a course can only be taken if the examination defined in the course requirement has been completed successfully.

**Credit:** Credits are standard measurement of a student's accepted study time. One credit equals thirty hours of study time.

**Credit transfer:** Is a procedure accorded by the University of Szeged Code of Study and Examination Regulations, whereby a partial or full exemption can be given from completing one or more subjects by acknowledging previously completed subjects and thereby award the appropriate number of credit points.

**Criteria Subject:** Completion of criteria subjects is a precondition for entering the next module or receiving the diploma after finishing the final year (Physical Training, Summer Practices, Hungarian Language). Criteria subjects have no credit allocated to.

**Elective Subject:** There is a given number of credit points that has to be acquired in the certain modules. One can choose freely from the subjects offered, however it is strongly recommended to follow the Suggested Study Plan.

**Examination course:** If one cannot pass an examination successfully in the semester given, the examination can be repeated in the next examination period if the Department concerned announces it in the given semester and you get permission from the Dean. This means that the student will be exempted from fulfilling the requirements of the semester (classes do not have to be attended). An examination course can be taken only once in a certain subject.

**Suggested study plan:** the order and timing of subjects offered to students enabling them to obtain qualification within a specified period of time.

**Term Mark:** TM (five-grade system)

### **Grading system**

#### *Five-grade system*

- 5 - excellent
- 4 - good
- 3 - accepted
- 2 - passed
- 1 - failed

## **GENERAL INFORMATION REGARDING THE STRUCTURE OF STUDIES AT THE ALBERT SZENT-GYÖRGYI MEDICAL SCHOOL**

### **I. STRUCTURE OF STUDIES**

In the academic year 2024/2025, students follow the curriculum/ suggested study plan of University of Szeged, Albert Szent-Györgyi Medical School (9001AK\_N\_2020) introduced in 2020/2021.

In order to obtain the Doctor of Medicine diploma, students need to acquire a minimum of 360 credits (by fulfilling the study and examination requirements of the subjects listed in the suggested study plan). In the final year, students, furthermore, have to complete the Final (State Board) Examination which consists of writing and defending a thesis, passing a complex written test and an oral patient examination (theoretical and practical part).

The order of taking the courses is set in the suggested study plan which is designed for completing medical studies within 12 semesters (6 years). **It is highly recommended to take the courses according to the Suggested Study Plan.**

#### **Teaching is performed in 4 modules:**

Basic Module (1<sup>st</sup>, 2<sup>nd</sup> year)  
Pre-Clinical Module (3<sup>rd</sup> year)  
Clinical Module (4<sup>th</sup>, 5<sup>th</sup> year)  
Final Module (6<sup>th</sup> year)

#### **Types of courses:**

Compulsory Courses  
Compulsory Elective Courses  
Elective Courses  
Criteria Courses

#### **Credits to be acquired:**

	<b>Basic Module (semesters 1-4)</b>	<b>Pre-Clinical Module (semesters 5-6)</b>	<b>Clinical Module (semesters 7-10)</b>	<b>Final Module (semesters 11-12)</b>
<b>Compulsory Courses</b>	97 credits	49 credits	116 credits	50 credits
<b>Compulsory Elective Courses</b>	35* credits			-
<b>Elective Courses</b>	18 credits			

<b>Criteria Subjects (no credits)</b>	Nursing Summer Practice	Internal Medicine Summer Practice	Doctor-Patient Communication, Surgery Summer Practice	
	2 semesters of Physical Education, Hungarian Language courses			

\* This number includes 10 credits for the completion of the fifth year courses Thesis Plan I. & II., the completion of which is compulsory for all the fifth year students.

All the requirements of a module have to be fulfilled in order to enter the next module.

## II. SPECIAL RULES FOR BEHAVIORAL SCIENCE SUBJECTS

In the fourth year (8th semester), students have to take a final examination which covers the knowledge, skills and attitudes learned during the seven previous semesters. The precondition for taking the examination is the earlier acquisition of 9 credits from the subjects below. However, it is recommended to complete all Behavioral Science Subjects (11 credits).

A total of 11 (9) credits from compulsory behavioral sciences courses are required.

Compulsory courses for years 1–4:

- Introduction to Medicine lecture and practice (year 1, fall semester; 2 credits)
- Medical Anthropology seminar (year 2, spring semester; 1 credits)
- Ethics in Medicine lecture and practice (year 4, spring semester; 3 credits -> 2 credits)
- Introduction to Psychology, Communication lecture and practice (year 1, spring semester; 2 credits -> 1 credits)
- Medical Psychology I. lecture and practice (year 4, fall semester; 2 credits)
- Medical Psychology II. lecture and practice (year 4, spring semester; 1 credits)
- Doctor-Patient Communication (criteria course, year 4, fall and spring semester)

Extra credits will be considered positively in the final assessment.

## SUGGESTED STUDY PLAN - MEDICINE - 2025/2026

## 6<sup>th</sup> year (11<sup>th</sup> and 12<sup>th</sup> semester) Academic year 2025/2026

The internships should be accomplished principally at the clinics and hospitals of the University; however, they can be also accomplished abroad, provided the students submit the acceptance letter of the clinic/hospital and have the permission of the department concerned before starting the practice. The accomplishment of the practices must be verified officially to the Secretariat as the precondition for starting the next practice.

Two practices can be accomplished continuously and the final examinations can be taken in the week following the accomplishment of the practices. In the sixth year interns can be assigned to duty service as physicians.

If the student fails an examination, it must be repeated together with the half of the practice period.

If the student fails to submit the thesis by the deadline given - or fails to submit it by the deadline of postponement, his/her internships and examinations must be suspended.

The State Board Examination consists of: Thesis defence, Test (Multiple Choice Questions), Oral examination (theory) and Practical examination (bedside examination).

*Further details are available in the relevant Internship Guide.*

## COMPULSORY PRACTICES IN SUMMER

### **Summer practice:**

1<sup>st</sup>, 3<sup>rd</sup> and 4<sup>th</sup> year students are required to complete a four-week compulsory summer practice in a hospital or clinic which must be accredited by the country concerned. At the completion of the practice an "Evaluation form" should be filled in, signed, stamped and sent directly from the hospital/clinic or submitted by the student in a sealed envelope. (The form can be downloaded from our website). A "Letter of Acceptance" issued by the hospital/clinic, furthermore a certificate that the hospital/clinic is accredited by the country concerned has to be presented at the Foreign Students' Secretariat **until May 2026. Please check the relevant Info Sheet for the exact date.**

*Students should register for completing a practice at least one month before its beginning. Practice fee must be paid before starting the practice.*

**1<sup>st</sup> year medical students** have to perform a four-week Nursing practice.

#### **Departments at the University of Szeged:**

1st Department of Internal Medicine  
2nd Department of Internal Medicine  
Obstetrics and Gynecology Department  
Department of Surgery  
Neurosurgery Department  
Neurology Department  
Psychiatry Department  
Pediatrics Department  
Ophthalmology Department  
Oto-Rhino-Laryngology and Head-Neck Surgery Department  
Urology Department  
Pulmonology Department  
Traumatology and Orthopaedics Department  
Department of Oral and Maxillofacial Surgery

**3<sup>rd</sup> year medical students** have to perform a four-week Internal Medicine practice.

#### **Departments at the University of Szeged:**

1st Department of Internal Medicine  
Division of Endocrinology  
2nd Department of Internal Medicine

**4<sup>th</sup> year medical students** have to perform a four-week General Surgery practice.

**Departments at the University of Szeged:**

Department of Surgery

**INTERIM PRACTICE**

*4th year medical students* have to complete a two-day Obstetrics and Gynaecology Delivery-Room Practice in one semester.

**EXTRACURRICULAR SCIENTIFIC ACTIVITY**

**Department of Anatomy, Histology and Embryology Department**

**1. Fostering the regenerative processes in the central nervous system**

Prof. Antal Nógrádi

**2. Regenerative capacity of neural stem cells**

Dr. Krisztián Pajer

**3. Role of the cholinergic system in the epileptogene**

Dr. Endre Dobó

**4. Molecular mechanisms leading to axon degeneration**

Dr. Róbert Adalbert

**5. Cellular and molecular changes in hippocampal sclerosis**

Prof. András Mihály

**6. Pain mechanisms: role of gangliosides in nociceptor function**

Dr. Péter Sántha, Prof. Gábor Jancsó

**7. Mechanisms of neuropathic pain: structural and other neuroplastic changes following peripheral nerve injuries**

Dr. Péter Sántha, Prof. Gábor Jancsó

**Department of Aviation and Space Medicine**

**1. Aviators' visuomotor work abilities in hypobaric hypoxia.**

Prof. Dr. Grósz Andor, CSc

**2. Certain aspects of visual information processing during workload in aviators**

Prof. Dr. Grósz Andor, CSc

### **Department Medical Biology**

**1. *Host-Microbe Interactions in Obesity and Comorbidities***

Prof. Dr. Zsolt Boldogkői (MSc, PhD, DSc) and Dr. habil. Dóra Tombácz (MSc, PhD)

**2. *Transcriptional analysis of herpesviruses***

Prof. Dr. Zsolt Boldogkői (MSc, PhD, DSc) and Dr. habil. Dóra Tombácz (MSc, PhD)

**3. *Analysis of Transcriptional Interference Networks (TINs)***

Prof. Dr. Zsolt Boldogkői (MSc, PhD, DSc) and Dr. habil. Dóra Tombácz (MSc, PhD)

**4. *Virome and aging: a longitudinal multi-OMICS study using dog as a model***

**5. *Organization principles of the transcriptome: an integrated study using virus models***

### **Department for Medical Communication and Translation Studies**

<u>Supervisor</u>	<u>Topic</u>
<b>Eszter Asztalos-Zsembery</b>	Neuroimaging of second-language reading comprehension
<b>Eszter Asztalos-Zsembery in collaboration with dr. Attila Nagy, Assistant Professor</b> (Department of Medical Physics and Informatics)	Language localization of 3D Slicer image computing platform
<b>Gergely Brandl</b>	History of Medicine and the Healthcare System with Special Regards to Modern Times
<b>Réka Csenki-Bozsó</b>	Medical students' mother tongue, second language and early start in foreign language(s)
<b>Attila Hajdú</b>	Ancient Greek medicine in its relation to religion
<b>dr. Endre Hamvas</b>	Herbs and incenses in a magical handbook: Pharmacological recipes in Picatrix
<b>dr. Endre Hamvas</b>	Magical backgrounds of misconceptions of modern pseudo-medical theories
<b>dr. Csilla Keresztes</b>	Challenges in doctor–patient communication
<b>Margit Skadra</b>	Communication barriers in the German healthcare system
<b>Andrea Stötzer</b>	Surveying learning strategies among Medical Students

### **Department of Nuclear Medicine**

1. Theranostics in Oncology, Dr. László Pávics, Professor of Nuclear Medicine.

2. Hybrid Imaging (PET/CT; SPECT/CT) in clinical praxis, Dr. Zsuzsanna Besenyi MD, PhD

3. New Nuclear Medicine investigations in oncology, Dr. Besenyi Zsuzsanna MD, PhD

**Department of Behavioural Sciences****1. The role of culture in reactions to disease**

Prof. Bettina Pikó MD. Dsc.

**Department of Otolaryngology and Head & Neck Surgery****1. Pathogenesis and treatment of laryngeal tumors****2. Pathophysiology and treatment of vocal cord functional disorders****Department of Oto-Rhino Laryngology and Head & Neck Surgery**

<b>Supervisor</b>	<b>Topic</b>
Prof. Dr. habil. László Rovó Ph.D., head of department	Objective and subjective functional examination methods of the therapy of laryngeal diseases
Prof. Dr. habil. László Rovó Ph.D., head of department	Evaluation of the efficiency of modern implantable hearing aids
Dr. habil. József Géza Kiss Ph.D, scientific advisor	Methods of objective audiometry / Brainstem evoked response tests
Dr. habil. József Géza Kiss Ph.D, scientific advisor	Methods of objective audiometry/ Examination of P300
Dr. habil. József Géza Kiss Ph.D, scientific advisor	Methods of objective audiometry/ Otoacoustic emission
Dr. habil. József Géza Kiss Ph.D, scientific advisor	Methods of objective audiometry/ Diseases of the inner ear, cochlear implantation
Dr. László Iván Ph.D., associate professor	Surgical therapy of pharyngeal-laryngeal tumors
Dr. László Iván Ph.D., associate professor	Function-sparing surgery of the larynx
Dr. László Iván Ph.D., associate professor	Complex oncological therapy of patients with head and neck malignancies
Dr. Miklós Csanády Ph.D., associate professor	Endolaryngeal laser surgery
Dr. Miklós Csanády Ph.D., associate professor	Partial resection of the larynx and the pharynx
Dr. Miklós Csanády Ph.D., associate professor	Evaluation of the oncological therapy of patients with head and neck malignancies
Dr. Zolt Bella Ph.D., senior lecturer	Endoscopic surgery of the skullbase
Dr. Zolt Bella Ph.D., senior lecturer	Endoscopic surgery of the paranasal sinuses
Dr. Zolt Bella Ph.D., senior lecturer	Evaluation and therapy of sleep related breathing disorders
Dr. Balázs Sztanó Ph.D., senior lecturer	Modern evaluation of upper airway stenoses
Dr. habil. József Géza Kiss Ph.D, scientific advisor / Roland Nagy., research assistant	Cochlear implant fitting

Dr. habil. József Géza Kiss Ph.D, scientific advisor / Balázs Dimák, research assistant	Objective electrophysiological examinations in audiology
Dr. János Jarabin senior lecturer	Audiological examinations of bone anchored hearing aid systems
Dr. János Jarabin senior lecturer	Differential diagnostics of vestibular disorders
Dr. Gábor Vass senior lecturer	Surgical methods of the tumors of the sinuses with covert approaches „ the facial degloving technique”.
Dr. Gábor Vass senior lecturer	Disturbed wound healing following the surgeries of implantable hearing aid systems – surgical methods and the possibilities of prevention
Dr. Diána Szabó – senior lecturer	New therapeutic options in peripherae n. facialis palsy
Dr. Ádám Perényi – senior lecturer	Implanted devices and imaging diagnostics in ENT – what examinations can be performed with what expectations and limitations?
Dr. Ádám Perényi – senior lecturer	Speech discrimination, directional hearing, quality of life, social status and satisfaction of patients with cochlear implants
Dr. Ádám Perényi – senior lecturer	Speech discrimination, directional hearing, quality of life, social status and satisfaction of patients with middle ear implants
Dr. Zsófia Bere senior lecturer	Surgical Techniques of Bone Conductive Hearing Implants — Introduction of Minimally Invasive Surgical Procedures.
Dr. Zsófia Bere senior lecturer	Audiological examination of Bone Conduction Hearing Aided patients
Dr. Zsófia Bere senior lecturer	Health and Quality of Life Outcomes of Bone Conduction Hearing Aided patients
Dr. Roland Nagy research fellow	Pupillometry in audiology
Dr. Roland Nagy research fellow	Sound localization test for implantable hearing aid patients
Dr. Roland Nagy research fellow	Electrophysiology measurements of Cochlear Implant (CI)
Dr. Roland Nagy research fellow	3D reconstruction in ear surgery
Dr. Balázs Dimák research fellow	Objective electrophysiological measurements on implantable hearing aids
Dr. Balázs Dimák research fellow	Software development of hungarian speechtest
Dr. Balázs Dimák research fellow	Construction and validation of hungarian speechtest
Rebeka Anna Schulcz psychologist	Quality of life among hearing aid users
Rebeka Anna Schulcz psychologist	Quality of life among cochlear implant users

### **Department of Family Medicine**

1. The implementation of Point-of-care ultrasound in family medicine
2. Point-of-care ultrasound in the differential diagnosis of dyspnoea in general practice

**Department of Forensic Medicine****1. Illegal drug use**

Katalin Kovács MD PhD

**2. Laboratory investigation of drug abuse**

Róbert Berkecz MSc PhD

**3. Drunk driving**

Katalin Kovács MD PhD

**4. Minimal invasive autopsy**

Beáta Havasi MD

**5. Thanatochemistry**

Beáta Havasi MD, Éva Sija MSc PhD

**6. Postmortem detection of metabolic disorders**

Beáta Havasi MD, Róbert Berkecz MSc PhD

**7. Forensic histopathology**

Roland Weiczner MD PhD, Gábor Papp MD

**8. Evaluation of permanent disability**

Beáta Havasi MD

**9. Fitness to drive**

Beáta Havasi MD

**10. Sudden cardiac death**

Alíz Hernádi MD

**11. Identification**

Árpád Szabó MD, Tímea Mai MD

**12. Unnatural death (e.g. traffic accidents, suicide, family violence, drowning)**

Árpád Szabó MD, Katalin Kovács MD, Beáta Havasi MD

**13. Medical law (e.g. informed consent, assisted suicide, malpractice)**

Máté Julesz MJur PhD, Roland Weiczner MD PhD

**Department of Health Economics**

1. The role of health behavior in the therapeutic efficacy of type 2 diabetes and the rehabilitation of cardiometabolic patients
2. Health literacy, technology adoption, and peer support in the management of type 1 diabetes in children
3. Readiness and difficulties of young adults with type 1 diabetes transitioning from child to adult care
4. Sustainable financing of healthcare

**Department of Internal Medicine (Western Division)**

prof. Dr. Tamás Takács M.D. Ph.D., DSc Dr. Zoltán Rakonczay Jr MD. Ph.D., DSc prof. dr. Péter Hegyi MD. Ph.D. DSc	The pathomechanism of pancreatitis

## **Department of Surgery**

1. Complex surgical treatment of breast tumors.
2. Surgical treatment of upper gastrointestinal tract diseases.
3. Surgical treatment of lower gastrointestinal tract diseases.
4. Surgical treatment of liver, bile ducts, and gallbladder diseases.
5. Surgical treatment of pancreatic diseases.
6. Minimally invasive surgical procedures.
7. Treatment of general surgical conditions.
8. Surgical treatment of acute abdominal emergencies.
9. Kidney transplantation.
10. Complex management of vascular surgical conditions.
11. Complex treatment of thoracic surgical diseases.
12. Surgical treatment of endocrine diseases.
13. Application of electrochemotherapy for soft tissue tumors.

## **Institute of Surgical Research**

**1. Protective effects of biological gases in circulatory disorders**

Prof. Mihály Boros, M.D., Ph.D., D.Sc.

Dr. Gabriella Varga, Ph.D.

Dr. Dániel Érces, Ph.D.

**2. Acting mechanism and interplay of biologically active gases in sterile inflammation and *in vitro* systems.**

Prof. Mihály Boros, M.D., Ph.D., D.Sc.

Dr. Szabolcs Péter Tallósy, Ph.D.

**3. Therapeutic possibilities of the microcirculatory and mitochondrial dysfunction in septic condition**

Dr. László Juhász, Ph.D.

Dr. Attila Rutai, Ph.D.

**4. Assessment of mitochondrial function in local and systemic inflammatory diseases**

Dr. László Juhász, Ph.D.

**5. Assessment and modulation of the biochemical and microcirculatory consequences of urogenital diseases**

Dr. Andrea Szabó, M.D., Ph.D.

Dr. Marietta Zita Poles, Ph.D.

**6. Assessment and modulation of the injury of endothelial glycocalyx caused by circulatory disorders.**

Dr. Andrea Szabó, M.D., Ph.D.

Dr. Marietta Zita Poles, Ph.D.

**7. Non-bacterial methane production: molecular mechanism and significance in clinical diagnostics**

Prof. Mihály Boros, M.D., Ph.D., D.Sc.

Dr. Szabolcs Péter Tallósy, Ph.D.

**8. Non-invasive investigation of the lung and gastrointestinal microcirculation.**

Dr. Gabriella Varga, Ph.D.

Dr. Dániel Érces, Ph.D.

**9. Formation of neutrophil extracellular traps and therapeutic influence in circulatory failure**

Dr. Szabolcs Péter Tallósy, Ph.D.

Dr. Attila Rutai, Ph.D.

**10. State-of-the-art assessment methods for quantification of surgical skills**

Dr. Andrea Szabó, M.D., Ph.D.

Dr. Marietta Zita Poles, Ph.D.

**11. Changes in cerebral mitochondrial function in tryptophan metabolism deficient mice.**

Dr. Marietta Zita Poles, Ph.D.

Dr. László Juhász, Ph.D.

**Department of Physiology**

After successful completion of the Medical Physiology I course, interested students can inquire about available student research projects by the principal investigators of departmental research units found at <https://www.phys.szote.u-szeged.hu/index.php?lap=20&id=en>.

**Department of Pathophysiology**

Student research program consultant: Dr Krisztina Anna Csabafi

telephone number: + 36 62 545 993

E-mail: [csabafi.krisztina@med.u-szeged.hu](mailto:csabafi.krisztina@med.u-szeged.hu)

Thesis & scientific circle Topics (TDK)	
Tutor	Topic
Júlia Szakács M.D., Ph.D.	Study of the behavioral effects of neuropeptides
Miklós Jászberényi, M.D., Ph.D., D.Sc.	The Pathophysiology of Alzheimer's Disease
	The role of neuropeptide mediators in the control of affective, emotional and cognitive processes
	The Effect of Neuropeptides on the Hypothalamus-Pituitary-Adrenal system
Zsolt Bagosi, M.D., Ph.D.	The role of CRF and urocortins in anxiety, depression and social interaction
	The effects of urocortins and its fragments in anxiety and depression
	The hypothalamic and extra hypothalamic regulation of CRF

	The role of CRF and urocortins in alcohol, nicotine and cannabis addiction
Krisztina Anna Csabafi, M.D., Ph.D.	The effect of kisspeptin on amyloid-beta neurotoxicity
	Effect of neuropeptides on nociception and morphine induced analgesia, tolerance
Krisztina Anna Csabafi, M.D., Ph.D. Katalin Eszter Ibos, M.D., Ph.D.	Role of neuropeptides in anxiety and the development of anxious phenotype
Zoltán Rakonczay, M.D., Ph.D. D.Sc. Lóránd Kiss Ph.D.	The pathomechanism of experimental acute pancreatitis and therapeutic investigations
Márta Sárközy, M.D., Ph.D.	Experimental investigation of the molecular mechanisms and potential therapeutic targets of uremic cardiomyopathy
	Experimental investigation of the mechanisms and potential therapeutic targets of chemotherapeutic-induced chronic cardiotoxicity
	Experimental investigation of mechanisms and potential therapeutic targets of heart failure as a chronic side effect of radiotherapy
István Koncz, M.D., Ph.D.	Mechanisms of Cardiac Arrhythmia
Any topic in pathophysiology agreed by the supervisor	

### **Department of Public Health**

1. Lifestyle and health literacy during pregnancy, Prof. Edit Paulik MD, PhD, head of department
2. Stereotypes among medical students regarding their future professional and family roles, Regina Molnár PhD, assistant professor
3. Knowledge and attitude of one health approach among health care students, Andrea Szabó PhD, assistant professor
4. Knowledge and attitudes on climate change, Zsuzsanna Máté PhD, assistant professor
5. Sociocultural patterns of sexual health, Csaba Erdős PhD, assistant lecturer
6. Quality of life survey among cancer patients, Mária Kucsera PhD, assistant lecturer

### **Department of Trauma and Orthopaedics**

Name of consultant, ranking and scientific grade	Themes
Prof. Dr. Varga Endre Dr. Gárgyán István	Chest stabilization results in the clinic
Prof. Dr. Varga Endre Dr. Csete Károly	Augmentation possibilities for bone related surgeries
Prof. Dr. Varga Endre Dr. Mácsai Attila	Navigation in Traumatology
Prof. Dr. Varga Endre Dr. Vági Zsolt	Comparison of two types of Cervicocapital prosthetics; CKP vs. Bipolar prosthesis
Dr. Török László Dr. Csete Károly	Clavicular fracture treatment options, and its comparison to functional treatments.

Dr. Csete Károly Dr. Hartmann Petra	Comparison of functional results after cruciate ligament reconstruction
Dr. Csonka Endre	Proximal humerus fracture treatment.
Dr. Csonka Endre	Results of arthroscopic intervention for the shoulder joint in the clinic
Dr. Csonka Endre Dr. Baráth Bálint	Minimally invasive treatment of shoulder joint and shoulder girdle injuries
Dr. Csonka Endre	Biomechanics of the elbow joint, elbow injury therapy
Dr. Hartmann Petra	A prospective study of the ATLS-classification-based patient care for traumatic injuries at the Szeged Traumatology Clinic
Dr. Hartmann Petra	Exhaled methane measurement as a non-invasive diagnostic tool for assessing the haemodynamic status of severely traumatised patients requiring ventilation
Dr. Hartmann Petra	The role of mitochondrial dysfunction in coagulopathy of polytrauma patients
Dr. Hartmann Petra	The role of the gut microbiom in the development of post-traumatic systemic immune response
Dr. Hartmann Petra	Effect of antibiotics used during surgical prophylaxis on mitochondrial function and microbiome composition of intestinal epithelial cells
Dr. Csonka Ákos Dr. Machác Petr	Plate osteosynthesis versus intramedullary nailing in oblique and transverse fractures of the middle third of the clavicle with complete displacement
Dr. Kurokawa Takayuki	A realtime analysis on the carbon footprint of Video Assisted Thoracoscopic Surgery
Dr. Kurokawa Takayuki	EAA supplementation for patients undergoing ACL reconstruction surgery
Dr. Kurokawa Takayuki Dr. Sádó Zoltán	A retrospective analysis of traumatic PTX
Dr. Kurokawa Takayuki Dr. Kovács Mihály	Shoulder arthroplasty and its radiographic evaluation
Dr. Kurokawa Takayuki Dr. Kovács Mihály	Postoperative circulatory examination of the shoulder
Dr. Kurokawa Takayuki Dr. Kovács Mihály	Use of 3D technology in patients with surgical neck fractures of the humerus

Dr. Kurokawa Takayuki	MRI vs Arthroscopy
Dr. Kurokawa Takayuki Dr. Mácsai Attila	Retrospective analysis of pelvic fractures
Dr. Kurokawa Takayuki Gárgyán Dorina	Psychological complications of patients with proximal femoral fractures
Dr. Kurokawa Takayuki Dr. Sádó Zoltán	Application of Chrisofix fixation in patients with multiple rib fractures

Dr. habil. Krisztián Sisák Ph. D.	Long term follow-up on the Proxima short stem
Dr. habil. Krisztián Sisák Ph. D.	Uncemented total hip replacement in the elderly, advantages and risks
Dr. habil. Krisztián Sisák Ph. D.	The treatment of periprosthetic joint infection of the hip – the results of two-stage revision
Dr. habil. Gellért Sohár Ph. D.	Role of obesity in the survivor of unidondylar knee prosthesis
Dr. Ernest Nagy clinical doctor	Is hypoproteinemia a pre-op risk factor for septic infection in elective knee (TKR) & hip (THR) surgery?
Dr. Arany László assistant lecturer	The effect of tranexamic acid on transfusion rate after lowerlimb arthroplasty
Dr. Gálity Hristifor assistant lecturer	Analysis of TKA revisions due to aseptic loosening at our department
Dr. Gombár Csaba senior lecturer	Estimating component sizes in hip and knee arthroplasty using anthropometric methods

## **Department of Laboratory Medicine**

The scientific activity at the Department of Laboratory Medicine mainly focuses on the evaluation of CYP19 aromatase enzyme expression in different cell types such as ovarian granulosa cells and microglial cells. In both cell types aromatase plays a key role in the steroidogenesis (estradiol biosynthesis). In granulosa estrogens are responsible for follicle maturation and in microglial cells estrogens are deeply involved in cell-cell communications and cellular repair mechanisms. We investigate the basic endocrine mechanisms and the effects of different molecules (e.g. aromatase inhibitors) on aromatase in primary cell cultures. We apply different techniques (e.g. immunohistochemistry, western blot, PCR, ELISA) for the investigation. It is possible to join us to perform experimental work in the frame of student science study group project or to write your diploma work (theoretical or experimental topics are offered).

## RECOMMENDED TEXTBOOKS FOR MEDICAL STUDENTS

### FIRST YEAR

It is recommended to purchase the latest edition of the following textbooks!

#### **ANATOMY, HISTOLOGY AND EMBRYOLOGY**

- Richard L. Drake, A. Wayne Vogl, Adam W. M. Mitchell: Gray's Anatomy For Students (ELSEVIER, 14th Edition, 2020) ISBN: 978-0-323-39304-1
- Leslie P. Gartner, James L. Hiatt: Concise Histology (SAUNDERS ELSEVIER, 2011) ISBN: 978-0-702031114-4
- F. Hajdu, Gy. Somogyi: Histology - Practical Manual (Semmelweis Publisher, 5th Corrected Edition, 2014) ISBN 978-963-331-244-5
- T.W. Sadler: Langman's Medical Embryology (Williams & Wilkins, 13th Edition) ISBN-13: 978-1451191646
- M. Schuenke, E. Schulte, Udo Schumacher: Thieme Atlas of Anatomy: General Anatomy and Musculoskeletal System, Head and Neuroanatomy, Internal Organs (Thieme)

#### **CELL BIOLOGY AND MOLECULAR GENETICS**

Obligatory:

- William K. Purves, Gordon H. Orians: Life: The Science of Biology, W.H. Freeman and Company, New York
- J. Darnell H. Lodish D. Baltimore: Molecular Cell Biology, W.H. Freeman and Company, New York
- B. Alberts, D.B.J. Lewis, M. Raff. K. Roberts, J.D. Watson: Molecular Biology of the Cell, Garland Publishing, Inc. New York

Recommended:

- Bruce Alberts et al: Essential Cell Biology with Ebook, Smartwork5, and Animations, 9780393680393

#### **BASIC LIFE SUPPORT**

- European Resuscitation Council (ERC): Guidelines for Resuscitation 2015. <https://cprguidelines.eu/>
- Brent, Karren: First Aid for Colleges and Universities, Brady Morton Series

#### **INTRODUCTION TO MEDICINE**

- Bettina Pikó : Introduction to Medicine. Basic Principles of Behavioral Sciences and, Preventive Medicine. University of Szeged

#### **INTRODUCTION TO PSYCHOLOGY, COMMUNICATION**

- Nolen-Hoeksema S., Fredrickson B.L., Loftus G.R., Wagenaar W.A.: *Atkinson and Hilgard's Introduction to Psychology*. Cengage Learning EMEA, 2009.
- János Pilling (ed): *Medical Communication*. Medicina, 2011

#### **LATIN BASED MEDICAL TERMINOLOGY**

- Gergely Brandl – Imre Áron Illés – Márta Marancsik – Edit Vágvolgyi: *Latin Based Medical Terminology*, JPress Szeged, 2021

#### **MEDICAL CHEMISTRY**

Obligatory:

- Ebbing-Hart: General Chemistry /Organic Chemistry, Houghton Mifflin Company

Recommended:

- Harold Hart: Organic Chemistry (A Short Course), Houghton Mifflin Company, Boston
- P. Gergely: Organic and Bioorganic Chemistry for Medical Students, University Medical School of Debrecen
- John McMurry: Fundamentals of Organic Chemistry, Brooks/Cole Publishing Company, ITP, An International Thomson Publishing Company

#### **MEDICAL PHYSICS**

- S Damjanovich, J Fidy and J Szöllősi (eds): Medical Biophysics. Medicina, 2009.
- Paul Davidovits: Physics in Biology and Medicine. Fourth edition. Academic Press, 2013.

## MEDICAL STATISTICS

Students can download course material (handouts, lecture notes, R scripts) from the Coospace.

Suggested textbook:

- Michael J. Campbell – David Machin – Stephen J. Walters: Medical Statistics. A Textbook for the Health Sciences (2012) ISBN: 978-1-118-30061-9

## MEDICAL DICTIONARIES

- Mosbey's: Mosbey's Medical, Nursing and Allied Health, Mosbey
- Stedmans: Medical Dictionary, Williams and Wilkins

## HUNGARIAN LANGUAGE

- Erzsébet Balogh & Margit Skadra: Multikulti Magyar nyelv külföldieknek – Hungarian for foreigners. ISBN: 978 963 226 599 5. Medicina, 2016

# SECOND YEAR

## ANATOMY, HISTOLOGY AND EMBRYOLOGY

### I. Obligatory textbooks:

- K. Won Chung: **Gross Anatomy**, Lippincott Williams & Wilkins
- Douglas J. Gould; James D. Fix: **BRS Neuroanatomy 5th**; Lippincott Williams & Wilkins **ISBN 13: 9781451176094**
- Crossman & Neary: **Neuroanatomy: an Illustrated Colour Text**; *ELSEVIER*
- Mtui, Gruener & Dockery: Fitzgerald's **Clinical Neuroanatomy and Neuroscience**; *ELSEVIER*
- **Sobotta Atlas of Human Anatomy: Volume 1, 15th ed., English**; *ELSEVIER*
- **Sobotta Atlas of Human Anatomy: Volume 2, 15th ed., English**; *ELSEVIER*
- **Sobotta Atlas of Human Anatomy: Volume 3, 15th ed., English**; *ELSEVIER*
- M. Loukas, B. Benninger, R. S. Tubbs : **Gray's Clinical Photographic Dissector of the Human Body**; *ELSEVIER*
- L. P. Gartner, J. L. Hiatt: **Concise Histology**; *ELSEVIER*
- K. Moore & T. V. N. Persaud: **The Developing Human**; *ELSEVIER*

### II. Recommended textbooks:

- W. Platzer: **Color Atlas of Human Anatomy, Volume 1: Locomotor System**; *THIEME*
- H. Fritsch, W. Kuehnel: **Color Atlas of Human Anatomy, Volume 2: Internal Organs**; *THIEME*
- W. Kahle, M. Frotscher: **Color Atlas of Human Anatomy, Volume 3: Nervous System and Sensory Organs**; *THIEME*
- M. Schuenke, E. Schulte, U. Schumacher: **THIEME Atlas of Anatomy, Head and Neuroanatomy**; *THIEME*
- M. Schuenke, E. Schulte, U. Schumacher: **THIEME Atlas of Anatomy, General Anatomy and Musculoskeletal System**; *THIEME*
- M. Schuenke, E. Schulte, U. Schumacher: **THIEME Atlas of Anatomy, Neck and Internal Organs**; *THIEME*
- Junqueira, Carneiro, Kelley: **Basic Histology**, Prentice Hall, International Student Edition, Mc Graw-Hill
- Netter, Frank H.: **Atlas of Human Anatomy**, Icon Learning Systems; *ELSEVIER*
- L. R. Cochard: **Netter's Atlas of Human Embryology**; *ELSEVIER*
- Sadler: **Langman's Medical Embryology**, with Simbryo CD, *Lippincott Williams & Wilkins*
- Moore, Persaud & Torchia: **Before We Are Born**, Essentials of Embryology and Birth Defects; *ELSEVIER*
- Cochard: **Netter's Atlas of Human Embryology**; *ELSEVIER*

**BIOCHEMISTRY, BIOCHEMISTRY SEMINAR****Obligatory:**

- Robert K. Murray, Daryl K. Ganner, Peter A. Mayers, Vicot W. Rodwell: Harper's Illustrated Biochemistry 29th Edition 2012 ISBN: 978-0-07-176576-3

**Recommended for 1st semester:**

- W. J. Marshall, S. K. Bangert: Clinical Chemistry 6th Edition 2008 ISBN:9780723434559
- P.C. Champe, R. A. Harvey: Lippincott's Illustrated Reviews Biochemistry 4th Edition 2008 ISBN-13: 978-07817-6960-0
- J.W. Baynes, M. H. Dominiczak: Medical Biochemistry 4th Edition, 2014-06-04 ISBN: 978-1-4557-4580-7

**BIOCHEMICAL BASICS OF PREVENTIVE MEDICINE**

- Janet Christian and Janet Greger: Nutrition for Living, Addison-Wesley

**CARDIAC ELECTROPHYSIOLOGY AS A BASIC PROPERTY OF CARDIAC FUNCTION**

- Macfarlane PW, van Oosterom A, Janse MJ, Camm J, Kligfield P, Pahlm O, eds. Comprehensive Electrocardiology, 2nd Ed. Springer, London

**IMMUNOLOGY**

- Abul Abbas Andrew Lichtman Shiv Pillai: Basic Immunology (Elsevier, 2019)
- Abul Abbas Andrew Lichtman Shiv Pillai: Cellular and molecular immunology (Elsevier, 2017)
- Janeway: Immunobiology (Taylor&Francis, 2007)

**MATHEMATICAL AND STATISTICAL MODELLING IN MEDICINE**

- Mark Woodward: Epidemiology –Study design and Data analysis, Chapman & Hall/CRC 1999
- Interesting mathematical problems in every-day life. Electronic handout in Teaching Mathematics and Statistics in Sciences HU-SRB/0901/221/088

**MEDICAL ANTHROPOLOGY**

- C.G.Helman: Culture, Health and Illness, Oxford University Press

**MEDICAL PHYSIOLOGY*****We recommend obtaining ONE of the following modern textbooks:***

- Arthur C.Guyton, John E. Hall: Textbook of Medical Physiology, Elsevier Science
- Kim Barrett, Heddwen Brooks, Scott Biotano, Susan Barman: Ganong's Review of Medical Physiology, McGraw Hill Publishers
- Walter F. Boron, Emile L. Boulpaep: Medical Physiology, Saunders Elsevier
- William F. Ganong: Review of Medical Physiology by The McGraw-Hill Companies Inc.
- Fonyó Attila: Principles of Medical Physiology, Medicina Kiadó Zrt.
- Albert Szent-Györgyi Medical University, Department of Physiology, Physiology Laboratory Manual, (handout)
- Linda S Costanzo Physiology Elsevier

**MEDICAL SOCIOLOGY*****Obligatory:***

- Molnár Regina, Erdős Csaba: Guide for studying medical sociology. 2022. University of Szeged, Department of Public Health

***Recommended:***

- Cockerham W.C. (2021). Medical Sociology. University of Alabama at Birmingham, Routledge. (5th e.)
- Giddens, A. & Sutton, P. W. (2017). Sociology. (8th ed.). Polity Press

**HUNGARIAN LANGUAGE**

- Erzsébet Balogh & Margit Skadra: Multikulti Magyar nyelv külföldieknek – Hungarian for foreigners. ISBN: 978 963 226 599 5. Medicina, 2016
- Margit Skadra: Elsősegély a magyar orvosi nyelvhez - First Aid for Medical Hungarian. ISBN: 978 963 226 846 0 Medicina, 2022

<b>THIRD YEAR</b>
-------------------

**HUNGARIAN LANGUAGE**

- History taking in Hungarian Part 1 (Csilla Keresztes, Marietta Kiss, Eszter Asztalos-Zsembery, Andrea Stötzer, Rita Vástyán, Zsuzsanna Szűcs, Krisztina Helle, Gabriella Hild, Zoltán Krommer, Gabriella Nagy, Judit Sávy, Tímea Németh; Medical editors: Bernadett Borda, MD, Attila Farkas, MD) Corfiota Kft, Szeged 2024

**INTERNAL MEDICINE (CLINICAL DIAGNOSTICS)**

Obligatory:

- Barbara Bates': A Guide to Physical Examination and History Taking, 13th ed. Lynn S. Bickley, Peter G. Szilagyi, Richard M. Hoffman, Rainier P. Soriano Publication date: 2023 ISBN: 978-1496398178

Recommended:

- Harrison's Principles of Internal Medicine (2 Volume Set), Authors: Loscalzo, Fauci, Kasper, Hauser, Longo, Jameson, ISBN: 9781264268504, Publication Date: 2022, Edition: 21
- Te-Chuan Chou: Chou's Electrocardiography Clinical Practice, 6th ed., Borys Surawicz, 2008., ISBN: 1416037748
- Brostoff: Clinical Immunology – An Illustrated Outline, Mosby, 1994, ISBN: 1563756641
- Kumar, Parveen, Clark, Michael: Clinical Medicine, 5th ed., W. B. Saunders, 2002, ISBN: 0702025798
- Current Medical Diagnosis and Treatment 2023, Author(s): Maxine A. Papadakis, Stephen J. McPhee, Michael W. Rabow, Kenneth R. McQuaid ISBN: 1264687346, Publication date: 2022
- Stone: Current Emergency Diagnosis & Treatment, 8th ed., McGraw Hill / Medical, 2017., ISBN: 0071840613

**MICROBIOLOGY**

- Murray et al., Medical Microbiology, Elsevier, Mosby; 10th Edition, 2025
- Medical Microbiology 19th Edition , Elsevier Michael Barer Will Irving 2020

**MICROSURGERY**

- Szabó, A., Vass, G., Zádor, Z., Boros, M.: Basics of Microsurgery. Manual for Medical Students, Szeged, 2004. (handout)

**PATHOLOGY**

- Kumar, Abbas, Aster, Deyrup - Robbins & Kumar Basic Pathology, Elsevier, 2023, 11th Edition, ISBN: 9780323790185

**PATHOPHYSIOLOGY****Obligatory**

- Gary D. Hammer, Stephen J. McPhee. **Pathophysiology of Disease: An Introduction to Clinical Medicine** 8th Edition, (2019) LANGE McGraw-Hill Education.
- Krisztina Csabafi et al. ECG guide, (2020) - notes

**Recommended**

- Vinay Kumar, Abul K. Abbas, Jon C. Aster. Robbins and Cotran Pathologic basis of disease 9th edition, (2014) Elsevier Books.
- Malcolm S. Thaler. Only EKG book you'll ever need, (2018) Wolters Kluwer Health.

**SURGERY (CLINICAL DIAGNOSTICS)**

Ed.: Norton, Barie, Bollinger, Chang, Lowry, Mulvihill, Pass, Thompson, Shirazi: Surgery: Basic Science and Clinical Evidence (Book with CD-ROM), Springer, 2000., ISBN: 038798447X

Ed.: Townsend CM.: Sabiston Textbook of Surgery. The Biological Basis of Modern Surgical Practice. 21st Edition, Elsevier, 2021, Hardback ISBN: 9780323640626 Other ISBN: 9780323640640

**SURGICAL PROPEDEUTICS**

- Townsend CM.: Sabiston Textbook of Surgery. The Biological Basis of Modern Surgical Practice. 21st Edition, Elsevier, 2021  
Hardback ISBN: 9780323640626 Other ISBN: 9780323640640

**BASIC SURGICAL SKILLS, ADVANCED SURGICAL SKILLS**

- Boros, M. (Ed.): Surgical Techniques. Textbook for medical students. Innovariant Ltd., Szeged, 2006.  
ISBN 963 482 785 3.
- Boros, M. (Ed.): Practical Skills Syllabus. Innovariant Ltd., Szeged, 2008.

**BASIC IMMUNOPATHOLOGY**

- Abbas, A. K., Lichtman, A. H., Pillai, S (eds): Cellular and Molecular Immunology. 10<sup>th</sup> Edition. Elsevier, Saunders, Philadelphia, 2021. ISBN: 978-0-8089-2425-8----

**LABORATORY MEDICINE**

- William J. Marshall: Clinical Chemistry, 4th, 5th or 6th Edition, MOSBY – Harcourt Publishers Ltd. 2008, ISBN 0-72-34-3159-0

**FOURTH AND FIFTH YEAR****ANAESTHESIOLOGY AND INTENSIVE THERAPY**

Recommended:

- Keith G. Allman, Iain H. Wilson: Oxford Handbook of Anaesthesia, Oxford University Press, 2006.  
ISBN 0-19-856606-3
- Tim Craft, Jerry Nolan, Mike Parr: Critical Care, BIOS Scientific Publishers Ltd. 2009. ISBN 1-85996-2229-7

For fifth year students

Obligatory:

- Zsolt Molnár (Edited by): Anaesthesiology and Intensive Therapy (Medicina Könyvkiadó Zrt., 2013)

Recommended:

- Smith and Aitkenhead's Textbook of Anaesthesia
- Morgan and Mikhail's Clinical Anesthesiology

**AVIATION AND SPACE MEDICINE**

- **Fundamentals of Aerospace Medicine Ed.: Jeffrey R. Davis, MD, MS latest Edition.**
- **Human Performance and Limitations in Aviation latest edition Editor: M. Bagshaw, R D Campbell, ISBN:0-632-059656, pp. 196**
- **Ernsting's Aviation and Space Medicine, (Ed.: David P. Gradwell and David J. Rainford) latest edition**
- **Air Force Waiver Guide 2025.**  
**<https://www.afrl.af.mil/Portals/90/Documents/711/USAFSAM/Air%20Force%20Waiver%20Guide%20Compendium.pdf>**
- HUMAN ERROR – James Reason, Cambridge University Press 1990. New York, ISBN 978 0 521 31419 0.(<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC1070929/>)
- HUMAN FACTOR'S & PILOT PERFORMANCE – Air pilot's manual, Pooleys Air Pilot Publishing UK 2011. ISBN 978 1 84336 070 4
- HUM.ET1.ST13.3000-REP-02 Human Factors in the Investigation of Accidents and Incidents.<https://www.eurocontrol.int/sites/default/files/content/documents/nm/safety/safety-human-factors-module-human-factors-in-the-investigation-of-accidents-and-incidents-1998.pdf>

**CHILD AND ADOLESCENT PSYCHIATRY**

- Robert Goodman and Stephen Scott, Child Psychiatry, 1998

**CLINICAL IMMUNOLOGY**

Oxford Handbook of Clinical Immunology and Allergy, Oxford University Press, 2019, ISBN: 9780199603244;  
Online ISBN: 9780191742705

**CLINICAL ONCOLOGY**

- The principles of the complex management of cancer. Lecture notes University of Szeged, Faculty of Medicine Department of Oncotherapy, Edition 3, 2018.

**CLINICAL GENETICS*****Obligatory textbooks:***

1. Lecture notes
2. *Emery's Elements of Medical Genetics*. Peter Turnpenny, 15th edition, Elsevier, 2017

***Recommended textbooks:***

1. SMITH'S: Recognisable patterns of human malformation 2006
2. Human *Genetics*. A problem-based *approach*. Korf BR, 2nd ed, 2000, 2007.
3. Thompson and Thompson Genetics in Medicine by Robert L. Nussbaum, M.D. , Ada Hamosh, M.D. (Contributor), Huntington F. Willard, Ph.D., Margaret W. Thompson, Roderick R. McInnes, M.D., Paperback, Elsevier Science Health Science div 2007

**DERMATOLOGY**

- James Dinulos: Habif's Clinical Dermatology 7th Edition. A Color Guide to Diagnosis and Therapy. eBook ISBN: 9780323612708. Free access with ClinicalKey through the Klebelsberg Library.

**FAMILY MEDICINE**

- The Color Atlas and Synopsis of Family Medicine, 3rd Edition by Richard P. Usatine
- Bratton's Family Medicine Board Review 5th Edition by Robert A. Baldor

**FORENSIC MEDICINE**

Compulsory:

- Reinhard B. Dettmeyer, M.A. Verhoff, Harald F. Schütz Forensic Medicine Fundamentals and Perspectives, Springer-Verlag Berlin Heidelberg 2014 ISBN 978-3-642-38817-0, ISBN 978-3-642-38818-7 (eBook)

Recommended:

- Jason Payne-James ed.: Simson's Forensic Medicine 14th Edition, 2019 CRC Press ISBN-9781498704298
- Lecture Notes of Forensic Medicine (Ed.: P. Sótonyi, E. Keller), Semmelweis Publisher, 2008. ISBN 978 963 9656 92 5

**HUNGARIAN LANGUAGE**

- History taking in Hungarian Part 2 (Csilla Keresztes, Marietta Kiss, Eszter Asztalos-Zsembery, Andrea Stötzer, Rita Vástyán, Zsuzsanna Szűcs, Krisztina Helle, Gabriella Hild, Zoltán Krommer, Gabriella Nagy, Judit Sávy, Tímea Németh; Medical editors: Bernadett Borda, MD, Attila Farkas, MD) Corfiota Kft, Szeged 2025

**INTERNAL MEDICINE**

Obligatory:

- Hoffbrand, Moss: Essential Haematology, Wiley, 8th edition
- Harrison's Principles of Internal Medicine (2 Volume Set), Authors: Loscalzo, Fauci, Kasper, Hauser, Longo, Jameson, ISBN: 9781264268504, Publication Date: 2022, Edition:21
- Gibson, Costabel: Respiratory Medicine (2 Volume Set), 3rd ed., W. B. Saunders, 2002., ISBN: 0702026131
- Te-Chuan Chou: Chou's Electrocardiography Clinical Practice, 6th ed., Borys Surawicz, 2008., ISBN: 1416037748
- Forster T., Csanády M.: Atlas of Colour Doppler Echocardiography, Szeged, 1991.,
- I.J. Mazza: Manual of Clinical Hematology, Oxford Textbook of Nephrology JS Cameron, AM Davison et al, Oxford University Press, 2001., ISBN: 078172907
- The Merck Manual of Diagnosis and Therapy, Merck and Co. Inc. 2018., ISBN: 0911910425

## Recommended:

- Harrison's Principles of Internal Medicine (2 Volume Set), Authors: Loscalzo, Fauci, Kasper, Hauser, Longo, Jameson, ISBN: 9781264268504, Publication Date: 2022, Edition:21
- Brostoff: Clinical Immunology – An Illustrated Outline, Mosby, 1994, ISBN: 1563756641
- Stone: Current Emergency Diagnosis & Treatment, 8th ed., McGraw Hill / Medical, 2017., ISBN: 0071840613
- Cheitlin: Clinical Cardiology, 7th ed. (to be published in January 2006), Appleton & Lange, ISBN: 0838513859

## BASIC MODULE SYLLABUS

### Academic English for medical students I.

<b>Semester:</b>	1st or 3rd	<b>Code:</b>	AOK-OASZV761
<b>Course type:</b>	Practice	<b>Category:</b>	elective
<b>Hours/week:</b>	2	<b>Department:</b>	Med. Comm. and Translation
<b>Credit:</b>	2	<b>Form of Exam:</b>	Term Mark

#### topic

Placement test and Breaking news;

Introduction to scientific and medical language use: note-taking techniques and word formation (definitions, word order, collocations);

Understanding a text: reading (scan/skim/read for detail);

Writing with a purpose: essays (with special attention to paragraphs, topic sentences and hedging) and descriptions (graphs, figures, tables);

Oral skills: ppt and presentation (including all knowledge gained with special attention to signposting and presentation skills).

### Academic English for medical students II.

<b>Semester:</b>	2nd or 4th	<b>Code:</b>	AOK-OASZV762
<b>Course type:</b>	Practice	<b>Category:</b>	elective
<b>Hours/week:</b>	2	<b>Department:</b>	Med. Comm. and Translation
<b>Credit:</b>	2	<b>Form of Exam:</b>	Term Mark

#### topic

An introduction to medical English

Cohesion and coherence in written language: essay writing

Nouns and noun combinations in medical English

Reading for data (graphs and tables)

Comparison in scientific language

Cause and effect in medical language use

Most practical verb tenses in science

Modal verbs in medicine

Linking words and meaning construction in writing

## Anatomy, Histology and Embryology I. (+Dissection Practice I. & Histology Practice I.)

<b>Semester:</b>	1st	<b>Code:</b>	AOK-OAK0211/OAK0221/OAK0231
<b>Course type:</b>	Lecture/Practice/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2/3/2(16 hrs total)	<b>Department:</b>	Anatomy
<b>Credit:</b>	5/3/-	<b>Form of Exam:</b>	Exam/Term Mark/Signature

<u>week</u>	<u>Anatomy I.</u> 90-min lecture/week	<u>Anatomy I.</u> 45-min lecture/week, held on every 2nd week online	<u>Dissection I. topic</u>	<u>Histology I. topic</u>
1.	Introduction to human anatomy (anatomical nomenclature, planes, directions, axes). General osteology. General syndesmology.	Basic tissues, part 1: Epithelial tissues	<i>General information on the classes and exams.</i> <i>Injury preventive rules and dissecting room regulations.</i>  Bones of the upper limb.	Use of light microscope. Introduction to histological methods. Interpretation of histological preparations.
2.	General myology. General angiology.		Joints of the upper limb (UL). Cross-sectional anatomy of UL.	<b>Epithelial tissues, part 1</b> Kidney (HE) Jejunum (HE) Trachea (HE)
3.	General neuroanatomy. Spinal cord segment. Formation of the plexuses from the spinal nerves.	Basic tissues, part 2: Connecting and supporting tissues	Dissection of the muscles of the upper limb. Cross-sectional anatomy of UL.	<b>Epithelial tissues, part 2</b> Oesophagus (HE) Finger pad (HE) Unicellular gland (PAS+H) Submandibular gland (HE)
4.	Nerves of the upper limb.		Blood vessels of the upper limb. Cross-sectional anatomy of UL.	<b>Connective tissues</b> Finger pad (HE) Tendon (HE) Adipose tissue (HE) Adipose tissue (frozen section, Sudan Red)
5.	Functional anatomy of the upper limb.	Basic tissues, part 3: Muscle tissues	Nerves of the upper limb. Cross-sectional anatomy of UL.	<b>Supporting tissues</b> Hyaline cartilage (HE) Elastic cartilage (orcein) Fibrocartilage (HE) Bone (ground section) Endochondral ossification (HE)
6.	Nerve tissue, part 1.		<b>1st practical assessment</b> Anatomy of the upper limb.	<b>Muscle tissue</b> Smooth muscle (HE) Skeletal muscle (cross section, HE) Skeletal muscle (longit. section, HE) Cardiac muscle (HE) Cardiac muscle (iron hematoxylin)

7.	Nerve tissue, part 2.	Formed elements of blood. Haematopoiesis.	Bones of the pelvis and the free lower limb. Joints of the pelvis and the free lower limb.	<b>Nerve tissue, part 1</b> Sensory ganglion (HE) Spinal cord (HE) Cerebral cortex (HE) Cerebellum (HE) Vegetative ganglion (Ag)
8.	Structure (bone, joints, muscles) of the trunk. Layers of the thoracic wall. Surface projections of the thoracic organs.		Muscles of the pelvis and the free lower limb (LL). Cross-sectional anatomy of LL.	<b>Nerve tissue, part 2</b> Peripheral nerve (longit. section, HE) Peripheral nerve (cross section, HE) Peripheral nerve (longit. section, Os) Peripheral nerve (cross section, Os) Astrocyte (GFAP IHC)
9.	Biomechanical features of the trunk. Functional and sectional anatomy of the thorax.	Immune and lymphatic systems. Thymus: anatomy and histology.	Blood vessels and nerves of the lower limb. Cross-sectional anatomy of LL.	<b>1st practical assessment</b> Basic tissues.
10.	Mediastinum: divisions, layers, contents. Heart: chambers and valves.		<b>2nd practical assessment</b> Anatomy of the lower limb.	<b>Blood vessels:</b> Aorta (HE) Aorta (resorcin-fuchsin) Artery, vein (HE) Artery, vein (Orcein) Spermatic cord (HE)
11.	Intrinsic vessels of the heart. Impulse generating and conducting system of the heart. Innervation of heart. Anatomy of the pericardium.	Vegetative nervous system.	Bones, joints of the trunk. Anatomy of the thoracic cage. Superficial and deep back muscles. The diaphragm. Related cross-sectional anatomy.	<b>Blood</b> Blood smear (MGG) <b>Haematopoiesis</b> Red bone marrow (HE) <b>Lymphoid organs, part 1</b> Thymus (HE)
12.	General embryology. Development of the embryo: gastrulation and neurulation.		Superior mediastinum. Surface projections of the heart and the thoracic organs onto anterior thoracic wall. External features of the heart. The absolute and relative cardiac dullness.	<b>Lymphoid organs, part 2</b> Spleen (HE) Lymph node (HE) Palatine tonsil (HE) Root of tongue (HE)
13.	Development of the amnion and the yolk sacs. Fetal blood circulation.	Radiology of the limbs and chest.	Middle mediastinum. Dissection of the heart, cardiac vessels and pericardium. The interior of the opened heart. Posterior mediastinum. Related cross-sectional anatomy.	<b>Embryology</b> Spermatic cord (HE) Placenta (HE) Chicken embryo (HE)
14.	Embryology of heart and great vessels.		<b>3rd practical assessment</b> Anatomy of the trunk, thorax, mediastinum and heart.	<b>1st practical assessment</b> Histology of circulation, blood smear, haematopoiesis, lymphoid organs and embryology.

## Anatomy, Histology and Embryology II. (+Dissection Practice II. & Histology Practice II.)

<b>Semester:</b>	2nd	<b>Code:</b>	AOK-OAK0241/OAK0251/OAK0261
<b>Course type:</b>	Lecture/Practice/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2/3/2	<b>Department:</b>	Anatomy
<b>Credit:</b>	3/3/2	<b>Form of Exam:</b>	Exam/Term Mark/Term Mark

<b>week</b>	<b>Anatomy II. 90-min lecture/week</b>	<b>Anatomy II. 45-min lecture/week, held on every 2nd week online</b>	<b>Dissection II. topic</b>	<b>Histology II. topic</b>
1.	Anatomy of the upper airways.	Anatomy of the lower airways. Development of the respiratory system.	Summary of mediastinum: divisions and contents. Related cross-sectional anatomy.	<b>Recapitulation.</b>
2.	Anatomy, histology and development of the oral cavity, teeth and tongue.		Nasal cavity, paranasal sinuses, larynx, trachea, lungs and the pleura.	<b>Respiration</b> Trachea (HE) Lung (HE) Lung (orcein+H)
3.	Anatomy, histology and development of the oropharyngeal isthmus, pharynx and esophagus.	Anatomy, histology and development of the large salivary glands.	Cross-sectional anatomy of the nasal cavity, paranasal sinuses, larynx, trachea, lungs	<b>Digestive system</b> Lip (HE) Dorsum of tongue (HE) Circumvallate papilla (HE) Parotid gland (HE) Submandibular gland (HE) Sublingual gland (HE)
4.	Blood supply, lymphatic drainage, innervation and topographical relationships of the abdominal organs.		Muscles of the abdominal wall, rectus sheath. Surface projections of the abdominal organs. Topographic division of the abdominal cavity. Peritoneum, omental bursa.	<i>General structure of the alimentary tract.</i> Esophagus (HE)
5.	Anatomy of the stomach, small and large intestines.	Histology and embryology of the stomach, small and large intestines.	Midsagittal plane section of the head: oral cavity, pharynx, esophagus.	Cardia (HE) Fundus, corpus (HE) Pylorus (HE) Duodenum (HE) Jejunum (HE) Jejunum (HE+PAS) Ileum (HE)
6.	Anatomy, histology and development of the liver, extrahepatic duct system, gall bladder and pancreas.		Stomach. Blood supply to the abdominal organs. Branches of the abdominal aorta. Related cross-sectional anatomy.	Large intestine (HE) Vermiform appendix (HE) Anal canal (HE)
7.	Anatomy of the retro-peritoneum. Anatomy and histology of the urinary system.	Investigation of the alimentary system by means of imaging techniques.	Topography and anatomy of the small and large intestines. Related cross-sectional anatomy.	Liver (HE) Liver (Ag) Liver (Kupffer cells) Gallbladder (HE) Pancreas (HE)

8.	Anatomy of the female genital organs.		Anatomy of the liver, extrahepatic ducts, pancreas and spleen. Anatomy of the hepatic portal vein and the inferior vena cava. Related cross-sectional anatomy.	<b>1st practical assessment</b> Respiratory and digestive systems.
9.	Anatomy of the male genital organs. The sacral parasympathetic system.	Anatomy of the female and male genitalia.	<b>1st practical assessment</b> Respiratory and digestive systems, spleen and abdominal wall.	<b>Urogenital systems</b> Kidney (HE) Ureter (HE) Urinary bladder (HE) Penile urethra (HE)
10.	Development of the urogenital system.		Posterior abdominal wall. Retroperitoneal organs and their surface projections. Anatomy and topography the of kidneys and ureters.	Ovary (HE) Uterine tube (HE) Uterus (HE) Cervix of uterus (HE)
11.	Pelvic connective tissue structures (subperitoneal spaces). The perineum.	Endocrine organs, part 1	Female genital organs. Study of mid-sagittal plane-cut preparations of the female pelvis and perineum. Related cross-sectional anatomy.	Testis-epididymis (HE) Spermatic cord (HE) Seminal vesicle (HE) Prostate (HE) Penis (HE)
12.	Endocrine organs, part 2		Male genital organs. The inguinal canal. Study of mid-sagittal plane-cut preparations of the male pelvis and perineum. Related cross-sectional anatomy.	<b>Endocrine organs</b> Diencephalon (oxytocin IHC) Hypophysis (HE) Pineal gland (HE)
13.	Endocrine organs, part 2	Investigation of uropoietic system by means of imaging techniques.	Female and male perineum, ischioanal fossa, pudendal canal. Related cross-sectional anatomy.	Thyroid gland (HE) Parathyroid gland (HE) Suprarenal gland (HE) Pancreas (HE) Corpus luteum (HE)
14.	Investigation of the female and male genitalia by means of imaging techniques.		<b>2nd practical assessment</b> Urogenital organs, lesser pelvis and perineum.	<b>2nd practical assessment</b> Urogenital and endocrine organs.

## Head, Neck and Neuroanatomy

(Head, Neck and Neuroanatomy - Lecture, Dissection Practice & Histology of the Nervous System and Sense Organs)

**Semester:** 3rd  
**Course type:** Lecture/Practice/Practice  
**Hours/week:** 2/3/2  
**Credit:** 3/3/2

**Code:** AOK-OAK0271/OAK0281/OAK0291  
**Category:** compulsory  
**Department:** Anatomy  
**Form of Exam:** Comprehensive Exam/Term Mark/Term Mark

<b><u>week</u></b>	<b><u>Lecture topic</u></b>	<b><u>Dissection prac. topic</u></b>	<b><u>Histology topic</u></b>
1.	Anatomy and blood supply of the spinal cord. Fine structure of the grey matter and white matter. Rexed's laminae and corresponding nuclei. Arrangement of the spinal cord tracts. Reflex arcs of the spinal cord.	<i>Injury preventive rules and dissecting room regulations.</i>  Cerebral hemispheres: gyri and sulci. Blood supply to the brain, the cerebral arterial circle.	<i>General information, rules and regulations.</i>  Peripheral nerve (longit. & cross sections, HE) Peripheral nerve (longit. & cross sections, Os)
2.	Neuroanatomy and blood supply of the medulla oblongata, pons and mesencephalon. Cranial nerve nuclei and the reticular formation.	Vertebral canal, meninges of the spinal cord and spinal cord preparation. Duplications of the dura mater, meningeal spaces. Cross-sectional anatomy of CNS.	Sensory nerve ending (HE) Sensory nerve ending (Ag) Motor end-plate (AChE) Sensory ganglion (HE) Vegetative ganglion (Ag)
3.	Diencephalon: organization. Thalamus and hypothalamus. Blood supply to the diencephalon.	Structure of the brainstem, the fourth ventricle, rhomboid fossa. Exits of the cranial nerves (from the brainstem and the skull). Cross-sectional anatomy of CNS.	Spinal cord (HE) Spinal cord (myelin staining) Medulla oblongata (Loyez)
4.	Anatomy, histology and synaptology of the cerebellum. Neuroanatomy of the cerebellar movement regulation.  Morphological and functional bases of the regulation of the blood circulation in the brain: the blood-brain barrier and the CSF.	Diencephalon. Lateral and third ventricles. Flechsigs cut. The extreme, external and internal capsules. Basal nuclei (ganglia). Cross-sectional anatomy of CNS.	Diencephalon (oxytocin IHC) Astrocytes (GFAP IHC) Microglia (CD11b IHC)
5.	Neuroanatomy of the cerebral cortex. The 'module concept' in the cerebral cortex architecture. The limbic system incl. the hippocampus.	Cerebellum: topography, parts and blood supply. Cerebellar nuclei. Cerebellar peduncles. Hippocampal formation. Cross-sectional anatomy of CNS.	Cerebellum (HE) Cerebellum (Ag) Hippocampus
6.	Basal forebrain: amygdaloid complex. Basal nuclei: anatomy and their functions in the movement regulation.	<b><u>1st practical assessment</u></b> Macroscopic anatomy of the CNS.	Neocortex (HE) Neocortex (parvalbumin IHC)
7.	Development of the nervous system.	Skull, part 1: Temporal and sphenoid bones. Maxilla and mandible. The cranial base: external and internal surfaces. The facial (frontal) and lateral aspects of the skull.	<b><u>1st practical assessment</u></b> The nervous systems.

8.	The cranial nerves V, VII, VIII, IX, X, XI and XII: ganglia and peripheral branches.	Skull, part 2: Calvaria. Bony nasal and oral cavities. Infratemporal and pterygopalatine fossae.	Meninges. Cranial nerves: ganglia and peripheral branches
9.	Anatomy and histology of the eye. Parts, layers and blood supply of the retina. Accessory visual structures: eyelids, lacrimal apparatus and extraocular muscles.	Muscles of the neck. Cervical triangles. Fascial system of the neck. Masticatory and facial muscles. Related cross-sectional anatomy.	Finger pad (HE) Hairy skin (HE) Lacrimal gland (HE)
10.	Neuroanatomy of the visual pathway. Light reflex of the pupil. Accommodation reflex. Horizontal and vertical gaze control.	Regions of the head and neck; their arterial supply, venous, lymphatic drainage and lymph nodes.	Eye (HE) Eyelid (HE)
11.	Anatomy and histology of the external and middle ears. Anatomy of the inner ear: osseous and membranous labyrinths.	Topography of the orbit. Anatomy of the eye.	Resting mammary gland (HE) Lactating mammary gland (HE)
12.	Organ of Corti. Fine structures of the cristae and maculae. Auditory and vestibular pathways.	Anatomy of the middle and inner ears. Cross-sectional anatomy of the orbit and ears.	Cochlea (HE) Tympanic cavity
13.	Development of the eye and ear.	Cervical plexus. Cervical part of the sympathetic trunk. Organization of the peripheral parasympathetic system in the head. Pterygopalatine fossa. Thyroid gland. Cross-sectional anatomy of neck.	<b><u>2nd practical assessment</u></b>
14.	The branchial apparatus: formation, development and derivatives of the pharyngeal arches, pouches and grooves.	<b><u>2nd practical assessment</u></b> Skull. Regions of the head and neck.	Recapitulation

## Basic Immunopathology

<b>Semester:</b>	4th, 6th, 8th, 10th	<b>Code:</b>	AOK-OASZV171
<b>Course type:</b>	Lecture	<b>Category:</b>	elective
<b>Hours/week:</b>	1	<b>Department:</b>	Institute of Surgical Research
<b>Credit:</b>	1	<b>Form of Exam:</b>	Evaluation(5)

### topic

General informations. Introduction to immunopathology. Transplantation immunology: transplantation antigens, allogeneic recognition, effector mechanisms of graft rejection  
Histocompatibility testing. Immunological investigations before and after transplantation.

Immunological aspects of organ transplantation. Immunology of bone marrow transplantation: graft-versus-host disease. Immunological aspects of xenogeneic transplantation.

Immunosuppressive therapy

Histocompatibility testing. Immunological investigations before and after transplantation.

Reproductive immunology

Tumor immunology: tumor antigens, antitumor immune responses. Evasion of immune responses by tumors. Immunotherapy for tumors

Immunological tolerance. Self tolerance: central and peripheral tolerance. Mechanisms of T and B cell tolerance

Pathomechanisms of autoimmunity: failure of self tolerance, genetic factors, role of infections and other factors; effector mechanisms. Immunological bases of systemic and organ-specific autoimmune diseases

Written test exam

## Basic Life Support

<b>Semester:</b>	1st	<b>Code:</b>	AOK-OAK011
<b>Course type:</b>	Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2	<b>Department:</b>	Emergency Medicine
<b>Credit:</b>	2	<b>Form of Exam:</b>	Term Mark

### Topics:

The course is taught in block form. The exercises will take place on one day in the study period, from 8 am to 5 pm; with an optional practice option in the week before the exam period, for which you must apply individually.

### Lectures:

Location: New Clinical building, Láng Imre room

#### First lecture:

Guidelines of Basic Life Support

Examinations of patients requiring critical care, recognition of critical needs

#### Second lecture:

Basic Life Support in Covid-19

#### Third lecture

Advanced Life Support guidelines, basic care for patients in critical state

### Group practices:

Location: USz Skills Center, date: according to grouping which will be uploaded to the course's Coospace page

Period: from October (each year); see Coospace for details.

## Basic Surgical Skills

<b>Semester:</b>	4th	<b>Code:</b>	AOK-OAK141/AOK-OAK142
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1/2	<b>Department:</b>	Institute of Surgical Research
<b>Credit:</b>	3/-	<b>Form of Exam:</b>	Exam/Signature

**Lecture**

Asepsis and antisepsis. Historical background. Surgical infections, sources of infections. Types, classification, risks and prevention of wound contaminations. Sterilization, disinfection. Preparation of the patient before operation: scrub preparation and isolation of the surgical site. Scrubbing, disinfection, gowning and gloving of the operating team. Personnel attire and movement.

Basic rules of asepsis in the operating room. Postoperative wound management. Surgical antisepsis. Design and equipments of the operating room, basic technical background. Operating room personnel and their duties. Positioning of the patient on the operating table. Positioning.

Surgical instruments. Basic surgical instruments, special surgical tools and technologies, suture materials. Wound closure (sutures, clips, adhesive strips). Imperfections of suturing techniques. Removal of sutures. Drainage.

The operation. Basic surgical interventions. Indications for an operation, informed consent, operative risk, the surgeon's responsibility. Preoperative investigations. Preoperative preparation of the patient. Basics of minimally invasive surgical interventions. Historical background. Components of the laparoscopic tower, laparoscopic instruments. Local anesthesia (drugs, types of local anesthesia, complications). Perioperative fluid balance, fluid requirements and fluid therapy.

Wounds. Types and classification of accidental wounds. Wound healing, scar formation. Surgical wounds. Wound closure and its complications. Management of accidental wounds. Dressings, types of bandages. Innovations in wound treatment.

Bleeding. Types and classification of hemorrhage. Signs and consequences of blood loss. Bleeding in surgery (pre-, intra- and postoperative bleeding). Factors influencing operative blood loss. Surgical hemostasis (mechanical, thermal, chemical-biological methods). Blood replacement in surgery, autotransfusion.

Complications. Definition and classification of complications. Complications of anaesthesia. Complications of wound healing. Complications related to surgery. Haemorrhagic complications. Pathophysiology, signs and treatment of hemorrhagic shock.

Basics of minimally invasive surgical interventions. Historical background. Components of the laparoscopic tower, laparoscopic instruments. Basic procedures, pathophysiological background. Complications.

**Practice**

1. General information. Scrubbing, gowning and gloving. Practical rules of asepsis in the operating room. Behavior and movement in the operating room

2. Basic surgical instruments, suture materials, textiles. Scrubbing, gowning and gloving. Scrub preparation and draping of the surgical site. Making incisions (on skin pad), wound closure with sutures or clips. Practicing instrument knots by means of the Suture Tutor program.

3. Tying surgical knots. Tying surgical knots (hand and instrument knots). Knotting under tension and in cavities.

4. Cleansing and isolation of the operative field.

5. Management of accidental wounds. Dressing, types of dressing. Changing dressing under aseptic conditions. Removal of sutures. Handling surgical bleeding.

6. Basics of minimally invasive surgery. Components of the laparoscopic tower, laparoscopic instruments. Eupractic movements, handling of laparoscopic instruments, knotting.

7. Suturing of tissue under sterile circumstances

8-9. Practical exam. (1) Surgical scrubbing and gowning (2) Knotting under tension and in a deep cavity (3) Surgical suture (mounting of a needle holder, closure of a 5 cm-long incision with Donati-stitches, instrumental knotting.

## Biochemistry I.

**Semester:** 3rd  
**Course type:** Lecture/Practice  
**Hours/week:** 4/2  
**Credit:** 6/-

**Code:** AOK-OAK051/AOK-OAK052  
**Category:** compulsory  
**Department:** Biochemistry  
**Form of Exam:** Exam/Signature

<u>week</u>	<u>Lecture</u>	<u>Practice</u>
1.	Biochemistry of the blood. RBC Biochemistry of the blood. White blood cells	PRACTICE: General information, refresher
2.	Biochemistry of the blood. blood plasma	PRACTICE: Determination of bilirubin.
3.	Biomembranes.	SEMINAR: Blood, membranes
4.	Biochemistry of the muscle	PRACTICE: electrophoresis of serum proteins
5.	Biochemistry of the connective tissue. Adhesive glycoproteins	PRACTICE: ion det. by colorimetry, blood gas analysis
6.	Biochemistry of cell adhesion, cytoskeleton. Biochemistry of liver. First pass metabolism, LFT	PRACTICE: Diagnosis of heart attack and determination of cardiovascular risk factors (chol, TG, lipoproteins)
7.	Biochemistry of liver. Biotransformation. Biochemistry of the nervous tissue. Neurotransmitters.	SEMINAR: (connective tissue, cell adhesion and cytoskeleton, nutrition)
8.	Biochemistry of the nervous tissue. Neurotransmitters. Biochemistry of the nervous tissue. Neurotransmitters.	PRACTICE: Biochemistry of liver Determination of ALAT and ASAT
9.	Biochemistry of the endocrine system.	SEMINAR: liver, muscle, nervous tissue
10.	holiday	PRACTICE: Cholinergic neurotransmission Determination of cholinesterase enzyme activity
11.	Biochemistry of the endocrine system. Regulation of gene expression.	PRACTICE: Cholinergic neurotransmission Determination of cholinesterase enzyme activity
12.	Regulation of gene expression	PRACTICE: determination of blood glucose and HbA1c
13.	Biological signalization, second messenger systems.	PRACTICE: determination of mRNA isoform levels by RT-PCR
14.	Biological signalization, second messenger systems. General principles of biochemical adaptation, limits of adaptation.	SEMINAR: endocrine system, cell signalling

## Biochemistry II.

<b>Semester:</b>	4th	<b>Code:</b>	AOK-OAK053/AOK-OAK054
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	4/2	<b>Department:</b>	Biochemistry
<b>Credit:</b>	6/-	<b>Form of Exam:</b>	Comprehensive Exam/Signature

<b>week</b>	<b>Lecture</b>	<b>Practice</b>
1.	<u>Proteins and bioenergetics</u> : structure and function of proteins, thermodynamics of living systems	General information, work safety, principles of lab work
2.	Enzymology: enzyme classes, coenzymes, characterisation of enzymes, isoenzymes, multienzyme systems	<b>Determination of protein concentration</b>
3.	Enzymology: molecular mechanism of catalysis, enzyme kinetics, modulation and regulation of enzyme activity	Substrate specificity and temperature optimum of amylase enzyme activity
4.	Carbohydrate metabolism: Digestion and absorption of carbohydrates, glycolysis, pyruvate dehydrogenase enzyme complex, gluconeogenesis	<b>SEMINAR (proteins, enzymes)</b>
5.	<u>Carbohydrate metabolism</u> : Fructose and galactose metabolism, glycogen metabolism, pentose phosphate cycle and glucuronide shunt	<b>Assay of activity of alkaline phosphatase</b>
6.	<u>Carbohydrate metabolism</u> : regulation of blood glucose level, glycoproteins <u>Lipid metabolism</u> : Eicosanoids, digestion and absorption of lipids, lipoprotein metabolism	<b>SEMINAR (carbohydrate metabolism)</b>
7.	<u>Lipid metabolism</u> : lipid mobilisation, oxidation of fatty acids, ketone bodies, diabetes mellitus	<b>Determination of glucose-6-phosphatase activity</b>
8.	<u>Lipid metabolism</u> : Synthesis of fatty acids, synthesis of triacyl glycerols and phospholipids, sphingolipids, cholesterol and steroid metabolism	<b>1<sup>st</sup> MTO</b>
9.	<u>Amino acid metabolism</u> : Digestion and absorption of proteins, catabolism of essential amino acids, fate of amino group, urea cycle	SEMINAR (lipid metabolism)
10.	<u>Amino acid metabolism</u> : metabolism of non-essential amino acids, fate of carbon skeleton of amino acids, one-carbon units, glutathione	Determination of triacyl glycerol and cholesterol
11.	<u>Amino acid metabolism</u> : <b>Synthesis of hem and porphyrine, enterohepatic circulation of hem degradation products</b>	SEMINAR (amino acid metabolism)
12.	<u>Citric acid cycle</u> : steps and regulation of the cycle, relationship between the cycle and other metabolic pathways	<b>SEMINAR (citric acid cycle, respiratory chain, oxidative phosphorylation)</b> 2nd MTO
13.	<u>Mitochondrial transport systems, mechanism of respiratory chain and oxidative phosphorylation</u>	<b>Investigation of the oxygen consumption of isolated mitochondria</b>
14.	<u>Nucleotide metabolism</u> : synthesis and degradation of purine and pyrimidine nucleotides, salvage pathways, synthesis of deoxyribonucleotides	Nucleotide metabolism Determination of uric acid concentration

## Cell Biology and Molecular Genetics I.

<b>Semester:</b>	1st	<b>Code:</b>	AOK-OAK151/AOK-OAK152
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2/2	<b>Department:</b>	Medical Biology
<b>Credit:</b>	4/-	<b>Form of Exam:</b>	Exam/Signature

<u>week</u>	<u>Lecture</u>	<u>Practice</u>
1.	Structure and operation of the cell	Handling of technical devices
2.	The DNA	Microscopy-1
3.	Transcription, translation & proteins	Microscopy-2
4.	Mutation & jumping genes	DNA and RNA purification
5.	Bacterial genetics	Genetic exercises
6.	Genetic regulation in eukaryotes	Separation techniques
7.	Mendelian and non-Mendelian genetics	Lac operon & consultation
8.	Epigenetics	
9.	Genes and traits	
10.	Genetic diseases	
11.	Evolution	
12.	Cytoskeleton & membrane processes	
13.	Molecular biology of viruses	
14.	Frontiers of molecular and cell biology	

## Cell Biology and Molecular Genetics II.

<b>Semester:</b>	2nd	<b>Code:</b>	AOK-OAK153/AOK-OAK154
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2/2	<b>Department:</b>	Medical Biology
<b>Credit:</b>	4/-	<b>Form of Exam:</b>	Exam/Signature

<u>week</u>	<u>Lecture</u>	<u>Practice</u>
1.	Human genome	Molecular cloning
2.	Genetically modified organisms & cloning	PCR & DNA sequencing
3.	Cell cycle & tumor formation	Detection of DNA and RNA
4.	Molecular medicine	Detection of proteins
5.	Cell signalling-1	DNA and protein chips, DNA finger printing
6.	Cell-signalling-2	Genetic exercises
7.	Cell communication & tissue differentiation	Reporter genes & consultation

8. Genetic regulation of ontogenesis
9. Neural communication & consciousness
10. Molecular biology of sensation
11. Immunogenetics
12. Molecular evolution
13. Genetics of behaviour
14. Genetic disease of brain and psyche

## Chemical Misconceptions

**Semester:** 2nd-10th  
**Course type:** Lecture  
**Hours/week:** 2  
**Credit:** 2

**Code:** AOK-OASZV411  
**Category:** elective  
**Department:** Medical Chemistry  
**Form of Exam:** Evaluation(5)

### week topic

1. Fear of the Unknown: Chemicals. Life as a Risky Business. Natural Products: a Delusion of Safety.
2. Man-Made Commodities and Safety Issues. The Cholera Pandemonium: the Blind Leading the Blind. Regulating Chemicals: Maybe or Maybe Not.
3. Biowaste: Biotechnology in Perspective. Vedic Wisdom: Lead and Ayurveda. Manipulating Weather: Ocean Fertilization.
4. Test Your Cranberry Pie: Vitamin C and Benzoates. Food Dyes: the Good, the Bad, and the Ugly. To Add or Not to Add? Food Additives.
5. The Organic Vegetable Hype. Fat Matters: Margarine vs. Butter. Fake Food and Kidney Stones.
6. The Coming Shortage: Vanilla and Menthol. Red Alert: Meat Colors. Moldy Business: Whole-Grain Cereals.
7. Sweet Dreams without Sugar: Artificial Sweeteners. Sweet as Birch: Xylitol. The Thickening Stuff: Guar Gum Gumbo.
8. Is Caffeine Free of Risk? Perfect Timing: Egg Cooking. The Biofuel Dilemma.
9. Food Fraud: Then and Now. The Vitamin that Never was: B17. Joint Efforts: Glucosamine and Chondroitin.
10. Is the Use of Cyanogen Bromide Forbidden in Hospitals? Poison in Groundwater: Arsenic. Was Napoleon Murdered with Arsenic?
11. Don't Touch the Spilled Mercury! Was DDT of More Harm Than Use? Could Dioxin be the Most Toxic Substance?
12. The Great Hungarian Red Mud Deluge. The Erin Brockovich Mystery: Chromium Salts. The Fluoride War. Nonsense du jour: Food Babe
13. What Was the Gulf War Syndrome? The Strange Case of Bisphenol A. Is grapefruit a medicinal plant?

## Cytomorphology and Microtechnics

<b>Semester:</b>	1st, 3rd or 5th	<b>Code:</b>	AOK-OAKV211
<b>Course type:</b>	Lecture	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	2	<b>Department:</b>	Cell Biology
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation(5)

### week topic

1. Introduction
2. The cell membrane and primary active transport
3. Secondary active transport and ion channels
4. Receptors and signaling
5. Cell junctions
6. Extracellular matrix
7. The cytoskeleton
8. The endoplasmic reticulum and the Golgi apparatus
9. Vesicular transport
10. Lysosomes and their classes. Peroxisomes
11. The mitochondrion
12. The nucleus and the nucleolus
13. The cell cycle, mitosis, and meiosis

## Fundamentals of Medical Physics

<b>Semester:</b>	1st	<b>Code:</b>	AOK-OASZV191
<b>Course type:</b>	Seminar	<b>Category:</b>	elective
<b>Hours/week:</b>	1 (2 hrs/2 w)	<b>Department:</b>	Medical Physics
<b>Credit:</b>	1	<b>Form of Exam:</b>	Evaluation (5)

### topics

1. **Mathematical foundations.** Normal form of numbers. The SI system of units: base units and prefixes. The use of symbols. Angles. Functions: linear functions, powers, exponential, logarithmic and trigonometric functions. Derivative and integral. Geometry: circumference, area, surface area and volume.
2. **Kinematics and dynamics.** Vectors. Kinematics: uniform motion and circular motion. Dynamics: interactions, Newton's laws, inertial systems, types of forces.
3. **Oscillations.** Fundamental concepts: amplitude, period, frequency, angular frequency. Harmonic oscillations. Damped oscillations. Natural angular frequency. Driven oscillations and resonance.
4. **Waves.** Fundamental concepts: wavelength, (angular) wave number, speed of propagation. Types of waves: longitudinal and transverse. Wave propagation: reflection and refraction (Snell's law). Interference, standing waves. Diffraction. Linear polarisation. Fundamentals of acoustics.

5. **Energy, work.** Kinetic energy. Potential energy: gravitational, elastic. Mechanical energy and its conservation. Power.
6. **Optics.** Reflexion and refraction: dispersion and total internal reflexion. Polarisation. Image formation of mirrors and lenses.
7. **Hydrostatics.** Density. Pressure. Hydrostatic pressure.
8. **Thermodynamics.** Heat and temperature. Temperature scales. Thermal expansion. Heat capacity, specific heat and latent heat. Determination of the thermal equilibrium. The equation of state for an ideal gas. Thermodynamic processes. Equipartition theorem. The first law of thermodynamics.
9. **Electricity.** Stationary charges, electrostatics: Coulomb's law, electric field, electric field lines. Electric potential and voltage. Dipole. Accumulating charges: capacitance, capacitors in series and in parallel. Moving charges, electric current: Ohm's law, resistance and conductance, resistors in series and in parallel, Kirchhoff's laws. Electric power. Direct current and alternating current, capacitors in alternating current circuits.
10. **Magnetism.** Magnetic field and magnetic field vector. Interaction between moving charges (currents) and the magnetic field (Lorentz force). Magnetic properties of matter: permanent magnets, ferro-, para- and diamagnetic substances. Magnetic moment, intrinsic magnetic moment of charged particles (electron and proton spin). Magnetic effects of currents. Electromagnetic induction: magnetic flux, Faraday's law, Lenz's law. Electric motor and electric generator. Self-inductance, inductors in an alternating current circuit.

## Hungarian Language I.

<b>Semester:</b>	1st	<b>Code:</b>	AOK-OAK601
<b>Course type:</b>	Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	4	<b>Department:</b>	Med. Comm. and Translation
<b>Credit:</b>	-	<b>Form of Exam:</b>	Term Mark

### week   topic

1. Introduction. Basic expressions. Vowels, consonants, vowel harmony. The Hungarian alphabet.
2. Definite and indefinite articles. Numbers. Money and measurements.
3. Personal pronouns; to be present tense; the -nak, -nek ending. Nationalities, jobs, adjectives. Greetings, address forms.
4. Usage of the verb van; the -ban, -ben ending; the -n, -on, -en, -ön ending; telling the time. Buildings, places and venues; expressions with the verb van.
5. Revision 1
6. Indefinite conjugation 1 (present tense)
7. the -t ending; yes-no questions.
8. Subjects, food, drinks, vegetables, fruits.
9. Indefinite conjugation 2
10. the -val, -vel ending. Cooked food. Some Hungarian dishes.
11. Revision 2
12. Verb formation; the infinitive -ni and its usage; the -ul, -ül ending; the -lak, -lek ending.
13. Verbs, modal verbs. Festivals, fairs, events.
14. Oral tests

## Hungarian Language II.

<b>Semester:</b>	2nd	<b>Code:</b>	AOK-OAK602
<b>Course type:</b>	Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	4	<b>Department:</b>	Med. Comm. and Translation
<b>Credit:</b>	-	<b>Form of Exam:</b>	Term Mark

### week   topic

1. General revision
2. Conjugation of jönni and menni (present tense); the –ba, -be and –ra, -re endings; the –ból, -ből and –ról, -ről endings.
3. Means of transportation, other words in connection with transportation. Public transport in cities, travelling in Hungary.
4. Revision 3.
5. The possessive endings. Body parts, time expressions (past tense).
6. The verb fáj(t); to be past tense.
7. Past tense (first person singular only, indefinite conjugation)
8. the –kor ending; the –től, -től and the –ig endings.
9. The –s, -os, -as, -es, -ös ending
10. linking words. Word formation. Holidays.
11. Revision 4
12. Question words; ordinal numbers. The house.
13. The –n, -on, -en, -ön ending (meaning on). Rooms and furniture.
14. Oral tests

## Hungarian Language III.

<b>Semester:</b>	3rd	<b>Code:</b>	AOK-OAK603
<b>Course type:</b>	Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	4	<b>Department:</b>	Med. Comm. and Translation
<b>Credit:</b>	-	<b>Form of Exam:</b>	Term Mark

### week   topic

1. General revision
2. Indefinite conjugation (past tense). Postpositions.
3. Usage of postpositions of place and time. Geography.
4. Revision 5
5. The –nál, nél, -hoz, -hez, -höz, -től, -től endings.
6. Jobs, family.
7. Comparative and superlative forms of adjectives. Clothing, colours.
8. The possessive structure; the plural –k ending. Describing what somebody looks like.
9. Verbs
10. Definite conjugation (present tense).
11. Verbal prefixes.

12. Usage of verbal prefixes.
13. Revision 7
14. Oral tests

### Hungarian Language IV.

<b>Semester:</b>	4th	<b>Code:</b>	AOK-OAK604
<b>Course type:</b>	Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	4	<b>Department:</b>	Med. Comm. and Translation
<b>Credit:</b>	-	<b>Form of Exam:</b>	Preliminary Examination

#### week   topic

1. General revision
2. Definite conjugation (past tense). Accusative case of personal pronouns.
3. Telling the date, the weather, the school year
4. Revision 8
5. Body parts, organs, bones
6. Symptoms
7. Health care workers, buildings and places
8. Medicaments
9. Expressions of time
10. Question words
11. Doctor's instruction
12. Parts of the medical history
13. Pain, at the doctor's, at the dentist's, at the pharmacy
14. Practising role-play
15. Practising role-play

### Immunology

<b>Semester:</b>	4th	<b>Code:</b>	AOK-OAK061
<b>Course type:</b>	Lecture	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2	<b>Department:</b>	Immunology
<b>Credit:</b>	2	<b>Form of Exam:</b>	Exam

#### week   topic

1. The structure and working principle of the immune system. Central and peripheral lymphoid organs. (Definition of antigen, epitope, hapten, pathogen)
2. Characteristics of innate immunity. The relationship between innate and adaptive immunity.
3. Complement system. Cell types and mediators involved in inflammation and acute phase response.
4. The structure of MHC molecules, polymorphism. Antigen presentation. Development of T and B cells.

5. Antigen recognition function of T lymphocytes. The T cell mediated immune response. T cell types, their effector functions.
6. B lymphocytes. B cell activation, antigen-dependent differentiation of B cells. The structure of antibodies, antibody-mediated effector functions.
7. TEST FOR RECOMMENDED GRADE (1. MTO)
8. Immune responses against extracellular pathogens. Immune responses against intracellular pathogens. Immunescape. Immunological memory. Vaccination.
9. Autoimmunity. Peripheral and central immune tolerance.
10. Types and characteristics of hypersensitivity reactions. Allergic reactions.
11. Transplantation, pregnancy immunology, immunodeficiency pathology.
12. 2. TEST FOR RECOMMENDED GRADE (2. MTO)
13. Tumor immunology. Immunotherapies and their role in tumor therapy.
14. Basic immunology methods. Monoclonal antibodies, Immunodiagnostics.

## Introduction to Medicine

<b>Semester:</b>	1st	<b>Code:</b>	AOK-OAK041/AOK-OAK042
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1/1	<b>Department:</b>	Behavioural Sciences
<b>Credit:</b>	2/-	<b>Form of Exam:</b>	Evaluation(5)/Signature

### week    topic (lectures)

1. Introduction
2. Modern concept of health and illness
3. What influences health?
4. Community diagnosis and descriptive epidemiology
5. Analytic epidemiology, concept of risk
6. Prevention, screening
7. Health promotion, behavioral medicine, stress management
8. History of Medicine I. Earliest medicine, antique times
9. History of Medicine II. Medicine in middle ages, Renaissance, Enlightenment
10. History of Medicine III. Science and technology in the 19th-20th centuries
11. Medical Ethics I. Basic principles of bioethics
12. Medical Ethics II. Medical profession and the Hippocratic oath
13. Medical Ethics III. Ethics, morality and ethical theories

### topic (practices)

Introduction I-II.

Health and illness I-II.

What influences health? Stress and lifestyle I-II.

Epidemiology I-II.

Prevention and health promotion I-II.

Basic principles and practice of medical ethics I-II.

Consultation

## Introduction to Psychology, Communication

<b>Semester:</b>	2nd	<b>Code:</b>	AOK-OAK131/AOK-OAK132
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1(total 7)/2(total 14)	<b>Department:</b>	Behavioural Sciences
<b>Credit:</b>	1/-	<b>Form of Exam:</b>	Evaluation(5)/Signature

<u>week</u>	<u>Lecture</u>	<u>Practice</u>
1.	Scope of psychology. Contemporary themes, perspectives of psychology	Levels and elements of the communication process
2.	Sensation, perception, top-down processes /Attention and memory	Factors that influence communication
3.	Intelligence, Memory	Verbal and nonverbal communication
4.	Personality theories I.	CLASS-model: setting up the context
5.	Personality theories II.	Situational exercises I.
6.	The psychology of social interactions	Situational exercises II.
7.	Motivation. Emotions /Attitudes and cognitive dissonance	Consultation

## Latin Based Medical Terminology I.

<b>Semester:</b>	1st	<b>Code:</b>	AOK-OAK071
<b>Course type:</b>	Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2	<b>Department:</b>	Med. Comm. and Translation
<b>Credit:</b>	-	<b>Form of Exam:</b>	Signature

### week   topic

- General course description. Basic information about the typical issues of the language. Phonological aspects of the language, writing and pronunciation. The general features of the Latin noun (number, case and gender).
- Major rules of the declensions. The dictionary forms of the Latin nouns in all declensions. General features of different medical texts. General information about medical phrases containing Greek elements. Anatomical terminology: the body parts
- Latin words and Greek elements used parallel in medical terminology. Translation of possessive phrases with the usage of dictionary forms (the usage of sing. nom. and sing. gen.). Anatomical terminology: the skeletal system

4. Typical endings of the dictionary forms and irregularities of the usages. Construction of possessive phrases in all declensions with multiple elements. Anatomical terminology: the muscular system
5. Irregularities of the declensions. The typical endings of the third declension. Usage of the pluralis nominativus in all declensions. Greek elements of diseases.
6. Usage of the pluralis genitivus in all declensions. Translating and constructing possessive phrases in plural with multiple elements. The special usage of the third declension. Practising for the midterm test. Anatomical words.
7. Midterm test.
8. Basic information about the adjectives. Dictionary form and usage of the 3 ending adjectives. Translation and construction of adjective phrases with the usage of the agreement rule in the singular. Anatomical terminology: the arteries and veins
9. General information about the 2 ending adjectives. Irregularities of the 2 ending adjectives. Construction of phrases with 1 and 2 ending adjectives. Anatomical terminology: the respiratory system
10. The practice of adjective phrases and combining them with possessive structures. Translating and constructing adjective phrases in the plural.
11. Constructive complex phrases with the combination of adjective and possessive phrases.
12. Translational practices (diagnoses, processes, diseases and reports)
13. Exercise and summary. Overview of the trial test for the final.
14. Final exam

## Latin Based Medical Terminology II.

<b>Semester:</b>	2nd	<b>Code:</b>	AOK-OAK072
<b>Course type:</b>	Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2	<b>Department:</b>	Med. Comm. and Translation
<b>Credit:</b>	-	<b>Form of Exam:</b>	Signature

### week   topic

1. General course description. Repetition: Usage of the I-II and III. declension adjectives. Practice of the rule of agreement. Basic features of the Greek elements in Medical Latin and elements connecting to the abdominal organs and upper body. Anatomical terminology: the heart
2. Repetition: Constructing complex phrases with adjective and possessive phrases. Translation of basic diagnoses. Basic features of the Greek elements in Medical Latin. and elements connecting to genitals and general expressions. Anatomical terminology: the digestive system
3. General features of the accusative case. Usage of prepositions with accusative. Usage of the neutral rule of the Latin nouns.
4. Constructing complex phrases with prepositions, translating medical reports with prepositions with accusative. Greek and Latin elements about general clinical terms.

5. General features of the ablative case. Usage of prepositions with ablative. Different roots of the third declension, the appearance of the "i" root. Construction and translation of phrases combining ablatives and accusative case prepositions. Practice of Greek and Latin elements.
6. Exercise and summary. Completion and discussion of a sample test.
7. Midterm test.
8. General features of the Latin numerals. Practice of phrases with the usage of Latin ordinals and cardinals. Translation and construction of adjective phrases with the usage of the agreement rule in the singular. Anatomical terminology: the reproductive system
9. Basic information about the prescriptions. Construction of basic prescriptions and terms of basic materials. Anatomical terminology: the urinary system
10. Construction and translation of complex prescriptions. Typical abbreviations, pharmaceutical phrases, and clinical terms of prescriptions. Translation of different short prescriptions. Anatomical terminology: the endocrine system
11. Construction of complex prescriptions. Basic information about medical reports. Translation of medical reports and improvement of Latin reading skills.
12. Translational practices (diagnoses, processes, diseases, and reports)
13. Exercise and summary. Overview of the trial test for the final. Practice of the grammatical basics. Practice of the Greek and Latin elements of medical Latin.
14. Final exam.

### Measurements in medical physics I.

<b>Semester:</b>	1st	<b>Code:</b>	AOK-OAK103
<b>Course type:</b>	Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1 (2 hrs/2 w)	<b>Department:</b>	Medical Physics
<b>Credit:</b>	1	<b>Form of Exam:</b>	Term mark

#### topic

Occupational health and fire safety training

Anthropometric measurements. Fundamental aspects of measurements: derived quantities, measurement error

Sound as a mechanical wave

Optics of the eye

Blood pressure measurement principles and their application

Analysis of blood pressure data

Practical skills test

### Measurements in medical physics II.

<b>Semester:</b>	2nd	<b>Code:</b>	AOK-OAK106
<b>Course type:</b>	Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1 (2 hrs/2 w)	<b>Department:</b>	Medical Physics
<b>Credit:</b>	1	<b>Form of Exam:</b>	Term mark

**topic**

Occupational health and fire safety training

Electrocardiography

The physical principles of spectroscopy

Introduction to nuclear medicine

Measurements with ultrasound

Tomographic image reconstruction

Practical skills test

**Medical Anthropology**

<b>Semester:</b>	4th	<b>Code:</b>	AOK-OAK081
<b>Course type:</b>	Seminar	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2 (14 hrs total)	<b>Department:</b>	Behavioural Sciences
<b>Credit:</b>	1	<b>Form of Exam:</b>	Evaluation(5)

**week topic**

1. Introduction to cultural and medical anthropology
2. Cultural anthropology of anatomy and physiology (lay beliefs)
3. Medical anthropology of stress and stress-related disease
4. Medical anthropology of pain and nutrition
5. Medical anthropology of sexuality and gynecology
6. Cultural aspects of health care
7. Medical anthropology of death and dying

**Basics of Medical Chemistry**

<b>Semester:</b>	1st	<b>Code:</b>	AOK-OAKV143/AOK-OAKV144
<b>Course type:</b>	Lecture/Seminar	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	2/3	<b>Department:</b>	Medical Chemistry
<b>Credit:</b>	2/-	<b>Form of Exam:</b>	Evaluation(5)/Signature

**week Lecture****Practice**

- |    |   |  |
|----|---|--|
| 1. | Basic terms. Structure of atoms. The periodic table and periodic properties.                        | Important terms: atomic mass, molar mass, moles, chemical formulas, chemical reactions, stoichiometry. |
| 2. | Strong chemical bonds: covalent and ionic bonds.  | Atomic models, electronic configuration of atoms. The periodic table.                                  |
| 3. | Intermolecular forces: hydrogen bonding and van der Waals forces (dipole-dipole and London forces). | Strong chemical bonds. Lewis structures.   |
| 4. | Bioinorganic chemistry.   | Intermolecular forces.   |

5.	States of matter. Homogenous and heterogeneous systems. Colloids.	The most important elements and compounds. Nomenclature of inorganic compounds.
6.	Solutions.	Metathesis reactions. Colloids.
7.	Chemical equilibrium. Electrolytes. Acid-base concepts.	Calculations involving the composition of solutions.
8.	Equilibrium in electrolytes, pH, and pOH. Acid-base ionization equilibrium.	Chemical equilibrium. Acid-base concepts.
9.	Acid-base titration. Buffers.	The pH concept, pH calculations.
10.	Electrochemistry. Oxidation-reduction reactions. Voltaic cells.	Acid-base titration problems. Buffers. Calculations involving buffers.
11.	Reaction kinetics.	Redox reactions and voltaic cells.
12.	Thermodynamics.	Basic terms of thermodynamics and reaction kinetics.
13.	General principles of organic chemistry: basic terms, classification, and functional groups.	Organic compounds: formulas, functional groups.
14.	General principles of organic chemistry: nomenclature, types, and mechanism of reactions.	Naming and reactions of organic compounds.

## Medical Chemistry

**Semester:** 2nd  
**Course type:** Lecture/Practice  
**Hours/week:** 3/3  
**Credit:** 8/-

**Code:** AOK-OAK1131/AOK-OAK1141  
**Category:** compulsory  
**Department:** Medical Chemistry  
**Form of Exam:** Exam/Signature

### week   Lecture

### Practice

1.	Hydrocarbons: alkanes, alkenes, alkynes, and aromatic hydrocarbons. Alkyl halides.	Seminar: Formula drawing and nomenclature of hydrocarbons and alkyl halides. Practice: Review of requirements. Fire and safety precautions. The principle of photometry.
2.	Hydroxyl group-containing organic compounds. Thiols and thioethers.	Seminar: Isomerism and chemical reactions of hydrocarbons and alkyl halides. Practice: Volumetric analysis. Using a pipette and a burette and pH measurement. Acid-base titration.
3.	Amines.	Seminar: Hydroxyl group-containing organic compounds, thiols, and thioethers Practice: Graded practice
4.	Oxo compounds.	Seminar: Amines Practice: Graded practice
5.	Chirality, optical isomerism.	Seminar: Oxo compounds Practice: Graded practice
6.	Carboxylic acids and substituted carboxylic acids.	Seminar: Chirality, optical isomerism Practice: Modeling of chirality

7.	Carboxylic acid derivatives.	Seminar: Carboxylic acids and substituted carboxylic acid Practice: Graded practice
8.	Heterocyclic compounds.	Seminar: Carboxylic acid derivatives. Lipids Practice: Graded practice
9.	Amino acids.	Seminar: Heterocyclic compounds Practice: Graded practice
10.	Peptides and proteins.	Seminar: Amino acids Practice: Graded practice
11.	Monosaccharides.	Seminar: Peptides and proteins Practice: Graded practice
12.	Di-, oligo-, and polysaccharides.	Seminar: Monosaccharides Practice: Examination of some important functional groups
13.	Steroids. Nucleic acids.	Seminar: Di-, oligo-, and polysaccharides Practice: Make-up laboratory practice

### Medical Hungarian Language I.

<b>Semester:</b>	2nd	<b>Code:</b>	AOK-OASZV711
<b>Course type:</b>	Practice	<b>Category:</b>	elective
<b>Hours/week:</b>	1	<b>Department:</b>	Med. Comm. and Translation
<b>Credit:</b>	1	<b>Form of Exam:</b>	Term mark

#### topic

Communication-centered revision and practice of topics learnt in general Hungarian lessons with minor extensions to specialize for medical communication:

greetings,

numbers,

questions regarding personal data,

adjectives describing physical condition,

healthy food and drink,

body parts, possessives, common complaints,

directions inside a building (hospital).

### Medical Physics I.

<b>Semester:</b>	1st	<b>Code:</b>	AOK-OAK101/OAK102
<b>Course type:</b>	Lecture/Seminar	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1/1 (2 hrs/2 w each)	<b>Department:</b>	Medical Physics
<b>Credit:</b>	2/-	<b>Form of Exam:</b>	Exam/Signature

**Medical physics I. lecture**

**Biomechanics. Muscle function.** Deformations, elasticity, viscoelasticity. Biomechanics of muscle function: relationships between muscle length and tension; force, velocity and power in skeletal muscles. A mechanical model of skeletal muscles. Surface forces in biomaterials: surface tension, wall tension in hollow bodies.

**Fundamentals of the senses: hearing.** Reflexion and refraction of sound at boundaries between media; acoustic resistance; Doppler effect; sound level; subjective loudness. Frequency dependence of human hearing. The role and function of the outer, middle and inner ear.

**Fundamentals of the senses: vision.** Reduced eye model, accommodation, adaptation, molecular mechanisms of vision, colour vision. Vision defects; the limits of visual acuity.

**Flow of fluids.** Equation of continuity, Bernoulli's law. Laminar and turbulent flow; Reynolds number. Viscosity of fluids: Newton's law of friction, the viscosity of blood, Hagen–Poiseuille law.

**Diffusion and other transport processes.** Fick's laws. Transport across membranes. Osmosis: Starling equilibrium.

**Thermodynamics.** Heat balance of the human body. Basal metabolic rate. Newton's law of cooling.

**Signal analysis.** Analogue and digital signals. Digitisation. Shannon's sampling theorem. Aliasing. Spectral analysis: the Fourier transform.

**Medical physics I. seminar**

Biomechanics.

Oscillations and waves. Hearing

Optics. Vision.

Flow of fluids.

Thermodynamics.

Consultation.

**Medical Physics II.**

<b>Semester:</b>	2nd	<b>Code:</b>	AOK-OAK104/OAK105
<b>Course type:</b>	Lecture/Seminar	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2/1 (2 hrs/1 w)	<b>Department:</b>	Medical Physics
<b>Credit:</b>	3/-	<b>Form of Exam:</b>	Exam/Signature

**Medical physics II. lecture**

Electricity, magnetism and electromagnetism.

Bioelectric phenomena.

Quantum physical phenomena in life sciences.

Spectroscopy and laboratory medicine

Principles of lasers. Medical applications of lasers.

Microscopy (optical-, scanning-, electron-). Mass spectrometry.

X-rays: general properties, use in diagnostics. Absorption of X-radiation. Producing X-rays, interaction with living substances.

Nuclear physics. Radioactivity. Nuclear radiation, dosimetry.

Practical application of radioactive isotopes. Particle accelerators in medical practice.

Medical imaging techniques: ultrasound, CT, MRI/NMR, PET, infrared diagnostics.

Physical basis of therapeutic methods: laser-, light, radio- and heat therapy; therapeutic use of electricity.

Molecular and cellular diagnostics: sedimentation, electrophoretic methods, flow cytometry

**Medical physics II. seminar**

Electricity, magnetism.

Bioelectricity.

The electromagnetic spectrum. Spectroscopy. Lasers.

X-rays.

Nuclear physics; radioactivity.

Consultation.

**Medical physics remedial course**

<b>Semester:</b>	2nd	<b>Code:</b>	AOK-OASZV551
<b>Course type:</b>	Seminar	<b>Category:</b>	elective
<b>Hours/week:</b>	1	<b>Department:</b>	Medical Physics
<b>Credit:</b>	1	<b>Form of Exam:</b>	Evaluation (5)

**topics**

Orientation

Sample examination test

Electricity, magnetism

Bioelectricity

Spectroscopy

Lasers

Microscopy

X-ray physics

Nuclear physics

Nuclear medicine

Imaging methods

Therapeutic methods

Sample examination test

**Medical Physiology I.**

<b>Semester:</b>	3rd	<b>Code:</b>	AOK-OAK091/AOK-OAK092
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	4/4	<b>Department:</b>	Physiology
<b>Credit:</b>	8/-	<b>Form of Exam:</b>	Exam/Signature

**Lecture**

Membrane physiology: membrane transport, signalling systems, cellular electrophysiology

Nerve and muscle physiology: primary sensory neurons, autonomic nervous system, motor neurons, striated muscle and smooth muscle.

Blood physiology: fluid compartments, blood plasma, erythropoiesis and degradation of red blood cells, ABO and Rh blood groups

Respiratory physiology: ventilation, gas exchange, regulation

**Practice**Introduction to Physiology labs  
Membrane electrophysiology

Electromyography (EMG)

Blood tests: haematocrit, haemoglobin concentration, cell counts, ABO/Rh blood groups  
Blood tests: hemostasis

Human spirometry

Cardiovascular physiology: the cardiac cycle, cellular electrophysiology and ECG, hemodynamics, the microcirculation, autonomic and hormonal regulation of the systemic and local circulation.

Circulation: Cardiac cycle  
Circulation: ECG  
Circulation: Hemodynamics

Renal physiology

Renal clearance of test substances

## Medical Physiology (Seminar) I.

<b>Semester:</b>	3rd	<b>Code:</b>	AOK-OAKV263
<b>Course type:</b>	Seminar	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	2	<b>Department:</b>	Physiology
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation(5)

### description

The course serves to discuss the study material lectured on the Medical Physiology I. course, in an interactive small study group environment. In this semester, the discussed topics include nerve and muscle physiology, blood, respiration, cardiovascular and renal function.

## Medical Physiology II.

<b>Semester:</b>	4th	<b>Code:</b>	AOK-OAK093/AOK-OAK094
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	6/4	<b>Department:</b>	Physiology
<b>Credit:</b>	10/-	<b>Form of Exam:</b>	Comprehensive Exam/Signature

### Lecture

Physiology of the gastrointestinal tract

Metabolism and nutrition.

Endocrine systems: hypophysis, thyroid gland, adrenal gland endocrine pancreas

Integrative physiology: regulation of energy metabolism, osmoregulation, volume regulation, potassium, calcium, pH homeostasis, Thermoregulation.

Sports physiology

Reproductive physiology: sexual function, physiology of pregnancy, parturition, growth and development.

CNS physiology: introduction, the cerebral circulation

Sensory systems: somatosensory system, pain, vision, hearing, olfaction and taste:

### Practice

Urine tests.

Gastrointestinal tract: study of digestion and nutrition.

Endocrinology: Oral glucose tolerance test, pregnancy test

pH regulation, evaluation of arterial blood gas

Study of cardiovascular adaptation to physical exercise.

Study of human EEG, mini mental test

Study of the cerebral circulation

Tests of somatosensory systems  
Test of hearing  
Tests of vision

Motor systems: spinal, brainstem, cortical integration of motor functions. The vestibular system. The role of the cerebellum and the basal ganglia in motor functions.

Study of human motor functions

Sleep/wake cycle, the EEG. Circadian rhythms.

Cognitive tests and study of sleep-wake cycling

Physiology of emotions, motivation, reward and punishment.

Physiology of learning and memory. Physiology of speech

## Medical Physiology (Seminar) II.

<b>Semester:</b>	4th	<b>Code:</b>	AOK-OAKV264
<b>Course type:</b>	Seminar	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	2	<b>Department:</b>	Physiology
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation(5)

### description

The course serves to discuss the study material lectured on the Medical Physiology II. course, in an interactive small study group environment. In this semester, the discussed topics include gastrointestinal physiology, metabolism and nutrition, thermoregulation, homeostasis of inorganic substances, sports physiology, reproductive physiology, special senses and the central nervous system.

## Medical Sociology

<b>Semester:</b>	3rd	<b>Code:</b>	AOK-OAK121
<b>Course type:</b>	Seminar	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2	<b>Department:</b>	Public Health
<b>Credit:</b>	2	<b>Form of Exam:</b>	Exam

### week topic

1. Description of requirements. Sociology in the medical curriculum.
2. How to study the society?
3. Where sociology and medicine meets.
4. Doctors as professionals. Becoming a doctor.
5. Doctors and patients. Health experience.
6. The society we live in.
7. How does society affect our health?
8. Sociopoly
9. Poverty around us.
10. Who is disabled? The individual or the society?
11. The power of social stigma.
12. Rule breakers.
13. Our little family.
14. Consultation.

## Medical Statistics

<b>Semester:</b>	2nd	<b>Code:</b>	AOK-OAK108
<b>Course type:</b>	Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2	<b>Department:</b>	Medical Physics
<b>Credit:</b>	2	<b>Form of Exam:</b>	Term Mark

### **Week Practice**

1. Types of data, their characterization, and visualization. Definitions of continuous and discrete variables and characterization of their distributions
2. Basics of probability: Probability; Discrete probability variables and their distribution, expected value, and variance; Discrete distributions, binomial distribution.
3. Odds and odds ratios  
95% confidence interval for the odds ratio, practical examples.
4. Measurements of diagnostic tests. Diagnostic tests and their measurements  
Sensitivity, specificity, PPV, NPV and diagnostic accuracy
5. The normal distribution. Standardization. The binomial test. Confidence intervals for the population mean.
6. 1st MTO.
7. T-tests (one-sample, paired, Student and Welch two-sample t-test)
8. Analysis of variance (principle of one-way ANOVA, F-test, pairwise comparisons)
9. Correlation and linear regression analysis
10. The chi-squared test for independence (assumptions, Fisher exact test)
11. Measure of agreement; 2x2 tables in epidemiology (Cohen-Kappa, relative risk)
12. Survival analysis (Life tables; Kaplan-Meier product limit; log-rank test)
13. 2nd MTO
14. Nonparametric methods; Wilcoxon rank test; Mann-Whitney test; Kruskal-Wallis test; Rank correlation; Summary

## Molecular Medicine

<b>Semester:</b>	5th	<b>Code:</b>	AOK-OAKV451
<b>Course type:</b>	Lecture	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	2	<b>Department:</b>	Cell Biology
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation(5)

### **week topic**

1. Introduction
2. Gene therapies
3. Next generation sequences
4. Tumor diagnostic
5. Immunological methods
6. Apoptosis

7. Intracellular signaling and gene expression
8. RNA based therapy
9. Stem cell and stem cell based therapies
10. Lipidomics
11. Stem cell based regenerative medicine
12. Biomarkers

## Terminologie

<b>Semester:</b>	3rd	<b>Code:</b>	AOK-ONKV691
<b>Course type:</b>	Practice	<b>Category:</b>	elective
<b>Hours/week:</b>	2	<b>Department:</b>	Med. Comm. and Translation
<b>Credit:</b>	1	<b>Form of Exam:</b>	Signature

### topic

Linguistic basics of medical terminology

The human body

The musculoskeletal system

Cardiovascular system: heart, blood circulation, cardiology, angiology

Blood, blood formation, hematology

Lymphatic and immune system

Respiratory system, respiratory system, thorax, pneumonology

Gastrointestinal system, digestive system, abdomen, gastroenterology

Endocrine system, hormonal system, endocrinology

Urinary organs, urology

Female genitalia, gynecology, obstetrics, neonatology

Male genitalia, andrology

Nervous system, neurology

Written exam

## PRECLINICAL MODULE SYLLABUS

### Advanced Surgical Skills

<b>Semester:</b>	5th, 7th, 9th	<b>Code:</b>	AOK-OAKV351/AOK-OAKV352
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	1/1	<b>Department:</b>	Institute of Surgical Research
<b>Credit:</b>	2/-	<b>Form of Exam:</b>	Evaluation(5)/Signature

#### Lecture

Surgical asepsis and basic surgical techniques (recap)

Minor surgical procedures. Incisions, excisions, biopsies, local anaesthesia. Minor surgical procedures: Principles of ambulatory surgery, sterility, surgical instrumentation. Possibilities of incisions and excisions. Biopsy techniques, indications. Basics of local anaesthesia (anaesthetics, types of anaesthesia, complications).

Basics of abdominal surgery, incisions, laparotomy. Principles, and indications of laparotomy, risks and complications. Closure of laparotomy.

Advanced surgical techniques: enterotomy, bowel- and vessel anastomoses. Advanced surgical suturing techniques. Definition, characteristics, indications methods and possible complications of enterotomy. Indications and methods vessel anastomoses.

Advanced laparoscopic procedures. Types of laparoscopic surgery. Consequences of pneumoperitoneum (pathophysiological aspects, complications). LC appendectomy, cholecystectomy. Conicotomy, tracheostomy. Principles, indications of tracheostomy and conicotomy, risks and responsibility.

Basics of thoracic and cardiac surgery. Historical background. Technical principles. Instruments. Pathophysiological aspects, complications.

Basics of microsurgery. Indications, tools and suturing basics of microsurgery.

#### Practice (6 x 2 hours)

Scrubbing. Basic knotting and suturing techniques. (2 hours) (Surgical theatre)

The Minor Skin Procedures Local anaesthesia. Ellipse excision of skin. Removal of encapsulated structures (cysts, tumors). Incision of abscesses. (2 hours) (Surgical theatre)

Advanced suturing techniques. Enterotomy. Intestinal and vessel anastomosis. (2 hours) (Surgical theatre)

Minimally invasive surgery. (2 hours) (Surgical theatre)

Laparoscopy: repetition practice. Basics of microsurgery: microsurgical instruments and basic microsurgical techniques (2 hours) (Surgical theatre, Microsurgery)

Advanced forms of surgical hemostasis and suturing techniques on a large animal model. Tracheostomy. Laparotomy. (4 hours) (Surgical theatre)

## Basic Principles of Internal Medicine

<b>Semester:</b>	5th	<b>Code:</b>	AOK-OAK181/AOK-OAK82
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2/2	<b>Department:</b>	Internal Medicine
<b>Credit:</b>	4/-	<b>Form of Exam:</b>	Exam/Signature

<b>week</b>	<b>Lecture</b>	<b>Practice</b>
1.	Case history, documentation	Practical aspects of history taking and documentation.
2.	Inspection, palpation	The role of inspection in the physical diagnosis. What can be determined by inspection? Palpation of different organs.
3.	Fever, pulse, blood pressure, evaluation of the periferic vessels	Determination of the body temperature, the measurement of the blood pressure, evaluation techniques of the periferial vessels.
4.	Physical examination of the chest and the lungs.	Inspection, palpation, percussion and auscultation of the chest.
5.	Heart sounds, murmurs, physical findings in heart diseases	Physical examination (Inspection, palpation, percussion and auscultation) of the heart.
6.	Electrocardiography, clinical presentation of left and right ventricular failure	Technical implementation of electrocardiography (ECG). The normal ECG.
7.	Imaging techniques in cardiology	Basics of imaging techniques in cardiology (echocardiograpgy, CT, MRI, coronary angiography)
8.	Physical examination of the musculoskeletal system	Physical examination of the musculoskeletal system
9.	Physical signs of endocrine disorders	Physial examination of patients with endocrine disorders.
10.	Physical examination of the abdomen, acute abdomen, abdominal sonography	Physical examination (inspection, palpation, percussion and auscultation) of the abdomen. Principles of adbominal sonography.
11.	Physical examination in neurology	Neurological examination of the patients.
12.	Physical and laboratory investigation in clinical haematology	Evaluation of patients with hematological diseases. Phsical
13.	Introduction to gastrointestinal endoscopy and function testing	The principles of gastrointestinal endoscopy and tests of the gastrointestinal function.
14.	Facultative consultation	Evaliation of a patient (history taking and complete physical examination)

## Biochemical Basics of Preventive Medicine

<b>Semester:</b>	4th	<b>Code:</b>	AOK-OAKV051
<b>Course type:</b>	Lecture	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	2	<b>Department:</b>	Biochemistry
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation(5)

### week   topic

1. Introduction to preventive medicine (importance of nutrition, physical activity and stress in the development of „civilization diseases“)
2. Biochemistry of oxidative stress and its importance in physiological and pathological processes (formation of free radicals and their effects)
3. Antioxidant mechanisms (vitamins, vitaminlike substances, enzymes and their cofactors involved in antioxidant protection)
4. Stress adaptation of the heart (early and late preconditioning)
5. General importance of balanced nutrition (macro- and micronutrients, alimentary fibers; additives)
6. Pathobiochemistry of atherosclerosis and possibilities of prevention
7. Role of oxidative stress in respiratory diseases
8. Role of free radicals and antioxidant protective mechanisms in physiological and pathological brain function
9. Background and prevention of obesity, metabolic syndrome and diabetes mellitus
10. Altered requirements for nutrients in physiological and pathological conditions; diets (theory and practice)
11. Sport biochemistry: general importance of physical activity (oxidative stress and role of antioxidants; changes in blood plasma parameters)
12. Psychological stress, oxidative stress, and importance of stress management
13. Biochemical basics of preventive medicine in the light of the most recent medical literature (interactive seminar and test)
14. Biochemical basics of preventive medicine in the light of the most recent medical literature (interactive seminar and test)

## Cardiac Electrophysiology as a Basic Property of Cardiac Function

<b>Semester:</b>	4th or 6th	<b>Code:</b>	AOK-OAKV581/OAKV582
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	1/1	<b>Department:</b>	Pharmacology
<b>Credit:</b>	2/-	<b>Form of Exam:</b>	Evaluation(5)/Signature

### week   topic

1. Introduction.
2. Basic principles of electrophysiology, the impulse propagation in the heart I.
3. Basic principles of electrophysiology, the impulse propagation in the heart II.
4. The action potential of myocytes and the ionic channels determining the action potential I.
5. The action potential of myocytes and the ionic channels determining the action potential II.
6. Methods and techniques in cardiac electrophysiology.
7. Electro-mechanical coupling in the heart I.
8. Genetic background of ion-channel disturbances in the heart.

9. Electro-mechanical coupling in the heart II.
10. The mechanism of developing cardiac arrhythmias
11. Electrophysiological changes after the disturbances in blood supply to the myocardium.
12. Experimental methods and clinical relevance to investigate cardiac arrhythmias.
13. Investigational techniques in cardiac cellular electrophysiology
14. Practical and consultation

## Cerebral Blood Flow and Metabolism

<b>Semester:</b>	5th	<b>Code:</b>	AOK-OASZV301
<b>Course type:</b>	Lecture	<b>Category:</b>	elective
<b>Hours/week:</b>	2	<b>Department:</b>	Cell Biology
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation(5)

### topic

The blood-brain barrier

The cerebral metabolism

Regulation of cerebrovascular tone: endothelial mechanism

Regulation of cerebrovascular tone: nervous innervation

Regulation of cerebrovascular tone: cerebrovascular smooth muscle cells

Regulation of cerebrovascular tone: neurovascular coupling

Cerebral blood flow in the neonatal brain

The impairment of cerebral blood flow: aging

The impairment of cerebral blood flow: stroke

Principles of clinical neuroimaging

The impairment of cerebral blood flow: dementia, small vessel disease

## Gerontology

<b>Semester:</b>	6th	<b>Code:</b>	AOK-OAKV321/OAKV322
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	1/1	<b>Department:</b>	Behavioural Sciences
<b>Credit:</b>	2/-	<b>Form of Exam:</b>	Evaluation(5)/Signature

### week topic (Lecture/Practice)

1. General principles of geriatric medicine
2. History taking with elderly patients
3. Physical examination
4. Mental status examination

5. Evaluation of functional capacity in him elderly
6. Laboratory examination
7. Progressive constriction of each organ systems
8. Intellectual impairment
9. Immobility
10. Iatrogenic drug reactions
11. Community of care
12. Quality of life and therapeutic objectives
13. Legal and ethical issues
14. Care of the dying patient

### Foundations of Evidence Based Medicine

<b>Semester:</b>	8th or 10th	<b>Code:</b>	AOK-OAKV181
<b>Course type:</b>	Lecture	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	2	<b>Department:</b>	Public Health
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation(5)

#### topic

Introduction of the course. Study requirements.

Evidence-based medicine/healthcare: concepts, steps in practicing EBM. Types of epidemiologic studies.

Interventional studies, clinical trials (RCT).

Asking structured questions (PICO), classification of clinical questions. The hierarchy of evidence.

Translational medicine: from basic research to clinical practice.

Search the evidence – theoretical and practical knowledge.

Critical appraisal process – theoretical and practical knowledge.

Grading quality of evidence and strength of recommendations, GRADE approach.

Development of evidence-based practice guidelines.

Implementation of practice guidelines in clinical practice and prevention.

Health economic aspects of evidence-based medicine.

Reporting scientific results – requirements of scientific papers, presentations.

### Hungarian Language V.

<b>Semester:</b>	5th	<b>Code:</b>	AOK-OAK605
<b>Course type:</b>	Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	3	<b>Department:</b>	Med. Comm. and Translation
<b>Credit:</b>	-	<b>Form of Exam:</b>	Term Mark

**week topic**

1. Revision
- 2-3. Taking history, Doctor's questions
4. Giving instructions and examination  
Week 5-13: Internal Medicine – Diseases
- 5-6. Doctor-patient dialogues: high BP, diabetes, thyroid
- 5-6. Field practice 1 (Internal Medicine)
7. Doctor-patient dialogues: IBD
8. Doctor-patient dialogues: reflux, esophageal varices
- 7-8. Oral exam (history taking)
- 9-10. Doctor-patient dialogues: cirrhosis, pancreatitis, ascites, ulcerative colitis, cholecystitis
- 9-10. Field practice 2 (Internal Medicine)
11. History taking: Crohn's disease
12. History taking: melena
13. Cardiology diseases
- 12-13. Field practice 3 (Internal Medicine)
14. Oral exam (history taking)

**Hungarian Language VI.**

<b>Semester:</b>	6th	<b>Code:</b>	AOK-OAK606
<b>Course type:</b>	Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	3	<b>Department:</b>	Med. Comm. and Translation
<b>Credit:</b>	-	<b>Form of Exam:</b>	Term Mark

**week topic**

- 1-2. **Revision** (*Cardiology*)
- 3-13. Surgery: Doctor-patient dialogues and cases
- 3-5. **General Surgery:** *appendicitis, colon cancer, gall stones*
5. Field practice 1 (General Surgery Department)
- 6-9. **Vascular Surgery:** *arterial stenosis, grafts*
8. Field practice 2 (Vascular Surgery Department)
- 10-11. Oral exam (history taking)
- 10-13. **Thoracic Surgery:** *lung tumor, empyema, lobectomy*
12. Field practice 3 (Thoracic Surgery Department)
14. Oral exam (case summary)

**Internal Medicine I.**

<b>Semester:</b>	6th	<b>Code:</b>	AOK-OAK161/AOK-OAK162
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	4/2	<b>Department:</b>	Internal Medicine
<b>Credit:</b>	4/-	<b>Form of Exam:</b>	Exam/Signature

<b><u>week</u></b>	<b><u>Lecture</u></b>	<b><u>Practice</u></b>
1.	Anatomical and structural abnormalities of the esophagus. Approach of esophageal symptoms.  Gastroesophageal Reflux Disease (GERD). Barrett's oesophagus, esophageal malignancies.	Problem oriented evaluation of the symptoms of patients with esophageal disorders  Endoscopic appearance of the esophagus in health and disease. Radiological evaluation of esophageal disorders.
2.	Other oesophageal disorders (motility and functional disorders, EOE)  Functional and motility disorders of the stomach	Testing of the esophageal function in patients with suspected esophageal disorders (esophageal manometry, pH-impedance monitoring, provocation tests) Symptom oriented approach of gastroduodenal disorders.
3.	Gastroduodenal ulcer disease (H.pylori, NSAID)  Gastric malignancies	Clinical presentation of gastroduodenal ulcer disease.  Clinical presentation of gastric cancer
4.	Chronic hepatitis  Cirrhosis of the liver. Hepatic malignancies. Other liver diseases	Clinical presentation of hepatitis  Clinical presentation of liver cirrhosis and liver cancer
5.	Diseases of the gallbladder and the biliary tract  Acute pancreatitis. Nutritional support	Clinical presentation of gallstone disease  Clinical presentation acute pancreatitis and its complications.
6.	Chronic pancreatitis, maldigestion  Pancreatic cancer	Clinical presentation of chronic pancreatitis and its complications  Clinical presentation of pancreatic cancer.
7.	Malabsorption syndrome, food allergy, NCGS  Irritable Bowel Syndrome (IBS)	Clinical presentation malabsorption.  Symptom oriented approach of intestinal disorders.
8.	Crohn's disease  Ulcerative colitis	Clinical presentation of Crohn's disease and its complications  Clinical presentation ulcerative colitis and its extraintestinal manifestations.
9.	Other colitises  Tumors of the large intestine	Clinical presentation of microscopic colitis.  Clinical presentation colon cancer

10.	Colonic diverticular disease, Anorectal dysfunction	Clinical presentation colonic diverticular disease and anorectal dysfunction
	Gastrointestinal manifestations of systemic diseases	Clinical presentation patients with systemic disorders and gastrointestinal manifestations.
11.	Gastrointestinal bleeding	Clinical presentation upper and lower gastrointestinal bleeding. Definition of obscure bleeding.
	Diagnostic endoscopy	Observation of a diagnostic endoscopic procedure
12.	Therapeutic endoscopy	Observation of a therapeutic endoscopic procedure
	Endosonography	Observation of an endosonographic procedure.
13.	Translational gastroenterology	Observation of a small bowel capsule endoscopic procedure
14.	Consultation	Consultation

## Introduction to Toxicology

**Semester:** 6th-10th  
**Course type:** Lecture  
**Hours/week:** 2  
**Credit:** 2

**Code:** AOK-OASZV221  
**Category:** elective  
**Department:** Medical Chemistry  
**Form of Exam:** Evaluation(5)

### week topic

1.	INTRODUCTION. Historical aspects. Types of toxic substances. Types of exposure. Dose-response relationship.
2.	DISPOSITION OF TOXIC COMPOUNDS. Absorption of toxic compounds. Distribution of toxic compounds. Excretion of toxic compounds.
3.	METABOLISM OF FOREIGN COMPOUNDS. Factors affecting toxic responses.
4.	TYPES OF EXPOSURE AND RESPONSE. Types of exposure. Route of exposure. Types of toxic response. Biomarkers.
5.	DRUGS AS TOXIC SUBSTANCES. Paracetamol. Aspirin (salicylate). Hydralazine. Halothane. Debrisoquine. Thalidomide. Drug interactions. Altered responsiveness: glucose-6-phosphate dehydrogenase deficiency.
6.	INDUSTRIAL TOXICOLOGY. Industrial chemicals. Means of exposure. Toxic effects. Vinyl chloride. Cadmium. Aromatic amines. Asbestos. Legislation.
7.	FOOD ADDITIVES AND CONTAMINANTS. Tartrazine. Saccharin. Food contaminants.
8.	PESTICIDES. DDT. Organophosphorus compounds. Paraquat. Fluoroacetate.

9. ENVIRONMENTAL POLLUTANTS. Air pollution. Particulates. Acid rain. Lead pollution. Water pollution. Arsenic. Food chains. Endocrine disruptors. Mercury and methylmercury.
10. NATURAL PRODUCTS. Plant toxins. Animal toxins. Fungal toxins. Microbial toxins.
11. HOUSEHOLD PRODUCTS. Carbon monoxide. Antifreeze: ethylene glycol. Cyanide. Alcohol. Glue sniffing and solvent abuse. Antidotes and the treatment of poisoning.
12. TOXICITY TESTING AND RISK ASSESSMENT. Evaluation of toxicity. Acute toxicity tests. Sub-acute toxicity tests. Chronic toxicity tests. Testing in vitro. Risk assessment and interpretation of toxicological data.

## Training of Learning

<b>Semester:</b>	1-6th	<b>Code:</b>	AOK-OASZV811
<b>Course type:</b>	Seminar	<b>Category:</b>	elective
<b>Hours/week:</b>	2	<b>Department:</b>	Behavioural Sciences
<b>Credit:</b>	2	<b>Form of Exam:</b>	Term Mark (5)

### week topic

1. The concept, process and contexts of learning.
2. Effective learning models.
3. The self-regulation ability (processes of self-regulation; setting goals, planning, monitoring, self-monitoring).
4. The self-regulated learning model (self-regulatory processes in learning; effective time management; personalized learning plan).
5. Non-effective learning strategies (procrastination, perfectionism; self-handicapping; defensive pessimism).
6. Effective learning strategies (cognitive strategies - effective note-taking, mind mapping; mnemonics - reinforcement of retention, recall).
7. Emotional and motivational strategies and their application (coping strategies; motivational strategies; resolving negative emotions in learning; coping with stress).
8. Managing group learning tasks.

## Mathematical and Statistical Modelling in Medicine

<b>Semester:</b>	4th or 6th	<b>Code:</b>	AOK-OASZV291/OASZV292
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	elective
<b>Hours/week:</b>	1/1	<b>Department:</b>	Medical Physics
<b>Credit:</b>	2/-	<b>Form of Exam:</b>	Evaluation(5)/Signature

### week Lecture

### Practice

- |  |   |
|--|---|
| <ol style="list-style-type: none"> <li>1. Elementary mathematical functions (The logarithm and exponential functions). Definitions and graphs. Geometric meaning of the derivative and definite integral.</li> </ol> | <ol style="list-style-type: none"> <li>Elementary mathematical functions (The logarithm and exponential functions). Definitions and graphs. Geometric meaning of the derivative and definite integral.</li> </ol> |
|--|---|

2.	Discrete (Poisson-) and continuous (exponential, Weibull-, normal and t-) distributions	Discrete (Poisson-) and continuous (exponential, Weibull-, normal and t-) distributions
3.	Ratios, proportions and rates in epidemiology	Ratios, proportions and rates in epidemiology
4.	Conditional probability, testing proportions: the relative difference	Conditional probability, testing proportions: the relative difference
5.	One- and Two-way ANOVA	One- and Two-way ANOVA
6.	Repeated measurement ANOVA	Repeated measurement ANOVA
7.	Nonparametric ANOVA. Kruskal-Wallis, Jonckheere-Terpstra and Nemenyi tests	Nonparametric ANOVA. Kruskal-Wallis, Jonckheere-Terpstra and Nemenyi tests
8.	Linear-by-linear method. Kendall tau statistic. Logrank test	Linear-by-linear method. Kendall tau statistic. Logrank test
9.	Logistic and Poisson regression models (ROC curves)	Logistic and Poisson regression models (ROC curves)
10.	Harmonic trend and seasonality (Edward and Walter-Elwood test, logistic regression and Cosinor method)	Harmonic trend and seasonality (Edward and Walter-Elwood test, logistic regression and Cosinor method)
11.	Area under curve methods	Area under curve methods
12.	Non-linear regression models (Michaelis-Menten kinetics, RIA, Scatchard plots)	Non-linear regression models (Michaelis-Menten kinetics, RIA, Scatchard plots)
13.	Internal and external quality control methods	Internal and external quality control methods
14.	Decision and cost-effectiveness analysis with probabilities.	Exam

## Microbiology I.

<b>Semester:</b>	5th	<b>Code:</b>	AOK-OAK211/AOK-OAK212
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	3/2	<b>Department:</b>	Medical Microbiology
<b>Credit:</b>	5/-	<b>Form of Exam:</b>	Exam/Signature

<b>week</b>	<b>Lecture (1hr/week)</b>	<b>Lecture (2hr/week)</b>	<b>Practice</b>
1.	Introduction to microbiology. Characterization and classification of bacteria.	Structure of bacteria. Growth and nutrition of bacteria.	Introduction to microbiology. Laboratory safety. Aseptic techniques. Wet-mount preparation.
2.	<i>Staphylococcus aureus</i>	Microbial genetics.	Preparation of bacterial smear. Simple and Gram staining.
3.	Shigella, Proteus	<i>Neisseria</i> genus, Coagulase negative staphylococci	Ziehl-Neelsen, Schaffer-Fulton and Neisser staining.
4.	Human pathogenic salmonellae	<i>Streptococcus</i> genus	Culture media. Preparation of blood agar.
5.	<i>E. coli</i> . <i>Klebsiella</i> genus	<i>Vibrio cholerae</i> , <i>Campylobacter</i> , <i>Helicobacter</i>	Colony morphology. Handling bacterial cultures (inoculation and plating). Methods for counting bacteria.

6.	<i>Brucella, Francisella</i>	<i>Listeria, Yersinia</i>	Biochemical diagnostic tests. Anaerobic cultivation
7.	<i>Burkholderia, Pseudomonas</i>	<i>Chlamydia, Mycoplasma</i>	<i>Staphylococcus, Streptococcus</i> AST
8.	<i>Corynebacterium</i>	<i>Bordetella, Haemophilus, Nocardia</i>	<i>Neisseria, E. coli, Klebsiella</i>
9.	<i>Bacillus, Legionella</i>	<i>Treponema, Leptospira, Borrelia</i>	<i>Yersinia, Salmonella, Shigella, Proteus</i>
10.	Anaerobic bacteria I.	Anaerobic bacteria II.	<i>Pseudomonas, Campylobacter, Helicobacter</i>
11.	<i>Mycobacterium, Nocardia</i>	<i>Rickettsia, Coxiella, Bartonella</i>	<i>Mycobacterium, Haemophilus, Bacillus</i>
12.	Antimicrobial chemotherapy I.	Antimicrobial chemotherapy II.	Antimicrobial susceptibility testing
13.	HACEK	Pathogenesis of bacterial infection	<i>Corynebacterium, Bordetella, Listeria</i>

## Microbiology II.

<b>Semester:</b>	6th	<b>Code:</b>	AOK-OAK213/AOK-OAK214
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	3/2	<b>Department:</b>	Medical Microbiology
<b>Credit:</b>	5/-	<b>Form of Exam:</b>	Comprehensive Exam/Signature

<b>week</b>	<b>Lecture (1hr/week)</b>	<b>Lecture (2hr/week)</b>	<b>Practice</b>
1.	General characteristics of viruses, viral replication, antiviral therapy	Structure of viruses and classification	Laboratory safety. Methods of sterilization. Sterility testing.
2.	Herpesviridae I	Herpesviridae II	Differential diagnosis of bacteria
3.	Arenaviridae, Filoviridae	Orthomyxoviridae, Paramyxoviridae	Serological reactions I. (Precipitation, CFT)
4.	Parvoviridae, Bunyaviridae	Papilloma and polyoma viruses	Serological reactions II. Agglutination. Laboratory methods for detection of cellular immunity.
5.	Poxviridae, Rhabdoviridae	Togaviridae, adenoviridae	Clinical Microbiology
6.	Retroviridae I	HIV	Virology I. Cultivation of viruses. Signs of viral replication.
7.	Retroviridae II	Slow" viruses.	Virology II. Quantitation of viruses
8.	Flaviviridae	Hepatitis viruses	
9.	Picornaviridae	Oncoviruses	Virology III. Virus serology (HAG, ELISA, IF) Neutralization test
10.	Reoviridae, Astroviridae, Coronaviridae	Immune response against pathogens.	Bacteriophages

11.	Human pathogenic fungi I.	Human pathogenic fungi II.	Molecular methods in the diagnosis of infectious diseases.
12.	Human pathogenic protozoa I.	Human pathogenic protozoa II.	Mycology
13.	Human pathogenic helminths I.	Human pathogenic helminths II.	Parasitology
14.	Immunization I.	Immunization II.	

## Microsurgery

**Semester:** 5th-10th  
**Course type:** Lecture/Practice  
**Hours/week:** 8/20 hrs total  
**Credit:** 2/-

**Code:** AOK-OAKV431/AOK-OAKV432  
**Category:** compulsory elective  
**Department:** Institute of Surgical Research  
**Form of Exam:** Evaluation(5)/Signature

### Lecture

Introduction. Materials, instruments and equipment in microsurgery

Oral- and maxillofacial surgical aspects of microsurgery

Traumatological aspects of microsurgery

Clinical indications for microsurgery, anastomosis techniques

### Practice

Introductory exercises, hand-eye coordination. Appropriate posture at the operating microscope and the adjustment of the microscope. Movement coordination of the hands: interlacing threads under microscope (1 hr)

Tying basic microsurgical knots under macroscopic and microscopic conditions (2 hrs)

Stitching and tying knots with microsurgical instruments on rubber gloves (2 x 3 hrs)

Suture of tubes (2 x 3 hrs)

Vessel anastomosis *ex vivo* (3 hrs)

Practical exam (2 hrs)

## Molecular Developmental Biology

**Semester:** 4th or 6th  
**Course type:** Lecture  
**Hours/week:** 2  
**Credit:** 2

**Code:** OK-OAKV441  
**Category:** compulsory elective  
**Department:** Biochemistry  
**Form of Exam:** Evaluation(5)

### topic

The molecular developmental aspect of medical biology

General mechanisms of embryonic development

The formation of body pattern (polarity, segment polarity, body domains) and appendix development

Seminary (lectures 1-3)

Cell movement and body formation in vertebrates, neural development

The formation of the epiderm and its renewal from stem cells. Sensory epithel, airway system, gut and liver development.

Seminary (lectures 5,6)

Blood vesels and endothel cells, multipotent stem cells, blood cell renewal. Fibroblasts and their transformations. The movement and muscle types. The origin and potency of stem cells.

Seminary (lecture 8)

The cancer as a microevolutionary process.

Tumor formation and its molecular background

Seminary (lecture 10,11)

The molecular biology of nutrition and life span

Seminary (lecture 13)

## Molecular Medicine

<b>Semester:</b>	5th	<b>Code:</b>	AOK-OAKV451
<b>Course type:</b>	Lecture	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	2	<b>Department:</b>	Cell Biology
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation(5)

### week   topic

1. Introduction
2. Gene therapies
3. Next generation sequences
4. Tumor diagnostic
5. Immunological methods
6. Apoptosis
7. Intracellular signaling and gene expression
8. RNA based therapy
9. Stem cell and stem cell based therapies
10. Lipidomics
11. Stem cell based regenerative medicine
12. Biomarkers

## Pathology I.

<b>Semester:</b>	5th	<b>Code:</b>	AOK-OAK221/AOK-OAK222/AOK-OAK2251
<b>Course type:</b>	Lecture/Practice/Seminar	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2/2/2	<b>Department:</b>	Pathology
<b>Credit:</b>	6/-/-	<b>Form of Exam:</b>	Exam/Signature

### week   Lecture

### Seminar (2x1hr/week)

### Practice (2hrs/week)

1.	Introduction of pathology. Trombosis. Embolism.	Postmortem changes. The completion of the death examination certificate. The regulations regarding autopsies.	Autopsy / Histology
2.	Vascular pathology 1.	Calcification. Oedema, hyperaemia, congestion. Hemorrhage.	Autopsy / Histology
3.	Vascular pathology 2.	Necrosis. Cellular adaptations of growth and differentiation.	Autopsy / Histology
4.	Pathology of the heart 1.	Pathology and morphology of acute inflammation.	Autopsy / Histology
5.	Pathology of the heart 2.	Pathology and morphology of chronic inflammation.	Autopsy / Histology
6.	Pathology of the lung 1.	Immunopathology, autoimmune diseases, organ rejection.	Autopsy / Histology
7.	Pathology of the lung 2.	Pathology of tumors 1.	Autopsy / Histology
8.	Pathology of the upper airways. Pathology of the oral cavity and salivary glands.	Carcinogenesis.	Autopsy / Histology
9.	Pathology of the kidney and the urinary tract. 1.	Pathology of tumors 2. Clinical aspects of neoplasia.	Autopsy / Histology
10.	Pathology of the kidney and the urinary tract. 2.	Shock. DIC.	Autopsy / Histology
11.	Pathology of the male genital organs.	Tissue repair and wound healing. Diabetes.	Autopsy / Histology
12.	Pathology of the female genital organs.	Pathology of smoking, alcoholism and obesity.	Autopsy / Histology
13.	Pathology of the breast.	Pathology of prolonged bed rest. Pathology of aging. Amyloidosis.	Autopsy / Histology
14.	Pathology of gestation. Perinatal pathology.	Consultation/Repetition	Autopsy / Histology

## Pathology II.

<b>Semester:</b>	6th	<b>Code:</b>	AOK-OAK223/AOK-OAK224
<b>Course type:</b>	Lecture/Practice/Seminar	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2/3/1	<b>Department:</b>	Pathology
<b>Credit:</b>	6/-/-	<b>Form of Exam:</b>	Comprehensive Exam/Signature

<u>week</u>	<u>Lecture</u>	<u>Seminar (1hr/week)</u>	<u>Organdemonstration (1hr/week)</u>	<u>Practice (2hrs/week)</u>
1.	Pathology of the esophagus and stomach.	Pathological diagnostics (Filling out the request form, initiation of the surgical samples, resection surfaces)	External examination, Signs of death	Autopsy / Histology
2.	Pathology of the small intestine and pancreas.	Pathological diagnostics (types of histological samples)	Cardiovascular system	Autopsy / Histology
3.	Pathology of the large intestine 1.	Pathological diagnostics (the content of the pathology report)	Kidney	Autopsy / Histology

4.	Pathology of the large intestine 2.	Pathological diagnostics (cytology: fine needle aspiration cytology and body cavity cytology)	GI tract (esophagus, stomach, small and large intestine)	Autopsy / Histology
5.	Pathology of the liver.	Pathological diagnostics (cytology: gynecological cytology)	GI tract (liver, bile ducts, pancreas, peritoneum)	Autopsy / Histology
6.	Pathology of the gall bladder and bile ducts. Pathology of the peritoneum.	Pathological diagnostics (special stains, immunohistochemistry)	MTO I.	Autopsy / Histology
7.	Pathology of the endocrine glands.	Pathological diagnostics (PCR, FISH)	Lung	Autopsy / Histology
8.	Haematopathology 1.	Pathological diagnostics (NGS)	General tumorpathology	Autopsy / Histology
9.	Haematopathology 2.	Oncological aspects of the prognostic and predictive markers	Haematopathology	Autopsy / Histology
10.	Pathology of the skin.	Pathological aspects of diagnostic imaging.	Female genital organs, breast	Autopsy / Histology
11.	Neuropathology 1.	Role of pathology in the multidisciplinary team.	Male genital organs	Autopsy / Histology
12.	Neuropathology 2. Pathology in practice: case presentation	Pathology in practice: case presentation	MTO II.	Autopsy / Histology
13.	Pathology of the eye, ear canal, inner ear, middle ear. Pathology in practice: case presentation	Pathology in practice: case presentation	Neuropathology	Autopsy / Histology
14.	Pathology of the bones and soft tissues.	Consultation	Autopsy pre-exam (optional)	Autopsy / Histology

## Pathophysiological Aspects of Laboratory Medicine

<b>Semester:</b>	6th	<b>Code:</b>	AOK-OAKV411
<b>Course type:</b>	Lecture	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	2	<b>Department:</b>	Laboratory Medicine
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation(5)

### week   topic

1. Introduction to laboratory medicine  
Preanalytical processes, test requesting, sampling, common preanalytical errors  
Analytical processes: quality control, traceability of measurements, precision, biological variation, reference range, point of care testing.  
Postanalytical processes: interpretation of results, sensitivity, specificity, predictive values, pre- and post-test probability, clinically significant change values, alarming or critical values, evidence based laboratory medicine
2. Visit at the Department of Laboratory Medicine
3. POCT: basics, blood-gas examination, acid-base balance disorders

4. Laboratory diagnosis of coagulation disorders:  
basic coagulation tests, monitoring of anticoagulant therapy, testing for congenital and acquired thrombophilias
5. Laboratory diagnosis of sodium and water metabolism  
Hypo- and hypernatremia: causes and differential diagnosis, SIADH, diabetes insipidus, laboratory diagnosis of oedema. Effect of diuretics on sodium and water balance, disorders of osmolar regulation  
Disorders of potassium metabolism  
Hypo-, and hyperkalemia: causes and differential diagnosis, diagnostic algorithms and treatment
6. Laboratory diagnosis of liver diseases
7. Hematology
8. Inflammatory parameters in laboratory practice
9. Laboratory diagnosis of disorders of lipid metabolism  
Primary, and secondary hyperlipidemia, clinical significance of cholesterol, TG, HDL-C, LDL-C, classification of hyperlipidemias. Risks of atherosclerosis: clinical significance of ApoA, ApoB, Lp (a), homocystein, fibrinogen.
10. Laboratory diagnosis and monitoring of diabetes mellitus
11. Laboratory diagnosis of renal diseases  
Laboratory tests of glomerular and tubular functions, laboratory diagnosis of proteinuria, acute and chronic renal failure, nephrosis syndrome, differentiation of distal and proximal renal tubular acidosis
12. Laboratory diagnosis of myocardial infarction and acute coronary syndrome  
Classical markers: CK, LDH isoenzymes, myoglobin. New markers: Troponin I, Troponin T, significance of point of care testing, diagnostic algorithms.

## Pathophysiology I.

<b>Semester:</b>	5th	<b>Code:</b>	AOK-OAK201/AOK-OAK202
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	3/2	<b>Department:</b>	Pathophysiology
<b>Credit:</b>	5/-	<b>Form of Exam:</b>	Exam/Signature

<u>week</u>	<u>Lecture</u>	<u>Practice/Seminar</u>
1.	<b>Inflammation I.:</b> Basic concepts and types of inflammation, inflammatory cells and mediators. Pathomechanism of acute inflammation. <i>Lecturer: Zoltán Rakonczay, Substitute lecturer: Krisztina Csabafi</i>	Requirements and safety instructions. Review of basic physiology and ECG.
2.	<b>Inflammation II.:</b> Pathomechanism of chronic inflammation, local and systemic symptoms/signs of inflammation, basic concepts of pain. <i>Lecturer: Zoltán Rakonczay, Substitute lecturer: Krisztina Csabafi</i>	<b>Inflammation I.:</b> Basic concepts and types of inflammation, inflammatory cells and mediators. Pathomechanism of acute inflammation. <b>In the practice room: Registration and analysis of ECG.</b>
3.	<b>Immunology I.:</b> Hypersensitivity reactions and autoimmune diseases. <i>Lecturer: Zoltán Rakonczay, Substitute lecturer: Miklós Jászberényi</i>	<b>Classroom switched between groups!</b> <b>Inflammation II.:</b> Pathomechanism of chronic inflammation, local and systemic symptoms/signs of inflammation, basic concepts of pain. <b>ECG: Premature beats.</b>
4.	<b>Immunology II.:</b> Autoimmune diseases, primary and secondary immunodeficiencies. <i>Lecturer: Zoltán Rakonczay, Substitute lecturer: Miklós Jászberényi</i>	<b>Classroom switched between groups!</b> <b>Immunology I.:</b> Hypersensitivity reactions and autoimmune diseases. <b>ECG: Arrhythmias of the sinus node.</b>

5.	<b>Endocrinology I.:</b> Disorders of the hypothalamus, pituitary and thyroid gland. <i>Lecturer: Miklós Jászberényi, Substitute lecturer: Zsolt Bagosi</i>	<b>Immunology II.:</b> Primary and secondary immunodeficiencies. <b>ECG: Preexcitation syndromes.</b>
6.	<b>Endocrinology II.:</b> Disorders of the parathyroid gland, adrenal cortex and medulla, male and female gonads. <i>Lecturer: Miklós Jászberényi, Substitute lecturer: Zsolt Bagosi</i>	<b>Endocrinology I.:</b> Disorders of the hypothalamus, pituitary and thyroid gland. <b>ECG: Atrial and AV nodal arrhythmias.</b>
7.	<b>Nutritional Diseases:</b> Malnutrition syndromes, starvation, vitamin deficiency, obesity. <i>Lecturer: Krisztina Csabafi, Substitute lecturer: Miklós Jászberényi</i>	<b>Endocrinology II.:</b> Disorders of the parathyroid gland, adrenal cortex and medulla, male and female gonads. <b>ECG: Ventricular arrhythmias.</b>
8.	<b>Diabetes mellitus, metabolic syndrome, hypoglycemia:</b> Pathophysiology of diabetes mellitus, prediabetes, concept of insulin resistance and metabolic syndrome, hypoglycemia. <i>Lecturer: Krisztina Csabafi, Substitute lecturer: Miklós Jászberényi</i>	<b>Nutritional Diseases:</b> Malnutrition syndromes, starvation, vitamin deficiency, obesity. <b>ECG: AV blocks.</b>
9.	<b>Hyperlipidemias, atherosclerosis:</b> Primary and secondary hyperlipidemias, pathophysiology of atherosclerosis. <i>Lecturer: Zsolt Bagosi, Substitute lecturer: Júlia Szakács</i>	<b>Diabetes mellitus, metabolic syndrome, hypoglycemia:</b> Pathophysiology of diabetes mellitus, prediabetes, concept of insulin resistance and metabolic syndrome, hypoglycemia. <b>ECG: Bundle branch blocks.</b>
10.	<b>Cardiovascular system I.:</b> Angina pectoris, acute coronary syndrome, myocardial infarction, chronic heart diseases. <i>Lecturer: Márta Sárközy, Substitute lecturer: Júlia Szakács</i>	<b>Cardiovascular system I.:</b> Congenital and acquired heart defects, pathophysiology of compensated and decompensated heart failure. <b>ECG: Myocardial infarction.</b>
11.	<b>Cardiovascular system II.:</b> Congenital and acquired heart defects. <i>Lecturer: Márta Sárközy, Substitute lecturer: Zsolt Bagosi</i>	<b>Cardiovascular system II.:</b> Volume expansion (hypervolemia), primary and secondary hypertension. <b>ECG: Hypertrophies.</b>
12.	<b>Cardiovascular system III.:</b> Primary and secondary hypertension, volume expansion (hypervolemia), pathophysiology of compensated and decompensated heart failure. <i>Lecturer: Zsolt Bagosi, Substitute lecturer: Júlia Szakács</i>	<b>Hyperlipidemias, atherosclerosis:</b> Primary and secondary hyperlipidemias, pathophysiology of atherosclerosis. <b>Electrolyte abnormalities and pulmonary embolism.</b>
13.	<b>Cardiovascular system IV.:</b> Volume depletion (hypovolemia, hypotension), syncope, circulatory shock. <i>Lecturer: Júlia Szakács, Substitute lecturer: Zsolt Bagosi</i>	<b>Cardiovascular system III.:</b> Angina pectoris, acute coronary syndrome, myocardial infarction, chronic heart diseases. <b>ECG: review.</b>
14.	<b>Thermoregulation:</b> Definition, types, phases and consequences of hypothermia and hyperthermia. <i>Lecturer: Júlia Szakács, Substitute lecturer: Zsolt Bagosi</i>	<b>Cardiovascular system IV.:</b> Volume depletion (hypovolemia, hypotension), syncope, circulatory shock.

## Pathophysiology II.

<b>Semester:</b>	6th	<b>Code:</b>	AOK-OAK203/AOK-OAK204
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	3/2	<b>Department:</b>	Pathophysiology
<b>Credit:</b>	5/-	<b>Form of Exam:</b>	Comprehensive Exam/Signature

<b>week</b>	<b>Lecture</b>	<b>Practice/Seminar</b>
1.	<b>Gastrointestinal diseases I.:</b> Nausea, vomiting, dysphagia, GERD, abnormalities of gastric juice secretion, peptic ulcer, acute and chronic pancreatitis. <i>Lecturer: Professor Zoltán Rakonczay, Substitute lecturer: Zsolt Bagosi</i>	Safety regulation. <b>Thermoregulation. ECG review.</b>
2.	<b>Gastrointestinal diseases II.:</b> Diseases of absorption, diarrhea, constipation: Irritable bowel syndrome, intestinal obstruction. <i>Lecturer: Professor Zoltán Rakonczay, Substitute lecturer: Zsolt Bagosi</i>	<b>Gastrointestinal diseases I.:</b> Nausea, vomiting, dysphagia, GERD, abnormalities of gastric juice secretion, peptic ulcer, acute and chronic pancreatitis. ECG: pulmonary embolism
3.	<b>Diseases of liver and biliary tract:</b> Liver dysfunction, diseases of bilirubin metabolism: jaundice, hepatic cirrhosis, liver failure, alcoholic, immune and genetic liver diseases, cholelithiasis. <i>Lecturer: Professor Zoltán Rakonczay, Substitute lecturer: Júlia Szakács</i>	<b>Gastrointestinal diseases II.:</b> Diseases of absorption, diarrhea, constipation: Irritable bowel syndrome, intestinal obstruction. ECG: electrolyte disturbances.
4.	<b>Kidney diseases I.:</b> Disturbances of glomerular and tubular functions, nephrolithiasis. <i>Lecturer: Krisztina Csabafi, Substitute lecturer: Miklós Jászberényi</i>	<b>Diseases of liver and biliary tract:</b> Liver dysfunction, diseases of bilirubin metabolism: jaundice, hepatic cirrhosis, liver failure, alcoholic, immune and genetic liver diseases, cholelithiasis.
5.	<b>Kidney diseases II.:</b> Acute and chronic renal failure. <i>Lecturer: Krisztina Csabafi, Substitute lecturer: Miklós Jászberényi</i>	<b>Kidney diseases I.:</b> Disturbances of glomerular and tubular functions, nephrolithiasis.
6.	<b>Disturbances of acid-base metabolism:</b> Respiratory acidosis and alkalosis, metabolic acidosis and alkalosis. <i>Lecturer: Márta Sárközy, Substitute lecturer: Krisztina Csabafi</i>	<b>Kidney diseases II.:</b> Acute and chronic renal failure.
7.	<b>Electrolyte disturbances:</b> Salt-water balance disorders, pathophysiology of potassium, calcium, phosphate, iron, and copper. <i>Lecturer: Márta Sárközy, Substitute lecturer: Miklós Jászberényi</i>	<b>Disturbances of acid-base metabolism:</b> Respiratory acidosis and alkalosis, metabolic acidosis and alkalosis.
8.	<b>CNS disorders I.:</b> Circulatory diseases of the CNS, cerebral edema, headache, epilepsy. <i>Lecturer: Miklós Jászberényi, Substitute lecturer: Krisztina Csabafi</i>	<b>Electrolyte disturbances:</b> Salt-water balance disorders, pathophysiology of potassium, calcium, phosphate, iron, and copper.
9.	<b>CNS disorders II.:</b> Multiple sclerosis, neurodegenerative diseases: Alzheimer's, Parkinson's and Huntington's disease, motoneuron diseases, myasthenia gravis. <i>Lecturer: Miklós Jászberényi, Substitute lecturer: Krisztina Csabafi</i>	<b>CNS disorders I.:</b> Circulatory diseases of the CNS, cerebral edema, headache, epilepsy.
10.	<b>Pathophysiology of leukocytes II.:</b> Leucopenia, proliferative diseases: reactive and malignant diseases (leukemias, lymphomas), qualitative disturbances of leukocytes. <i>Lecturer: Krisztina Csabafi, Substitute lecturer: Júlia Szakács</i>	<b>CNS disorders II.:</b> Multiple sclerosis, neurodegenerative diseases: Alzheimer's, Parkinson's and Huntington's disease, motoneuron diseases, myasthenia gravis.
11.	<b>Red blood cell disorders:</b> Anemias - ineffective erythropoiesis, blood loss, hemolysis. <i>Lecturer: Júlia Szakács, Substitute lecturer: Krisztina Csabafi</i>	<b>Pathophysiology of leukocytes II.:</b> Leucopenia, proliferative diseases: reactive and malignant diseases (leukemias, lymphomas), qualitative disturbances of leukocytes.

- |   |  |
|---|--|
| <p>12. <b>Hemostasis:</b> Bleeding disorders (platelet, vascular, clotting factor disturbances), thrombosis.<br/><i>Lecturer: Júlia Szakács, Substitute lecturer: Krisztina Csabafi</i></p>   | <p><b>Red blood cell disorders:</b> Anemias - ineffective erythropoiesis, blood loss, hemolysis.</p>   |
| <p>13. <b>Pulmonary diseases I:</b> Spirometry, obstructive pulmonary diseases: obstructive sleep apnea, COPD, asthma bronchiale, cystic fibrosis.<br/><i>Lecturer: Zsolt Bagosi, Substitute lecturer: Júlia Szakács</i></p>  | <p><b>Hemostasis:</b> Bleeding disorders (platelet, vascular, clotting factor disturbances), thrombosis.</p>   |
| <p>14. <b>Pulmonary diseases II:</b> Restrictive pulmonary diseases: pneumothorax and pleural effusion, acute pulmonary edema and embolism, pulmonary hypertension, cor pulmonale, respiratory failure.<br/><i>Lecturer: Zsolt Bagosi, Substitute lecturer: Júlia Szakács</i></p> | <p><b>Pulmonary diseases I-II:</b> Dyspneas, general characterization of obstructive and restrictive pulmonary diseases, asthma bronchiale, COPD, cystic fibrosis. Restrictive pulmonary diseases: chest wall and pleura disorders, pulmonary edema, pulmonary hypertension, pulmonary embolism, hypoxia, respiratory failure.</p> |

## Pathophysiology of Sepsis at the Bedside

<b>Semester:</b>	5th	<b>Code:</b>	AOK-OAKV071
<b>Course type:</b>	Lecture	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	1	<b>Department:</b>	Anesthesiology
<b>Credit:</b>	1	<b>Form of Exam:</b>	Evaluation(5)

### topic

Sepsis: a problem what existed, exists and will exist

Is there any infection? - the role of biomarkers in the diagnosis of sepsis

Heart, PICCO, hemostasis

Failure of the respiratory system

Antibiotics - a double edge sword

Abdominal sepsis

Test

## Pharmacology and pharmacotherapy I.

<b>Semester:</b>	6th	<b>Code:</b>	AOK-OAK191/AOK-OAK192
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	3/2	<b>Department:</b>	Pharmacology
<b>Credit:</b>	5/-	<b>Form of Exam:</b>	Exam/Signature

### week   Lecture

### Practice

- |  |                      |
|--|----------------------|
| <p>1. Pharmacodynamics (receptors, dose-response relations, interactions)<br/>Development of new drugs. Preclinical and clinical investigations.</p> | <p>Requirements.</p> |
|--|----------------------|

2.	Pharmakokinetics (LADME) Influence of age, diet and diseases on the effectiveness of drugs.	Pharmacodynamics
3.	Drug allergy. Pharmacogenomics. Dependence. Tolerance. Biologicals.	Pharmacokinetics. Influence of age, diet and diseases on the effectiveness of drugs.
4.	Pharmacology of the autonomic nervous system. Antihypertensive drugs: alpha and beta receptor blockers.	MTO I: general pharmacology. Biologicals.
5.	Antihypertensive drugs: drugs acting on RAS, CCB. Pharmacology of diuretics. Antidiuretics.	Pharmacology of the autonomic nervous system.
6.	Anticoagulants. Inhibitors of platelet aggregation. Treatment of bleeding disorders and anaemia, fibrinolytics. Angiology.	Pharmacotherapy of hypertension, diuretics, antidiuretics.
7.	Pharmacotherapy of acute and chronic heart failure I. Pharmacotherapy of acute and chronic heart failure II.	Drugs acting on the blood.
8.	Pharmacotherapy of acute and chronic coronary syndrome. Antiarrhythmic drugs.	Pharmacotherapy of heart failure.
9.	Pharmacotherapy of diabetes mellitus. Pharmacotherapy of hyperlipoproteinemias.	Pharmacotherapy of coronary syndromes.
10.	Pharmacotherapy of obesity and metabolic syndrome. Pharmacology of hypothalamic, pituitary and thyroid hormones.	Antihyperlipid drugs.
11.	Drugs affecting bone metabolism. Pharmacotherapy of infertility and erectile dysfunction.	Antiarrhythmic drugs.
12.	Pharmacology of male and female sexual hormones. Contraceptives. Glucocorticoids.	MTO II: Pharmacology of ANS and CVS. Pharmacotherapy of diabetes mellitus, obesity, metabolic syndrome
13.	Nonsteroidal anti-inflammatory drugs. Antihistamines.	Pharmacology of hypothalamic, pituitary and thyroid hormones, bone metabolism, infertility and ED.
14.	Immunosuppressive therapy. Pharmacology of immunostimulants.	Sexual hormones, contraceptives, glucocorticoids. Discussion of immunotherapy

## Surgical Propedeutics

**Semester:** 6th  
**Course type:** Lecture/Practice  
**Hours/week:** 2/2  
**Credit:** 4/-

**Code:** AOK-OAK231/ OAK232  
**Category:** compulsory  
**Department:** Surgery  
**Form of Exam:** Examination/signature

<b>week</b>	<b>Lecture</b>	<b>Practice/Seminar</b>
1.	The origins and development of surgery	Demonstration, investigation of surgical patients. Consultation about the topics of lectures.
2.	Observation and documentation of surgical patients	Demonstration, investigation of surgical patients. Consultation about the topics of lectures.
3.	The significance and role of asepsis and antisepsis in the surgical practice	Demonstration, investigation of surgical patients. Consultation about the topics of lectures.
4.	Bleeding and haemostasis, surgical devices	Demonstration, investigation of surgical patients. Consultation about the topics of lectures.
5.	Types of wounds and the basic principles of wound healing	Demonstration, investigation of surgical patients. Consultation about the topics of lectures.
6.	Basic wounds treatment, classical and modern wound dressing materials	Demonstration, investigation of surgical patients. Consultation about the topics of lectures.
7.	Perioperative complications	Demonstration, investigation of surgical patients. Consultation about the topics of lectures.
8.	Surgical infections. Modern antibiotic treatment	Demonstration, investigation of surgical patients. Consultation about the topics of lectures.
9.	Enteral and parenteral feeding	Demonstration, investigation of surgical patients. Consultation about the topics of lectures.
10.	The role of endoscopy in surgery	Demonstration, investigation of surgical patients. Consultation about the topics of lectures.
11.	Significance of radiology in surgical diagnostics	Demonstration, investigation of surgical patients. Consultation about the topics of lectures.
12.	Surgical oncology	Demonstration, investigation of surgical patients. Consultation about the topics of lectures.
13.	Surgical immunology	Demonstration, investigation of surgical patients. Consultation about the topics of lectures.
14.	Consultation	Demonstration, investigation of surgical patients. Consultation about the topics of lectures.

## CLINICAL MODULE SYLLABUS

### Advanced Biostatistics

<b>Semester:</b>	8 <sup>th</sup> or 10 <sup>th</sup>	<b>Code:</b>	AOK-OAKV171
<b>Course type:</b>	Lecture	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	2	<b>Department:</b>	Medical Physics
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation(5)

<b>Week</b>	<b>Lecture (1 hr/week)</b>	<b>Practice (1 hr/week)</b>
1.	Introduction: summary of basic biostatistics	The main concepts of logistics. Statistical computer systems.
2.	Nonparametric methods for two or more dependent or independent data	The choice of the appropriate statistical method and it's evaluation
3.	Multiple linear regression, linear models	Data sets with several independent variables (i.e., risk factors)
4.	Comparison of several independent group-means: two-way ANOVA	Data sets and problems when two-way ANOVA is appropriate
5.	Two-way ANOVA with interaction	Understanding the concept of interaction
6.	Comparison of several related group-means: repeated measures ANOVA	Data sets and problems for repeated measurements ANOVA
7.	Summary	MTO 1.: solving two problems, main results and interpretation
8.	Diagnostic tests. Specificity, sensitivity, PPV, NPV, Accuracy	Calculation of the diagnostic measures
9.	Biostatistical methods in epidemiology, relative risk, odds ratio	Calculation of RR and OR by hand and by computer. Comparison of methods.
10.	Logistic regression: equation, use, meaning	Simple logistic regression problem solving by computer program
11.	Logistic regression: accuracy ROC curve	Examples from the medical literature: the use of logistic regression to find risk factors of an illness.
12.	Multivariate methods: discriminant analysis	Examples from the medical literature: decision making by computer
13.	Multivariate methods: cluster analysis	Examples from the medical literature: classification of cases or variables
14.	Summary	MTO 2.: solving two simple problems, main results and interpretation.

### Anaesthesiology and Intensive Therapy I.

<b>Semester:</b>	9th	<b>Code:</b>	AOK-OAK243/ AOK-OAK244
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2/1	<b>Department:</b>	Anaesthesiology & Int. Ther.
<b>Credit:</b>	1/-	<b>Form of Exam:</b>	Evaluation/Signature

**week   topic**

1. Introducing anaesthesiology and intensive therapy
2. Applied physiology –I. Circulation, circulation management
3. Applied physiology – I. Breathing, oxygen therapy
4. Applied pharmacology  
I. Clinical pharmacology  
II. Anaesthesiological pharmacology
5. Fluid therapy, fluid resuscitation, electrolytes
6. Assessment of perioperative risks, preoperative preparation
7. General anaesthesia, anaesthetics
8. Regional anaesthesia, local anesthetics
9. Airway management
10. Monitoring during anaesthesia
11. Postoperative patient care, complications, PACU
12. Postoperative acute and chronic analgesia
13. Test

**Anesthesiology and Intensive Therapy II.**

<b>Semester:</b>	10th	<b>Code:</b>	AOK-OAK245/AOK-OAK246
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2/1	<b>Department:</b>	Anaesthesiology & Int. Ther.
<b>Credit:</b>	2/-	<b>Form of Exam:</b>	Exam/Signature

**week   topics**

1. Strategic role of anaesthesiology and intensive therapy in disaster medicine
2. Blood gas analysis, diabetic ketoacidosis
3. Acute respiratory failure, mechanical ventilation
4. Acute cardiovascular diseases
5. Intoxication, blood purification
6. Clinical nutrition, pancreatitis, liver failure
7. ALS, BLS, postresuscitation care
8. Infection and infection control
9. Catastrophic central nervous system disorders
10. Sepsis, septic shock

## Basic Biostatistics

**Semester:** 7th or 9th  
**Course type:** Lecture  
**Hours/week:** 1/  
**Credit:** 2

**Code:** AOK-OAKV161  
**Category:** compulsory elective  
**Department:** Medical Physics  
**Form of Exam:** Evaluation(5)

### **Week Lecture (1 hr/week)**

### **Practice (1 hr/week)**

1.	Data definition, types of data, displaying data. Sample characteristics.	Bar chart, histogram. Calculation of the mean and standard deviation.
2.	Probability, random variables and their types, distributions.	Calculation of descriptive statistics. The use of a computer program.
3.	Binomial, Poisson, uniform and normal distribution and their properties.	The use of statistical tables – standard normal distribution.
4.	Statistical estimation, confidence intervals.	Calculation of the confidence interval for a population mean. The use of the t-table.
5.	Testing hypotheses, significance. One-sample t-test.	Practice of one-sample t-test using experimental data.
6.	Paired and Independent samples t-tests.	Practice of t-tests using experimental data. The meaning of significance, p-value.
7.	Errors in hypothesis tests	MTO 1.
8.	Comparing the mean of several groups: one-way analysis of variance.	Independent t-tests and one-way ANOVA. Multiple comparisons.
9.	Relationship between continuous variables, correlation, linear regression.	Scatterplot, trend-line in EXCEL. <a href="http://www.ruf.rice.edu/~lane/stat_sim/reg_by_eye">http://www.ruf.rice.edu/~lane/stat_sim/reg_by_eye</a>
10.	Relationship between categorical variables: the chi-square test for independence	Evaluation of a 2x2 table by hand calculation and by computer
11.	The use of 2x2 tables in diagnostic tests. The chi-square-test for goodness of fit.	Calculation of sensitivity, specificity, positive and negative predictive value.
12.	Nonparametric methods.	Statistical tests on ranks.
13.	Summary	MTO 2.
14.	Examples from the literature	Practical questions of applied biostatistics.

## Basics of Self-Knowledge in Professional Orientation

**Semester:** 7th  
**Course type:** Practice  
**Hours/week:** 12 hrs total  
**Credit:** 1

**Code:** AOK-OASZV751  
**Category:** elective  
**Department:** Behavioural Sciences  
**Form of Exam:** Term Mark

### **week topic (2 hrs for 6 weeks)**

1.	Conditions for proper and successful career choice, the role of self-knowledge in the development of professional identity
2.	Mapping own preferences and priorities and self-reflection on them
3.	Self-reflection through situations
4.	Own values and the role of personal attachment in specialization choice
5.	A personal narrative with a focus on professional choice
6.	Summary of experiences, recapitulative self-reflection

## Cardiac Electrophysiology as a Basic Property of Cardiac Function

<b>Semester:</b>	8th or 10th	<b>Code:</b>	AOK-OAKV581/OAKV582
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	1/1	<b>Department:</b>	Pharmacology
<b>Credit:</b>	2/-	<b>Form of Exam:</b>	Evaluation(5)/Signature

### week   topic of Lecture and Practice

1. Introduction.
2. Basic principles of electrophysiology, the impulse propagation in the heart I.
3. Basic principles of electrophysiology, the impulse propagation in the heart II.
4. The action potential of myocytes and the ionic channels determining the action potential I.
5. The action potential of myocytes and the ionic channels determining the action potential II.
6. Methods and techniques in cardiac electrophysiology.
7. Electro-mechanical coupling in the heart I.
8. Genetic background of ion-channel disturbances in the heart.
9. Electro-mechanical coupling in the heart II.
10. The mechanism of developing cardiac arrhythmias
11. Electrophysiological changes after the disturbances in blood supply to the myocardium.
12. Experimental methods and clinical relevance to investigate cardiac arrhythmias.
13. Investigational techniques in cardiac cellular electrophysiology
14. Practical and consultation

## Cerebrovascular diseases of the central nervous system (stroke, aneurysm, angioma) and their neurosurgical treatment options (surgery, intervention, conservative therapy)

<b>Semester:</b>	9th	<b>Code:</b>	AOK-OASZV801
<b>Course type:</b>	Lecture	<b>Category:</b>	elective
<b>Hours/week:</b>	Total of 14	<b>Department:</b>	Neurosurgery
<b>Credit:</b>	1	<b>Form of Exam:</b>	Evaluation(5)

### lecture   topic

1.
  - a. Anatomy of the cerebral vascular system, variation of vascular system, physiology of cerebral blood circulation and their clinical implications.
  - b. Cerebrovascular disease/pathologies
2.
  - c. Surgical interventions of ruptured and silent cerebral aneurysm.
  - d. Neurorinterventional treatment of ruptured and silent cerebral aneurysm.
3.
  - e. Acute treatment of ischemic stroke (imaging techniques, thrombolysis, indication of mechanical thrombectomy)
  - f. Mechanical thrombectomy (history, indications, methods)

4.
  - g. Ischemic stroke, stroke prevention (surgical treatment of carotid artery stenosis), surgical thrombectomy
  - h. Endovascular stroke prevention (endovascular treatment of carotid stenosis)
5.
  - i. Surgical treatment of arteriovenous malformations (AVM).
  - j. Radiotherapy of AVM.
  - k. The role of neurointervention in the treatment of AVM.
6.
  - l. Tumor embolisation, drug administration by using superselective catheter, hormone level determination, embolization of subdural hematoma
  - m. Arterial approaches neurointervention
7. Multiple-choice test

## Child and Adolescent Psychiatry, Mentalhygiene

<b>Semester:</b>	8th or 10th	<b>Code:</b>	AOK-OAKV331
<b>Course type:</b>	Lecture	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	2	<b>Department:</b>	Child Psychiatry
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation(5)

### week topic

1. Introduction to child and adolescent psychiatry
2. Assessment, diagnosis and formulation in child psychiatry
3. Psychological assessment
4. Neurodevelopmental disorders I: Intellectual disability and specific learning disorders
5. Neurodevelopmental disorders II: Attention deficit-Hyperactivity disorder, Tic disorder, Tourette disorder
6. Neurodevelopmental disorders III: Communication disorders, Pervasive developmental disorder
7. Anxiety disorders I (Separation anxiety, Specific phobia, Social anxiety disorder, GAD)
8. Anxiety disorders II (Agoraphobia, Panic disorder, Selective mutism, OCD, PTSD, BDD)
9. Mood disorders (Depressive disorder, Bipolar disorder), Suicidal behavior, Non-suicidal self-injury
10. Schizophrenia spectrum disorders
11. Disruptive, impulse control and conduct disorders
12. Eating disorders (Anorexia nervosa, Bulimia nervosa)
13. Elimination disorders (Enuresis, encopresis)
14. Psychoactive substance use and addictive disorder

## Clinical Immunology

<b>Semester:</b>	10th	<b>Code:</b>	AOK-OAKV381/AOK-KA491
<b>Course type:</b>	Lecture	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	2	<b>Department:</b>	Dermatology
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation(5)

### week topic

1. The structure and the functions of the immune system. The biological significance of the self recognition.
2. Methods for clinical immunological investigations.
3. Immune-mediated tissue damage. The role of cytokines.
4. Immunology of allergic diseases.
5. Autoimmunity - Health and disease. The autoimmune diseases.
6. Genetics of immune diseases.
7. Connective tissue disorders and joint diseases.
8. Organ specific autoimmune diseases.
9. Immunodeficiencies. The immunology of HIV infection.
10. Tumor immunology.
11. Neuroimmunology.
12. Immunomodulation.

## Clinical Neonatology

<b>Semester:</b>	9 <sup>th</sup> , 10 <sup>th</sup>	<b>Code:</b>	AOK-OASZV791
<b>Course type:</b>	Seminar	<b>Category:</b>	elective
<b>Hours/week:</b>	2 hrs/ every 2 <sup>nd</sup> week	<b>Department:</b>	Pediatrics
<b>Credit:</b>	1	<b>Form of Exam:</b>	Evaluation(5)

### topics

Limit of viability in 2021. Where is the threshold?

State-of-the-art neonatal respiratory support. Is mechanical ventilation an evil act?

Neonatal chronic lung disease. Can it be ever prevented?

Necrotising enterocolitis in babies. Why did fifty years of research not deliver therapies that work?

Neonatal sepsis: can we minimise risk and avoid medicalisation of the newborn period at the same time?

How to break bad news to parents in neonatology?

Multidisciplinary decision making in neonatology: how to work together with Obstetricians and Surgeons?

The golden first hour of life – Why is it so important?

Unique challenges in the care of the extremely low birth weight infant – How can we improve their care?

Genetic abnormalities of the newborn - diagnosis, management and ethical considerations.

Resuscitation of the newborn – simulation

Case based discussions

## Clinical Oncology

<b>Semester:</b>	8th	<b>Code:</b>	AOK-OAK351
<b>Course type:</b>	Lecture	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2	<b>Department:</b>	Oncotherapy
<b>Credit:</b>	2	<b>Form of Exam:</b>	Coospace exam

### topics

Carcinogenesis, cancer etiology, epidemiology; Tumor prevention; The importance of pathology and diagnostic imaging in oncology; Cancer staging; Therapy response.

Chemotherapy; Endocrine therapy; Molecular targeted therapy and immune therapy.

Emergencies in oncology

Basic terms, the forms and physical effects of ionizing radiation; Radiotherapy equipments.

Chemical and biological effects of ionizing radiation; the aims, effects and side effects of radiotherapy; Irradiation techniques, fractionation and schedule. Teletherapy/brachytherapy

Head and neck cancers; Oesophagus and anal cancer

Hepatobiliar and pancreatic cancers

Colorectal and gastric cancers

Breast cancer

Lung Cancers

Gynaecological cancers

Supportive, palliative therapy, Hospice,

Soft tissue tumors and childhood malignancies

Brain tumors

Complex therapy of urological tumours

Skin tumours

Multidisciplinary team-work

## Dermatology

<b>Semester:</b>	9th or 10th	<b>Code:</b>	AOK-OAK281/AOK-OAK282
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2/3	<b>Department:</b>	Dermatology
<b>Credit:</b>	4/-	<b>Form of Exam:</b>	Exam/Signature

### week Lecture

### Practice

- |    |  |   |
|----|--|---|
| 1. | Introduction. The anatomy and physiology of the skin. Types of skin lesions.   | Examination of patients with dermatological diseases. Case presentations.                             |
| 2. | Bacterial diseases with cutaneous involvement. Dermatoses caused by parasites. | Primary and secondary lesions. Case presentations.  |
| 3. | Fungal diseases with cutaneous involvement. Viral diseases.                    | Special tools and techniques in Dermatology (Wood-lights, diascopy, dermatoscopy) Case presentations. |

4.	Urticaria and Contact dermatitis. Drug allergy.	Special tests in Dermatology I. In vitro and in vivo (skin) tests in allergic disorders. Case presentations.
5.	Sexually transmitted diseases I. Syphilis, HIV; Sexually transmitted diseases II. Gonorrhoea, non-gonorrheal urethritis, condyloma acuminatum, herpes genitalis.	Special tests in Dermatology II. Diagnosis of infectious diseases. Case presentations.
6.	Autoimmune blistering diseases. Atopic dermatitis.	Special tests in Dermatology. Diagnosis and treatment of STD. Case presentations.
7.	Epidermal tumors: praecancerosis, in situ carcinoma, non-melanoma skin cancer. Acne and rosacea.	Special tests in Dermatology III. Diagnosis of autoimmune diseases. Case presentations.
8.	Pigmented nevi. Melanoma malignum.	Skin biopsy, histological examinations in Dermatology. Case presentations.
9.	Benign epithelial and connective tissue tumors. Cutan lymphoma, Kaposi sarcoma, dermatofibrosarcoma protuberans, Merkel cell carcinoma.	Topical therapy in Dermatology. Case presentations.
10.	Papulosquamous skin diseases I: Psoriasis. Papulosquamous skin diseases II: Lichen ruber planus, pityriasis rubra pilaris.	Physical therapies in Dermatology I. Surgical excision, curettage, electrodesiccation, cryotherapy, radiotherapy. Case presentations.
11.	Lupus erythematosus and its variants. Scleroderma, Dermatomyositis, Alopecia.	Physical therapies in Dermatology II. Phototherapy, lasertherapy. Case presentations.
12.	Chronic wound. Thermally injured skin.	Physical therapies of venous and lymphatic insufficiencies. Case presentations.
13.	Vasculitis.	Systemic therapy in Dermatology. Case presentations.
14.	Local, systemic therapy. Phototherapy in dermatology.	Case presentations and discussions.

## Doctor-Patient Communication

<b>Semester:</b>	7th or 8th	<b>Code:</b>	AOK-OAK401
<b>Course type:</b>	Seminar	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2	<b>Department:</b>	Behavioural Sciences
<b>Credit:</b>	-	<b>Form of Exam:</b>	Signature

### The aim of the subject:

- \* Students attain the skills needed for doctor-patient consultation and for selecting from the appropriate consultation models.
- \* By the end of the course students will be aware of the importance of doctor-patient communication and its critical points.
- \* They should acquire the ethical principles of doctor-patient communication and they should be able to integrate them into their consultation behaviour. Students should know the ethical and communication methods of commitment to providing medical information.
- \* They should be able to carry out a 10-minute doctor-patient consultation, and afterwards to analyse and evaluate their performance from the video recording at a group meeting. They should be able to elaborate a medical case.

## Electrophysiology: ion channels and ion transport mechanisms in the regulation of cell functions

<b>Semester:</b>	9th	<b>Code:</b>	AOK-OAKV251/AOK-OAKV252
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	2/6 hrs total	<b>Department:</b>	Pharmacology
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation(5)/Signature

### week Topic:

1. Basic principles of electrophysiology
2. Regulation of pancreatic excretory function by ion channels
3. Electrophysiology of the brain I.
4. Electrophysiology of the brain II.
5. Molecular structures of ion channels I.
6. Molecular structures of ion channels II.
7. Ion transport mechanisms of blood-brain barrier
8. Modulation of ion channels by changing the lipid composition of the cell membrane
9. Experimental modification of ion channels: transgenic animal models
10. Diversity of potassium channel functions
11. Electric function of skeletal muscle; ionic mechanisms
12. Differences in cardiac atrial and ventricular ion channels
13. Ion channels in the regulation of smooth muscle tone
14. Discussion.

## English and Hungarian Terminology of Doctor–Patient Communication

<b>Semester:</b>	7th or 8th	<b>Code:</b>	AOK-OASZV181
<b>Course type:</b>	Practice	<b>Category:</b>	elective
<b>Hours/week:</b>	2	<b>Department:</b>	Med. Comm. and Translation
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation (5)

### week Topic:

1. Introduction, placement test (for research purposes not part of the evaluation) for both groups.
2. Basic vocabulary: names of body parts, common diseases, fields of specialty, specialists, medical documents in Hungarian and in English.
3. Taking history ("SOCRATES") relevant expressions with special regard to ways of introduction, greetings in Hungarian and in English. Revision of Hungarian question words.
4. Complaints of the patient. Vocabulary related to signs, symptoms especially pain. Revision of related adjectives in Hungarian and in English.
5. Polite forms of conversation, signposting, eliciting information in Hungarian and in English. Cultural differences in the way of asking questions.
6. Vocabulary of previous diseases – past medical history, names of surgical interventions. Revision of the past tense in Hungarian.
7. Vocabulary of family history (familial relationships, hereditary diseases, common diseases in Hungarian and in English). Revision of the possessive case.

8. Vocabulary of social history. Intercultural differences in doctor-patient conversation. Revision of Hungarian conjugation. Common suffixes in medical English.
9. Vocabulary of referrals. Explaining examinations, results – explaining causal relationship. Future tenses in Hungarian and in English.
10. Terminology of physical examinations. Giving instructions in both languages. Imperative case and its alternative („tessék + főnévi igenév”). Linguistic devices for being polite in both languages.
11. Names of medications – related terminology. Instructions about dosing (mikor, hányszor, mennyit, meddig) in both languages. Terminology of allergies. Linguistic devices for expressing possibility.
12. Discussing the diagnosis with the patient and related terminology. Lay vs. medical terms. Linguistic methods for emphasis. Revision of conditionals in both languages.
13. Special communication situations: bad news, aggressive patients. Communication with the help of interpreters. Linguistic devices for expressing empathy. ways of arguing for and against.
14. Assessing the semester. Output test. Oral presentation: role-playing a doctor-patient (33.3% of the final grade).

## Ethics in Medicine

<b>Semester:</b>	8th	<b>Code:</b>	AOK-OAK411/AOK-OAK412
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1 (for 7 weeks)/ 2 (for 10 weeks)	<b>Department:</b>	Behavioural Sciences
<b>Credit:</b>	-/2	<b>Form of Exam:</b>	Signature/Term Mark

### **week Lecture (1hr for 7 weeks)**

### **Practice (2hrs for 10 weeks)**

1.	Introduction to Bioethics - A Case Based Approach (Ethical Theories; Bioethical Principles, Doctor-Patient Relationship)	Introduction to Medical Ethics
2.	Informed Consent and the Hungarian and International Patient Rights	Basic Principles of Bioethics (Non-maleficence, Beneficence, Justice, Autonomy) – Case based approach
3.	Ethics of Human Reproduction I. (Contraception, Childbirth)	Informed Consent and Ethics of Share-Decision-Making
4.	Ethics of Human Reproduction II. – (Abortion, Assisted Human Reproduction, Genetic Engineering)	Hungarian and International Patient Rights
5.	Ethical issues in Biomedical Research – Review of International Ethical Standards	Reproductive Ethics I. – Contraception and Childbirth
6.	Ethics of Tissue and Organ Donation	Reproductive Ethics II. – Abortion, Assisted Human Reproduction, Genetic Engineering
7.	Ethical Issues at the End of Life (Palliative Medicine; Euthanasia, Hospice Care)	Ethical Aspects of Biomedical Research – Animal Experiments and Research on Human Subjects
8.	-	Ethical Issues of Tissue and Organ Transplantation
9.	-	Ethics of End-of-Life Decisions – Main Types of Euthanasia
10.	-	Ethics of End-of-Life Decisions – Palliative Medicine and Hospice

## Family Medicine

<b>Semester:</b>	8th	<b>Code:</b>	AOK-OAK611
<b>Course type:</b>	Lecture	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2	<b>Department:</b>	Family Medicine
<b>Credit:</b>	2	<b>Form of Exam:</b>	Exam

### week topics

1. Introduction. Definition of family medicine (WONCA), types of general practice.
2. Practice management. International outlook to the world
3. Family medicine team, internal and external relations. Community of practice. Home care. Role of APN. Role of social worker.
4. Prevention and screening in the family practice
5. Emergency in family practice. Specificities of the on-call system.
6. Common infectious diseases in family practice. Importance of immunisation in PC
7. Palliative care and approach. Hospice. Pain relief options. Home care.
8. Point of care ultrasound (POCUS) and point of care testing (POCT) diagnostics in family practice
9. Telemedicine possibilities and importance in family practice. Artificial intelligence in primary care
10. Paediatrics in primary care
11. Chronic diseases, care tasks of the family doctor
12. Mental illness (mood disorders, crisis, alcoholism, burnout). Role of the health psychologist.
13. Forensic aspects of family medicine
14. Consultation

## Forensic and Legal Medicine I.

<b>Semester:</b>	9th	<b>Code:</b>	AOK-OAK335/AOK-OAK336
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1/2	<b>Department:</b>	Forensic and Legal Medicine
<b>Credit:</b>	3/-	<b>Form of Exam:</b>	Exam/ Signature

### Lecture

Introduction to criminal and civil law  
 Recommendation on autopsy rules  
 Changes after death (determination of postmortem interval)  
 Classification of injuries I. (blunt force, sharp and pointed object trauma)  
 Classification of injuries II. (shot wounds, explosives, heat and cold, electrocution)  
 Head injuries, brain death  
 Alcohol in forensic medicine (metabolism, detection, related crimes)

### Practice

Autopsy (3 occasions)  
 How to fill in a death certificate?  
 Changes after death  
 Medical report of injuries  
 Rights and duties in medical care  
 Legal aspects of working as a physician  
 Signs of vitality

Poisoning (agricultural chemicals, alkaloids, corrosives, alcohols)

Suicide

DNA in forensic medicine

Case reports

Article presentation

## Forensic and Legal Medicine II.

**Semester:** 10th

**Code:** AOK-OAK337/AOK-OAK338

**Course type:** Lecture/Practice

**Category:** compulsory

**Hours/week:** 1/2

**Department:** Forensic and Legal Medicine

**Credit:** 3/-

**Form of Exam:** Exam/ Signature

### Lecture

Medical malpractice

Forensic aspects of illegal drug use

Identification

Battered child, infanticide, criminal abortion, sudden infant death

Forensic psychiatry

Forensic psychology

Transportation medicine, traffic accident

Asphyxiation

Forensic and legal aspects of pregnancy

### Practice

Autopsy (3)

Medical malpractice case presentation

Sudden death in adults

Identification

Sexual offences (adults)

Prescription drug (ab)use

Prison health care

Healing and residual conditions of injuries

Assessment of disability. Fitness to drive.

Article presentation

## Healthcare Management

**Semester:** 10th

**Code:** AOK-OAK261

**Course type:** Lecture

**Category:** compulsory

**Hours/week:** 2

**Department:** Health Economics

**Credit:** 2

**Form of Exam:** Evaluation(5)

### topic

The socio-economic context of health care: characteristics of health care; state involvement, solidarity and insurance; fair distribution and social expectations

Principles in health economics: economic problems in health care; marginal utility; substitutions; scarcity; supply-demand equilibrium; elasticities

The healthcare market: Consumer knowledge and perfectly competitive markets; consumption of healthcare services, derived demand; the impact of information asymmetry; Akerlof's "Market for lemons"; the regulated market in health

Healthcare finance: Money flows in healthcare; moral hazard; fundamentals of Health Insurance Schemes, the role of the private sector; setting up a well-functioning health insurance system; patient payment; type of healthcare systems

Healthcare systems in the world: structure and financing of different healthcare levels in different countries: financing of family doctor care; outpatient care; financing of inpatient care (HBCS); adoption of new technologies

Decision Economics: costs and benefits of free resources and resource allocation; funding threshold; health economics decision support

Health economics analyses and methods: classification of health economics analyses (cost-minimization, cost-effectiveness, cost-benefit, cost-benefit analysis); allocation and collection of costs; quantification of health gains: QALY, DALY; health-related quality of life (EQ-5D questionnaires)

Quality in health care: the concept of quality; quality development model; risk and risk management; performance evaluation in health care

Pharma economics: basic concepts; drug expenditures; characteristics and international trends in the pharmaceutical industry; economics of orphan drugs; drug supply in developing world; Pharma market players, market reorganization; focusing therapeutic areas; advancement of biological therapies, pricing of medicines; the value of therapy; background to the price support decision

Behavioral economics of healthcare service delivery: The impact of behavior on the organization, acceptance, and effectiveness of therapy; adherence; the psychosocial pathway of personalized therapy; defensive medicine and overdiagnosis

Healthcare marketing: the marketing mix in health services; consumer behavior in health markets; loyalty; marketing communication in health care

## How to use microbiology laboratory results to diagnose and treat infectious diseases; interactive; problem-based case discussions

<b>Semester:</b>	9th or 10th	<b>Code:</b>	AOK-OAKV291
<b>Course type:</b>	Lecture	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	2	<b>Department:</b>	Clinical Microbiology
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation(5)

### week   topic

1. Principles of microbiological sample collection and handling. Procedures for the transport of microbiological specimens. Cases will be discussed where these procedures have a great influence on the outcome of laboratory investigations.
2. Upper and lower respiratory tract infections. Community-acquired and nosocomial pneumonia cases will be discussed in details. How to choose adequate antibiotic therapy? The value of microbiological tests in these cases will be discussed.
3. Upper and lower urinary tract infections. Differences in antibiotic resistances of pathogens causing urinary tract infections. Pitfalls in laboratory tests.
4. Differences in gastrointestinal diseases caused by bacteria, viruses and parasites. Possibilities in the laboratory diagnosis and treatment of these infections.
5. Infection or colonization. How to distinguish them using microbiological laboratory tests? Difficulties in the interpretation of laboratory results and findings.
6. Nosocomial infections, nosocomial epidemics, and laboratory methods which are suitable to follow the spread of nosocomial pathogens in a hospital environment. Cases involved in nosocomial epidemics will be discussed, together with measures taken to stop the spread of nosocomial pathogens.
7. Neuroinfections and joint infections. Laboratory methods, including molecular techniques to set up the diagnoses of central nervous system infections.

8. Infections of immunocompromised patients, special aspects of infections in case of patients with haematologic malignancy. Problems in the laboratory diagnosis of these infections.
9. Sexually-transmitted diseases and their consequences, classic and newly recognized sexually-transmitted infections. Diagnostic possibilities in case of STIs.
10. Infections caused by anaerobic bacteria, diagnostic problems and anaerobic culture possibilities.
11. Sepsis and its consequences, and blood culture techniques in the diagnosis of sepsis. Treatment possibilities in case of bloodstream infections. The spread of antibiotic resistance worldwide, development of resistance to certain antibiotics during therapy.
12. General principles of specimen collection and handling in case of viral infections. Emerging and re-emerging viral infections. Cases will be discussed where these procedures have a great influence on the outcome of laboratory investigations.
13. How to use molecular biological methods in routine clinical microbiological diagnostics? The value of these methods? Cases will be discussed where molecular techniques can help to set up the diagnosis.
14. General principles of detection and identification of infections caused by parasites.

## Hungarian Language VII.

<b>Semester:</b>	7th	<b>Code:</b>	AOK-OAK607
<b>Course type:</b>	Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	3	<b>Department:</b>	Med. Comm. and Translation
<b>Credit:</b>	-	<b>Form of Exam:</b>	Term Mark

### week   topic

1. Revision
- 2-3. Revision (Internal medicine) + Field practice (Internal medicine)
- 4-8. Pulmonology.  
The structure of the respiratory system.  
The most frequent abnormal conditions and diseases in Pulmonology. Revising the vocabulary of breathing problems, coughing and sputum. Practicing doctor–patient communication: role-play, history taking and examination of patients with respiratory problems. Giving advice to patients concerning medication. Reading simple Hungarian case histories taken from the field of Pulmonology.
8. Oral exam – history taking (Pulmonology)
9. Field practice (Pulmonology)
- 10-12. Orthopedics.  
The structure of the skeletal system. Revising the name of bones and joints. The most frequent abnormal conditions and diseases in Orthopedics. Practicing doctor–patient situations: role-play, history taking in Orthopedics. Briefing English case histories taken from the field of Orthopedics in Hungarian.
13. Field practice (Orthopedics)
14. Oral test – case summaries (Internal medicine, Pulmonology, Orthopedics)

## Hungarian Language VIII.

<b>Semester:</b>	8th	<b>Code:</b>	AOK-OAK608
<b>Course type:</b>	Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	3	<b>Department:</b>	Med. Comm. and Translation
<b>Credit:</b>	-	<b>Form of Exam:</b>	Comprehensive Exam

### week   topic

- 1-4. Gynecology. The external and internal female genital organs.  
The most frequent complaints and diseases in the field of gynecology. Practicing basic doctor–patient situations: role-play, history taking in Gynecology.  
Asking the patient about her menstruation cycle and history. Revision of Wh-questions.  
Obstetrics. Taking history concerning previous pregnancies. Deliveries and abortions.  
Complaints during pregnancy.
5. Field practice.
- 6-8. Urology.  
Urology. The most common conditions and diseases in the field of Urology: cystitis, kidney stones, pyelonephritis.  
Practicing doctor–patient situations: role-play, history taking in Urology. Briefing English case histories taken from the field of Urology in Hungarian.
9. Oral exam
- 10-14. General revision. Practicing doctor–patient dialogues in all covered medical fields. Revision.  
Practicing doctor–patient situations that can emerge at medical and surgical departments.  
Interviewing and examining patients, sending them for further investigations, giving advice on diet, life style, and medication.

## Infectology - Infectious Diseases (Internal Medicine IV.)

<b>Semester:</b>	9th	<b>Code:</b>	AOK-OAK275/AOK-OAK276
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2/2	<b>Department:</b>	Internal Medicine
<b>Credit:</b>	3/-	<b>Form of Exam:</b>	Exam/Signature

### week   Lecture

### Practice

- |    |   |   |
|----|---|---|
| 1. | Introduction to infectology,<br>Infection control                   | History, principles, distribution of infectious diseases. Epidemiological problems.<br>Pathogenetic agents.   |
| 2. | Antimicrobial therapy, antibiotic policy                            | Antibiotic stewardship, empiric and targeted antibiotic therapy. Discussion of cases.   |
| 3. | Practice of antimicrobial prophylaxis,<br>Cardiovascular infections | Clinical situations when antibiotic prophylaxis is suggested or necessary. Infective endocarditis, pathogens, diagnosis and therapy. Case discussion.   |
| 4. | Intravascular device associated infections,<br>Neuroinfections      | Central vena catheter associated infections, prevention of infection, the correct diagnosis and therapy. Different types of central nervous infections, pathogens, diagnosis, therapy and prevention. Case discussions. |

5.	Systemic fungal infections, Exanthematous infectious diseases	Fungal infections in immunocompromised patients, diagnostic tools, antifungal therapy. Case discussions. Viral infections which can cause exanthemas, symptoms, differential diagnosis, therapy, prevention. Case discussions.
6.	Respiratory tract infections	Viral and bacterial infections of upper and lower respiratory tract. Case discussions.
7.	Gastrointestinal and intraabdominal infections	Infections of the gastrointestinal and intraabdominal tract Case discussions.
8.	Joint and bone infections, Frequent multiresistant organisms	Bacterial, viral and fungal infection of joints and bones. Prosthetic joint infection. Gram-positive and Gram-negative multidrug resistant bacterial infections. Surveillance, prevention, decolonisation procedures. Case discussions
9.	Sexually transmitted and gynaecological infections. Urinary tract infections	Syphilis, gonorrhoea, Chlamydia trachomatis, herpes viruses as the sexually transmitted infections. Infections of the male, female genital tract and urinary tract. Symptoms, diagnosis and therapy. Case discussions
10.	Skin and soft tissue infections, Hepatobiliary infections	Viral and bacterial infections of the skin and soft tissue. Symptoms, diagnosis and therapy. Case discussions
11.	Infections in immunosuppression, Sepsis, Toxic shock syndrome	Pathogens which can cause infections in neutropenic, or other immunocompromised patients. Pathomechanism of the bacterial sepsis, diagnosis, therapy. Streptococcus and staphylococcus toxic shock. Case discussions
12.	Antropozoonoses, bioterrorism	Vector transmitted infections, symptoms, diagnosis and therapy. Tools of bioterrorism. Case discussions
13.	Vaccines, Most common parasitic infections	Preventable infectious diseases using vaccines. gastrointestinal and systemic parasitic infections. Case discussions
14.	Intrroduction to tropical diseases	Pathophysiology and diagnosis of tropical infectious diseases. Case discussions

## Internal Medicine II.

<b>Semester:</b>	7th	<b>Code:</b>	AOK-OAK271/AOK-OAK272
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	4/2	<b>Department:</b>	Internal Medicine
<b>Credit:</b>	5/-	<b>Form of Exam:</b>	Exam/Signature

### Lecture

Echocardiography

Infective endocarditis. Tumors of the heart

### Practice

Methods in echocardiography, reading an echocardiographic record.

Taking the case history the physical examination.

Hypertension in cardiologic aspect. Aortic dissection	Performing percussion, auscultation.
Aortic stenosis +Aortic incompetence.	Performing percussion, auscultation.
Mitral stenosis + Mitral incompetence	Performing percussion, auscultation.
Tricuspid stenosis and incompetence. Combined valvular heart disease. Prosthetic valve.	Performing percussion, auscultation.
Rheumatic fever. Myocarditis and pericarditis	The physical findings of rheumatic fever and inflammatory diseases.
Adult congenital heart diseases	Performing percussion, auscultation.
Hypertrophic and dilatative cardiomyopathy: diagnosis and treatment	Performing percussion, auscultation. The physical findings of cardiomyopathies.
Electrocardiography	Reading ECG records.
Cardiac arrhythmias	Reading ECG records learning modern antiarrhythmic treatment and procedures.
Ischemic heart diseases	Non invasive and invasive technics in the diagnosis of ischemic heart disease.
Invasive diagnostic and theraputic methods in cardiology	Non invasive and invasive technics in the diagnosis of ischemic heart disease.
Restrictive and obliterative cardiomyopathy. Chronic heart failure	Performing percussion, auscultation. The physical findings of cardiomyopathies and chronic heart failure.
Pulmonary embolism. Pulmonary hypertension.	Physical findings of pulmonary embolism and hypertension.
Cardiac rehabilitation	Possibilities in rehabilitation program.
Special cardiac conditions: women, athletics, elders. Cardiac risk stratification in non cardiac surgery	Non invasive and invasive technics in cardiology.
Acute heart failure. Failure of periferial circulation	The signs and treatment of heart failure and periferial circulation disturbances.
Revascularization in cardiac surgery	Visiting at operation theatre.
Basic hematology	Evaluation of laboratory data
Anemias	Inspection of patients with anaemia
Anemias. Hemolytic anemia	Microscopic evaluation of red cells morphology
Pancytopenias (Myelodysplastic syndromes. Aplastic anemia)	Bone marrow smears examination, physical signs of pancytopenic patients
Acut leukemia	Examination of blood and bone marrow smears with acute leukemias
Stem cell transplantation	Discussion of indications for stem cell transplantation
Myeloproliferative diseases	Palpation of spleens and enlarged livers
Malignant lymphomas. (Classification, Hodgkin disease)	Lymp nodes palpation
Aggressive lymphomas	Examination of blood and bone marrow smears with lymphomatic infiltration
Malignant lymphomas. (Indolent lymphomas, multiple myeloma)	X ray consultation, physical examinations
Coagulation abnormalities. (Thrombophilias)	Bleeding manifestations

### Internal Medicine III.

<b>Semester:</b>	8th	<b>Code:</b>	AOK-OAK273/AOK-OAK274
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	5/total 20x 90 min & 11x45 min	<b>Department:</b>	Internal Medicine
<b>Credit:</b>	5/-	<b>Form of Exam:</b>	Exam/Signature

#### **Lecture**

Glomerulonephritises.

Dietary treatment of kidney patients.

Diagnostic procedures.

Tubulointerstitial diseases. Polycystic kidney disease.

Urinary tract infections.

Tumors of kidney. Kidney stone disease.

Renal manifestations of systemic diseases (except DKD).

Diabetic kidney disease (DKD).

Pregnancy and the kidney.

Acute and chronic kidney failure, dialysis technics.

Cardiorenal syndrome.

Kidney transplantations. 45'

Management of hypertension in transplant patients. 45'

Hypertension: definition, etiology.

Hypertension: complications.

Resistant hypertension.

Insulin resistance / Metabolic syndrome. Diabetes mellitus (epidemiology, classification, pathomechanisms).

Hypothalamus and neurohypophysis.

Hypertension: therapy.

Hyperlipidaemia.

Diabetes mellitus (therapy). 45'

Diabetes mellitus (acute and chronic complications). 45'

Adenohypophysis diseases.

Neuroendocrine tumors.

#### **Practice**

Clinical approach of patients with GNs.

Dietary restrictions in kidney disease.

Physical examination. Urine analysis. Kidney biopsy.

Clinical approach of patients with tubulointerstitial diseases. Clinical approach of patients with PKD.

Clinical approach of patients with UTI.

Clinical approach of patients with renal tumors. Clinical approach of patients with kidney stones.

Clinical approach of patients with secondary kidney diseases.

Clinical approach of patients with DKD.

Pregnancy and nephropathies.

Clinical approach of patients with kidney failure. Renal replacement therapy.

Clinical approach of patients with CRS.

Clinical approach of patients with kidney transplantation.

Antihypertensive therapy after kidney transplantation.

Correct blood pressure measurement.

Clinical approach of patients with hypertension mediated organ damages.

Clinical approach of patients with resistant HTN.

Clinical approach of patients with insuline resistance and/or metabolic syndrome. Clinical approach of patients with diabetes mellitus.

Clinical approach of patients with hypothalamus diseases. Clinical approach of patients with neurohypophysis disorders.

Clinical approach of antihypertensive therapy.

Clinical approach of patients with hyperlipidaemia.

Blood glucose determination with D-cont device. Subcutaneous insulin administration. Clinical approach of patients with complicated DM.

Tumors of the adenohypophysis.

Clinical approach of patients with NETs.

Glandula suprarenale - cortical disorders: Cushing and Conn's syndromes.	Clinical approach of patients with suprarenale cortical disorders. Clinical approach of patients with Cushing and Conn's diseases.
Glandula suprarenale - medullary disorders, MEN.	Clinical approach of patients with suprarenale medullary disorders. Clinical approach of patients with MEN.
Thyroiditis, thyroid malignancy.	Clinical approach of patients with thyroiditis. Clinical approach of patients with thyroid cancer.
Addison disease and PAS.	Clinical approach of Addison disease and PAS.
Hypogonadism.	Clinical approach of patients with hypogonadism.
Obesity.	Clinical approach of patients with obesity.
Parathyroid disorders.	Clinical approach of patients with parathyroid disorders.
Osteoporosis.	Clinical approach of patients with osteoporosis.
Hyper- and hypothyroidism.	Clinical approach of patients with hyperthyroidism. Clinical approach of patients with hypothyroidism.

## Internal Medicine V.

**Semester:** 10th  
**Course type:** Lecture/Practice  
**Hours/week:** 2/ total 13x90 min  
**Credit:** 3/-

**Code:** AOK-OAK277/AOK-OAK278  
**Category:** compulsory  
**Department:** Internal Medicine  
**Form of Exam:** Evaluation(5)/Signature

### week Lecture

### Practice

1. Rheumatoid arthritis.	Physical examination of the joints, identification of the characteristics of rheumatoid arthritis from the history and the physical examination of the patients.
2. Systemic lupus erythematosus. Antiphospholipid syndrome. Principles of immunosuppressive therapy.	Lupus-specific physical findings – skin, vasculitis, Raynaud's, Jaccoud arthritis. The principles and practice of immunosuppressive therapy. Approach to an immunocompromised patients.
3. Spondylarthritides.	Physical examination of the spine, differentiation between inflammatory and degenerative spinal diseases. Dactylitis, enthesitis. Differential diagnosis of diseases with polyarthritis.
4. Degenerative diseases of the spine. Gout.	Typical symptoms, physical findings in patients with osteoarthritis and herniated disc. Differential diagnosis of back pain. Regional physical diagnostics of pain syndromes.
5. Systemic vasculitides.	Review of the disease course of ANCA-vasculitis through interview of patients. Radiographic evaluation of interstitial lung disease chest CT-scans. Specific questions to identify rare but life-endangering vasculitis syndromes in medical practice. Specific physical findings, and the importance of urinalysis in immunology.

6.	Sjögren's syndrome. Myositides. Systemic sclerosis (scleroderma).	Examination of autoimmune-specific physical findings: sicca complex, sclerodactylia, sclerodermiform skin changes, calcinosis, teleangiectasia, etc. Differential diagnosis of Raynaud's phenomenon. Clinical approach to a patient with myositis
7.	Fever, ion abnormalities.	Clinical approach of patients with fever. Clinical approach of patients with ion abnormalities.
8.	Edema, hematuria, proteinuria.	Clinical approach of patients with edema, hematuria, proteinuria.
9.	Arrhythmias, syncope.	Clinical approach of patients with chest pain and syncope.
10.	Cyanosis, dyspnea. Pulmonary aspects. Cyanosis, dyspnea. Cardiology aspects.	Clinical approach of patients with cyanosis, dyspnea.
11.	Anaemia, lymphadenomegaly.	Clinical approach of patients with anemia. Clinical approach of patients with lymphadenomegaly.
12.	Abdominal pain, acute abdomen, jaundice, ascites	Clinical approach of patients with abdominal pain
13.	Diarrhoea, constipation, GI motility disorders	Clinical approach of patients with diarrhea and constipation. Symptom oriented and instrumental diagnosis of gastrointestinal motility disorders.

## Introduction to Aviation and Space Medicine

<b>Semester:</b>	7th or 9th	<b>Code:</b>	AOK-OAKV131
<b>Course type:</b>	Lecture	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	2	<b>Department:</b>	Aviation and Space Medicine
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation(5)

### week topic

1.	The history, subject, position and role of aviation and space medicine in medical sciences.
2.	The effect of the dynamic factors of aviation on the pilot's body. The pilot's life-saving equipment.
3.	The effects of noise and vibration on the human body during flight.
4.	The basics of aerodynamics. The composition, layers and main physical properties of the atmosphere.
5.	The medical qualification of pilots and parachuters. The ergonomical characters of the cockpit of an aircraft.
6.	The effects of short- and long-range flights from the passenger's point of view.
7.	Medical Evacuation by Air (MEDEVAC) Transportation of Sick and Wounded Patients by Air.
8.	The pilot's lifestyle, nutrition and sports.
9.	The adverse effects of changes in baropressure on the human body. The effect of reduction in partial oxygen pressure on the human body, its importance in aviation. Pressure oxygen breathing. The pressurized cabin.
10.	The psychophysiological characters of the pilot's personality. The fatigue and overload of aircrews
11.	Decompression sickness.

12. Spatial alertness in flight, flight illusions. Motion sickness in aviation.
13. The physiological effects of space flight on the human body. The basic principles of astronaut selection and training.

## Introduction to the approach to the critically ill patient-the basic bedside clinical skills

<b>Semester:</b>	8th	<b>Code:</b>	AOK-OAK241/AOK-OAK242
<b>Course type:</b>	lecture/practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1/2	<b>Department:</b>	Anaesthesiology & Int. Ther.
<b>Credit:</b>	-/2	<b>Form of Exam:</b>	Signature/Term Mark (5)

<u>week</u>	<u>Lecture</u>	<u>Practice</u>
1.	Proper place for point- of-care sonography Ultrasound techniques and point-of-care sonography Basic properties of ultrasound machines, basic settings, transducers	Online lectures
2.	Basic US planes of the heart. Estimation of global left ventricular function and heart chamber dimensions. Suspicion and identification of acute myocardial infarction, acute valvular regurgitation, acute right-heart failure. Identification of pericardial effusion. US-guided pericardial tap (pericardiocentesis)	Online test exam
3.	Role of point-of-care sonography during management of polytraumatised patients: FAST („focused assesment with sonography for trauma”) Suspicion and identifying of abdominal and pelvic fluid collections, hematomas, bleeding, urinary retention. US-guided abdominal tap. US-guided peritoneal tap Signs of atelectasis, infiltration Pleural effusion, pneumothorax	1. practice: ABCDE, oxygen therapy airway management mask-balloon ventilation
4.	Role of transoesophageal ECHO in the cardiac surgery anesthesia Examination of inferior vena cava, collaptibility, fluid responsiveness. US guided vascular interventions: insertion of a central venous cannula, US guided intervention: percutaneous tracheotomy Role of ultrasound in intracranial pathology (trauma, intracranial bleeding, intracranial pressure elevation ): measurement of n. opticus diameter, role of transcranial Doppler ultrasound	2. practice: basics of medication and infusion therapy Parenteral drug administration techniques vein puncture, blood sampling Bladder catheterization
5.	Ultrasound guided regional anaesthesia: basic principles. Regional anaesthesia of the thrunk, the upper and the lower limb, nerve blockades.	3. practice: ABCDE, situatio
6.	Bedside practice	

## Laboratory Diagnostics: Use of Laboratory Tests in Practice

<b>Semester:</b>	8th or 10th	<b>Code:</b>	AOK-OAKV401
<b>Course type:</b>	Lecture	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	2	<b>Department:</b>	Laboratory Medicine
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation(5)

### week   topic

1. Introduction to laboratory diagnostics
2. Visit at the Department of Laboratory Medicine
3. Endocrinology I.  
Case presentations in endocrinology – a case oriented approach: Functional tests and diagnostic algorithms in the investigation of endocrine abnormalities
4. Endocrinology II.  
Case presentations in endocrinology – a case oriented approach: Functional tests and diagnostic algorithms in the investigation of endocrine abnormalities
5. Laboratory diagnosis of renal diseases: Managing patients with acute and chronic renal failure, diagnosis of impaired glomerular and tubular function. Differential diagnosis of proteinuria
6. Cardiovascular risk assessment and laboratory management of patients with cardiovascular diseases: case discussions – Evidence-based practice of AMI, acute coronary syndrome and congestive heart failure. Differential diagnosis of acute chest pain and dyspnoea.
7. Clinical significance and application of tumor markers
8. Laboratory diagnosis of coagulation disorders: Cases on the diagnosis of thrombo-embolic events (DVT, PE, congenital thrombophilias, lupus anticoagulant and anti-phospholipid syndrome) and bleeding disorders
9. Haematology cases: differential diagnosis of anaemia, diagnosis of monoclonal gammopathies, use of flow cytometry in haemato-oncology
10. Autoimmun disorders
11. Therapeutic drug monitoring: Role of TDM in patients treated with lithium, digoxin, antibiotics and immunosuppressive medications. Toxicology: Cases on drug overdose and ingestion of toxic substances.
12. Postanalytical cases

## Medical history-taking in Hungarian I.

<b>Semester:</b>	9th	<b>Code:</b>	AOK-OASZV701
<b>Course type:</b>	Practice	<b>Category:</b>	elective
<b>Hours/week:</b>	2	<b>Department:</b>	Med. Comm. and Translation
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation (5)

### week   topic

1. Revision: the structural format of history-taking, an overview
2. **Neurology:** the most frequent neurological diseases and their associated complaints
3. Performing a neurological physical examination; a brief description of the most frequently used investigations in neurology

4. Taking a focused history in neurology: falls, loss of consciousness
5. Taking a focused history in neurology: different types of headaches
6. Taking a focused history in neurology: weakness, numbness/paresthesia
7. Taking a focused history in neurology: dizziness, hearing loss, speech disorders
8. Oral exam: history taking and physical examination in neurology
9. **Pediatrics:** a set of unique challenges; the components of pediatric history
10. Developmental milestones in children; the ways of inquiring about these milestones
11. Taking a focused history in pediatrics: vomiting and diarrhea
12. Taking a focused history in pediatrics: cough, dyspnea, failure to thrive, behavioral abnormalities
13. Taking a focused history in pediatrics: accidents, convulsions
14. Oral exam: case summaries in neurology and pediatrics - the students' oral case reports based on their own clinical practice

## Medical history-taking in Hungarian II.

<b>Semester:</b>	10th	<b>Code:</b>	AOK-OASZV702
<b>Course type:</b>	Practice	<b>Category:</b>	elective
<b>Hours/week:</b>	2	<b>Department:</b>	Med. Comm. and Translation
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation (5)

### week   topic

1. **Dermatology:** the skin and its appendages; the most typical dermatological diseases and their symptoms
2. Approaching skin lesions: duration, location, provoking or relieving factors, associated symptoms, underlying malignancies, etc.
3. Taking a focused history in dermatology: an itchy rash
4. Taking a focused history in dermatology: a nevus that has enlarged
5. **Ophthalmology:** vision, visual disorders, the most frequent diseases of the eyes
6. Eye injuries, the patients' complaints, ophthalmological examinations
7. Taking a focused history in ophthalmology: red and itchy eye, cataract, glaucoma
8. Oral exam: history taking in dermatology and ophthalmology
9. **ENT:** the most frequent ENT diseases and their associated complaints
10. Performing ENT examinations, giving instructions to patients
11. Taking a focused history in ENT: otalgia and hearing loss
12. Taking a focused history in ENT: hoarseness and sore throat
13. Selected case summaries in the clinical fields covered in the semester
14. Oral exam: case summaries in the medical fields covered in the semester.  
The students' oral case reports based on their own clinical practice

## Medical Psychology I.

<b>Semester:</b>	7th	<b>Code:</b>	AOK-OAK421/AOK-OAK422
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1 (for 5 weeks)/ 2 (for 10 weeks)	<b>Department:</b>	Behavioural Sciences
<b>Credit:</b>	2/-	<b>Form of Exam:</b>	Evaluation (5) /Signature

<u>week</u>	<u>Lecture</u>	<u>Practice</u>
1.	Introduction; Health – Health Promotion	Adherence in type patient–physician relationship
2.	Illness: Symptoms; Experience of Illness	CLASS model, bio-psycho-social model, system theory
3.	Nature-Nuture; Biological-Psychological factors	Active listening skills and Acknowledgement of Emotion strategies
4.	Stress	Suggestive Communication
5.	Chronic illness, Thanatological aspect of medicine	Motivational interview I.
6.		Motivational interview II.
7.		Building competence through video analyses
8.		Consultation
9.		CLINICAL PRACTICES
10.		CLINICAL PRACTICES
11.		CLINICAL PRACTICES
12.		Skill lab practice I.
13.		Skill lab practice II.

## Medical Psychology II.

<b>Semester:</b>	8th	<b>Code:</b>	AOK-OAK431/AOK-OAK432
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1/3(for 5/5 weeks)	<b>Department:</b>	Behavioural Sciences
<b>Credit:</b>	2/-	<b>Form of Exam:</b>	Signature/Term Mark

<u>week</u>	<u>Lecture</u>	<u>Practice</u>
1.	Introduction. Psycho-neuro-immunology, Psychosomatic Perspective	Review. Medically unexplained symptoms (MUS).
2.	Attachment / Personality, Personality Disorders	Management of upset patient
3.	Psychological Interventions I.	Communication with different age groups /Crisis
4.	Psychological Interventions II.	Burnout
5.	Psychological Interventions III.	Situational exercises

## Medically Unexplained Physical Symptoms MUPS in Medical Praxis

<b>Semester:</b>	8-10th	<b>Code:</b>	AOK-OASZV741
<b>Course type:</b>	Practice	<b>Category:</b>	elective
<b>Hours/week:</b>	24	<b>Department:</b>	Behavioural Sciences
<b>Credit:</b>	1	<b>Form of Exam:</b>	Term Mark (5)

### week Lecture

1. Challenges and background of medically unexplained physical symptoms. - Lecture and interactive discussion.
2. Understanding the boundaries of health and illness, and related dilemmas. MUPS and doctor-patient relationship. - Working with the e-learning individually and interactive student groups: Module 1) Health culture, and doctor-patient relationship.
3. The importance of building trust, empathy, and patient centeredness in the treatment of MUPS patients. - Lecture and interactive discussion.
4. MUPS in intercultural context. - Working with the e-learning program individually and interactive student groups: Module 4) What happens when cultures meet? Doctor-patient encounters in context.
5. MUPS treatment recommendations and case discussions with videos. - Lecture and interactive discussion.

## Modern Complex Therapy of Malignant Diseases in Clinical Practice

<b>Semester:</b>	9th	<b>Code:</b>	AOK-OAK352
<b>Course type:</b>	Seminar	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1	<b>Department:</b>	Oncology
<b>Credit:</b>	2	<b>Form of Exam:</b>	Final report/Practice Mark/Online exam

### topic

The essentials of medical therapy: chemotherapy, endocrine therapy, biological agents

Radiotherapy, The technical basics of radiotherapy

Supportive and palliative therapy, holistic care

Gastrointestinal malignancies

Breast cancer

Gynecological malignancies

Genitourinaryl malignancies

Head and neck cancers

Dermatological cancers, melanoma

Central nervous system, and pediatric malignancies

Lung cancer

Rare malignant diseases

Multidisciplinary approaches and team-work

Psychooncological aspects

Final report (online)

## Rehabilitation medicine – Basics of theory and daily practice

<b>Semester:</b>	8th, 10th	<b>Code:</b>	AOK-OAKV501
<b>Course type:</b>	Lecture	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	2	<b>Department:</b>	Rehabilitation Medicine
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation(5)

### topic

The approach of disability

Concept of comprehensive rehabilitation

The rehabilitation process, term and content of the rehabilitatio programme

The rehabilitation consultation

The functional assessment

Main interventions used in rehabilitation

Prevention and rehabilitation

The main types of rehabilitation: post stroke, brain injury, spinal cord injury, post orthopedic-traumatological surgery, amputees, rheumatological, cardiological, pulmonological, rehabilitation of children

Medical aids used in rehabilitation

## Neurology I.

<b>Semester:</b>	9th	<b>Code:</b>	AOK-OAK381/AOK-OAK382
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1/2	<b>Department:</b>	Neurology
<b>Credit:</b>	3/-	<b>Form of Exam:</b>	Exam/Signature

### **Schedule of the neurology practice:**

- discussion of theoretical topics, following the guidelines below (after the first practice, the students will prepare and present the topics)
- Patient examination – history, physical exam, conclusions (during the first practices and in interesting cases we will do it together otherwise in small groups ), the discussion of results of the exam together, practice
- If possible presentation of radiological findings related to neurology
- Two MTO-s during the semester, the first is based on the neurological examination performed by another teacher, the second is a written test

### week   Lecture

### Practice

1. Neurological examination. Evidence-based medicine, personalised medicine.

Introduction, the procedure of medical diagnostics (history, physical examination, instrumental examinations, therapy, limitations), history of neurology and its place in medicine, special issues in neurology (limitations of direct examination, the interpretation of indirect symptoms and signs, neurological localisation). Central and peripheral nervous system.

2.	Spinal cord: neurological localisation.	Resting potential, electrotonic potential, action potential, neurotransmitters, receptors. Tendon reflexes, exteroceptive reflexes, muscle tone. The anatomy and function of pyramidal tract, pyramidal signs. Neuromuscular junction. The symptoms of upper and lower motor neuron damage. Muscle strength scale.
3.	Pyramidal system.	Basal ganglia: anatomy, function, symptoms, testing (parkinsonism, chorea, ballismus, athetosis, dystonia). Symptoms of peripheral nerve damage, most important peripheral nerves, symptomatology, roots
4.	Extrapyramidal system.	Goll-Burdach tract, spinothalamic tract, pain-anatomy, function, symptoms, testing.
5.	Somatosensory system. Pain.	Neck stiffness, meningeal irritation signs (Kernig, Brudzinski), irritation of the roots (Lasegue and femoral traction sign). Cranial nerves: I-VI, anatomy, function, testing. Supranuclear gaze disturbances.
6.	Cerebellum. Neurological localisation.	Cranial nerves: VII-XII anatomy, function, symptoms, testing. Peripheral and central facial and hypoglossal palsy. Bulbar and pseudobulbar symptoms.
7.	Brain stem, cranial nerves. Neurological localisation.	Cerebral lobes: frontal, temporal, occipital, parietal lobar functions, symptoms, testing. Liberation reflexes. Speech disturbances: aphasia, dysarthria, aphonia.
8.	Circulation of the nervous system. Neuroradiological diagnostics.	Buffer for the first MTO
9.	Cerebral lobes: Neurological localisation.	Brain circulation. Cerebellum: anatomy, function, symptoms (archi, paleo, neocerebellum), testing.
10.	Autonomic nervous system. Limbic system.	Vegetative system: anatomy, function, symptoms, tests. Limbic system
11.	Impaired awareness. Brain death.	Alteration of the consciousness, Causes, differentiation, examination of the patients with impaired consciousness, brain death.
12.	Neurophysiological examinations.	Instrumental exams in neurology: imaging (ultrasound, CT, MRI, angiography etc), electrophysiology: EEG, evoked potentials, ENG, EMG
13.	CSF diagnostics.	Cerebrospinal fluid, indication of spinal tap, interpretation of results.
14.	Neurological localization.	Practice Repetition, feedback

## Neurology II.

<b>Semester:</b>	10th	<b>Code:</b>	AOK-OAK383/AOK-OAK384
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1/1	<b>Department:</b>	Neurology
<b>Credit:</b>	-/3	<b>Form of Exam:</b>	Signature/Term Mark

<b>week</b>	<b>Lecture</b>	<b>Practice</b>
1.	Ischemic stroke.	Cerebrovascular diseases (TIA, ischaemic stroke, apoplexy, subarachnoideal hemorrhage, sinus thrombosis)
2.	Hemorrhagic stroke.	
3.	Epilepsy. Sleep disturbances.	Epilepsy (epileptic seizures epilepsy, classification, diagnosis, therapy)
4.	Neurocognitive disorders.	
5.	Extrapyramidal/Movement disorders I.	Extrapyramidal diseases (Parkinson disease, Parkinson syndromes, Huntington chorea, Wilson's disease, essential tremor)
6.	Extrapyramidal/Movement disorders II.	
7.	Neuropathic pain.	
8.	Diagnosis and treatment of headaches.	Headaches (migraine, cluster, tension type headache), tumors of the CNS
9.	Tumors of the central nervous system.	
10.	Muscle and motoneuron disorders.	
11.	Autoimmune neurological disorders.	Neurological diseases of immunological origin (multiple sclerosis, myasthenia gravis, Guillain-Barré syndrome), ALS
12.	Neuroinflammatory disorders.	Inflammatory diseases of the CNS – meningitis, encephalitis
13.	Case presentations	Repetition, feedback

## Neurosurgery

<b>Semester:</b>	10th	<b>Code:</b>	AOK-OAK321/AOK-OAK322
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1/1	<b>Department:</b>	Neurosurgery
<b>Credit:</b>	2/-	<b>Form of Exam:</b>	Evaluation(5)/Signature

<b>week</b>	<b>Lecture (2 hrs/every 2nd week)</b>	<b>Practice (2 hrs/every 2nd week)</b>
1.	Introduction to neurosurgery, Emergency neurosurgical cases I.: Traumatic Brain Injury	Material of the lecture in practice.

2.	Diagnostic procedures in neurosurgery, Emergency neurosurgical cases II: Head I (intracranial mass lesions, infection)	Material of the lecture in practice.
3.	Emergency neurosurgical cases III: Head III (cerebrovascular), Spine (trauma, degenerative, infection)	Material of the lecture in practice.
4.	Cerebrovascular diseases	Material of the lecture in practice.
5.	Neurosurgical treatment of central nervous system tumors	Material of the lecture in practice.
6.	Spine surgery: traumatic injuries, degenerative disorders, infections	Material of the lecture in practice.
7.	Other: Endovascular treatment, movement disorder and pain surgery, pediatric neurosurgery and hydrocephalus	Material of the lecture in practice.

## Nuclear Medicine

<b>Semester:</b>	7th or 9th	<b>Code:</b>	AOK-OAKV471
<b>Course type:</b>	Lecture	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	1	<b>Department:</b>	Nuclear Medicine
<b>Credit:</b>	1	<b>Form of Exam:</b>	Evaluation (5)

### week   topic

1.	Nuclear medicine physics History Basic principles of nuclear physics and radiation biology
2.	Instrumentation of nuclear medicine Radiation detector systems Gamma camera Single photon emission computed tomography Positron emission computed tomography (PET), PET/CT
3.	Radiopharmacology Tracer principle Production of radionuclides Radiopharmaceutical chemistry
4.	Nuclear medicine in disorders of bones and joints Bone scintigraphy Joint scintigraphy Bone marrow scintigraphy Complementary investigations of the bones and joints
5.	Nuclear cardiology I. Myocardial perfusion studies, Cardiac function /ERNA (equilibrium radionuclid angiography) , Cardiac function / FPRNA (first pass radionuclid angiography)
6.	Nuclear cardiology II. Nuclear imaging in infection and inflammation of cardiovascular system, Nuclear imaging in malignancy of the heart , Imaging of transthyretin cardiac amyloidosis, Myocardial viability
7.	Nuclear medicine investigations of the respiratory system Lung perfusion investigation Lung ventilation investigations Diagnosis of pulmonary embolism
8.	Nuclear medicine in gastroenterology Hepatobiliary scintigraphy Differential diagnostics of focal liver lesions Scintigraphy of the salivary glands Oesophagus passage study Gastric motility study Gastrointestinal bleeding site detected by radioisotopes Meckel's diverticulum detection Investigations of intestinal inflammations Investigations in malabsorption (Schilling test)
9.	Endocrinological aspects of nuclear medicine Thyroid scintigraphy Parathyroid scintigraphy Adrenal scintigraphy Neuroendocrine tumor imaging techniques
10.	Nuclear medicine in urogenital disorders Static renal scintigraphy Dynamic studies Vesicoureteric reflux study Evaluation of renal transplants Scrotum scintigraphy Radionuclide hysterosalpingography

11. Nuclear oncology Tumour markers Tumouraffin radiopharmaceuticals and their applications  
Oncological aspects of bone marrow scintigraphy Scintigraphy of the lymphatic system,  
sentinel lymph node detection Oncological aspects of PET, PET/CT and SPECT/CT studies
12. Nuclear medicine in therapy Thyroid disorders treated with radioisotopes Radiosynovectomy  
Palliative treatment of bone metastases Possibilities in radioimmunotherapy Neuroendocrine  
tumours treated with <sup>131</sup>I-MIBG <sup>32</sup>P treatment in polycythaemia vera
13. Nuclear medicine of the central nervous system (CNS) Brain angioscintigraphy and blood-  
brain barrier scintigraphy Cerebrospinal fluid scintigraphy Brain SPECT studies Neuroreceptor  
SPECT Brain tumors evaluated by SPECT Brain PET studies
14. Summary

## Obstetrics and Gynaecology I.

<b>Semester:</b>	7th	<b>Code:</b>	AOK-OAK501/AOK-OAK502
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	3/2	<b>Department:</b>	Obstetrics and Gynaecology
<b>Credit:</b>	4/-	<b>Form of Exam:</b>	Exam/Signature

### Lecture

Introduction. Concepts of obstetrics and gynaecology and its role in modern medicine. Historical review.

Development and function of the placenta. Development of the fetus.

Endocrinology of pregnancy.

Obstetrical anatomy. Diagnosis of pregnancy.

Genital and extragenital changes during pregnancy.

Signs of the fetal life. The mature placenta, umbilical cord, membranes and amniotic fluid.

Intrauterine position of the fetus.

Antenatal care and examinations.

Normal mechanism of labour.

Patient care during labour.

Pharmacokinetics in pregnancy. Registration of the uterine activity.

Diseases of the trophoblast.

Monitoring of the fetus and placenta.

Physiology of the uterus.

Obstetrical ultrasonography.

The newborn. Care and management. The puerperium.

Abortion.

### Practice

Prenatal care. Obstetrical history, physical examination.

Pregnancy tests

Induction of labour

Ultrasonography

Follow up examinations during pregnancy

Genetics, CVS, AC, Cordocentesis

Preparation for labour

CTG, OCT, AS, X ray

Normal delivery

Induced abortion. Surgical aspects.

Forceps delivery, vacuum extraction

Breech presentation

Postpartal hemorrhage

Caesarean section

Ectopic pregnancy.

EPH-gestosis.

Breech presentation and delivery.

Multiple pregnancy.

Premature labour.

Management of delivery. Induction of labour.

Intrauterine death. Postmaturity. Dysmaturity.

Alternative delivery methods.

## Obstetrics and Gynaecology II.

<b>Semester:</b>	8th	<b>Code:</b>	AOK-OAK503/AOK-OAK504
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	3/2	<b>Department:</b>	Obstetrics and Gynaecology
<b>Credit:</b>	4/-	<b>Form of Exam:</b>	Exam/Signature

### Lecture

Uterine rupture, postpartal haemorrhage, abnormal puerperium.

Causes of 3rd trimester bleeding (premature separation of the placenta, DIC, plac. praevia).

Dysmaturity. Hyperemesis.

Erythroblastosis fetalis.

Dystocia (difficult labor) pelvic dystocia due to uterine dysfunction, dystocia of fetal origin, dystocia of placental origin.

Infectious diseases and pregnancy.

Respiratory, renal, neurologic, endocrine and metabolic diseases.

Benign tumors of the uterus.

Diseases of the cervix. Cancer screening.

Pelvic inflammatory diseases. Diseases of the Fallopian tube.

Medical complications during pregnancy. (Heart, haematologic, gastrointestinal diseases.)

Genetic disorders.

Birth control. Contraception.

Abnormalities of the menstruation.

Climacteric.

Ethical aspects of Obstetrics-Gynaecology.

### Practice

Gynaecological history taking, physical and pelvic examinations.

Screening methods for cervical cancer: cytology.

Screening methods for cervical cancer: colposcopy.

Curettage, cervical biopsy, electrocauterisation, conisation.

Female infertility, diagnostic procedures.

Infertility study of the male partner.

Labor procedures of infertility.

Conception control.

Endoscopy.

Abdominal gynaecological operations.

Vaginal surgical procedures.

Adolescent gynaecology.

Physiotherapy in gynaecology.

Radio- and chemotherapy.

Psychosexual diseases.

Endometriosis.

Assisted fertilization in the female.

Gynaecological endoscopy.

Infertility of the female.

Benign ovarian tumors.

Malignant ovarian tumors.

Adolescent gynaecology.

Infertility of the male.

Diseases of the vulva and vagina.

## Ophthalmology

<b>Semester:</b>	9th or 10th	<b>Code:</b>	AOK-OAK491/AOK-OAK492
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2/2	<b>Department:</b>	Ophthalmology
<b>Credit:</b>	3/-	<b>Form of Exam:</b>	Exam/Signature

<u>week</u>	<u>Lecture</u>	<u>Practice</u>
1.	General introduction	VA (visual acuity)
2.	Ocular anatomy and physiology	Pupil reactions/eye movements/color saturation
3.	Lids, lacrimal system	VF (visual fields)
4.	Glaucoma	Instruments (ophthalmoscope, slit lamp, tonometer etc)
5.	Conjunctiva	Emergencies (CRAO, palsies, injuries, A-AION)
6.	Cornea	Surgeries
7.	Lens	Photos
8.	Sclera and orbit	Ocular injuries and acute red eye
9.	Uvea	Contact lens
10.	Retina	Lasers (argon, YAG, diode, excimer, femto)
11.	Retinal detachment and vitreous	Pediatric and eye movements
12.	Neuro-ophthalmology	OCT and angio
13.	Eye and systemic diseases	Ultrasound
14.	Pediatric	Consultations

## Oral and Maxillofacial Surgery, Stomatology

<b>Semester:</b>	9th	<b>Code:</b>	AOK-OAK251/AOK-OAK252
<b>Course type:</b>	Lecture/Seminar	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1/1	<b>Department:</b>	Oral and Maxillofacial Surgery
<b>Credit:</b>	2/-	<b>Form of Exam:</b>	Exam/Signature

### topics:

Cleft lip and palate surgery

Anatomy of the oral cavity. General principles of dentistry. Pediatric dentistry.

Principles of trauma management. Conservative treatment of facial trauma. Mandibular fracture  
 Midface, frontal skull base fractures  
 Etiology and diagnosis of oral cancer  
 Medication related osteonecrosis of the jaws  
 Dental and facial prostheses  
 Implantology. Preprosthetic surgery.  
 Medical consequences of oral and dental diseases  
 Dental trauma  
 Orthognathic surgery  
 Distraction osteogenesis  
 Trismus  
 Temporomandibular joint surgery  
 Oral symptoms of health conditions  
 Periodontal disease and general consequences  
 Surgical management of oral cancer  
 Salivary gland diseases  
 Virtual planning in maxillofacial and dental surgery  
 Dentoalveolar surgery. Cysts.  
 Orthodontics  
 Reconstruction of orofacial defects  
 Differential diagnosis of facial pain  
 General medicine in perioperative oral and maxillofacial care  
 Odontogenic infections  
 Emergencies in oral and maxillofacial surgery.  
 Craniofacial disorders  
 Plastic and cosmetic surgery in the maxillofacial region

## Orthopedics

<b>Semester:</b>	7th	<b>Code:</b>	AOK-OAK391/AOK-OAK392
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2/2	<b>Department:</b>	Orthopedics
<b>Credit:</b>	3/-	<b>Form of Exam:</b>	Exam/Signature

<b><u>week</u></b>	<b><u>Lecture</u></b>	<b><u>Practice</u></b>
1.	Field of orthopaedics, history. Diagnosis and treatment of orthopaedic disorders.	The course of the examination of the patients with locomotor system diseases. Diagnostic means. X-ray demonstration. Case report.
2.	Disorders of the spine in childhood. Scoliosis.	Examination of the neck and cervical spine. Disorders of the neck and cervical spine. X-ray demonstration. Case report.
3.	General affections of the skeleton	Examination of the trunk and spine. Disorders of the trunk and spine. X-ray demonstration. Case report.
4.	Congenital deformities and disabilities	Examination of the scoliosis. Diagnostic means. X-ray demonstration. Case report.
5.	Disorders of the foot (congenital club foot, pes planovalgus)	Examination of the shoulder and elbow. Disorders of the shoulder and elbow. X-ray demonstration. Case report.

6.	Arthritis, osteomyelitis, tuberculous arthritis	Examination of the forearm, wrist and the hand. Disorders of the forearm, wrist and the hand. X-ray demonstration. Case report.
7.	Bone tumors	Examination of the hip regio. Disorders of the hip. Measuring the length of the limbs. X-ray demonstration. Case report.
8.	Infections and degenerative disorders of the spine. Spondylolysis, spondylolisthesis.	Examination of the osteoarthritis of the hip and of the knee. X-ray demonstration. Case report.
9.	Disorders of the neck and upper limbs	Examination of the knee. Disorders of the knee. X-ray demonstration. Case report.
10.	Congenital dislocation and dysplasia of the hip	Examination of the leg, ankle and foot. Disorders of the leg, ankle and foot. X-ray demonstration. Case report.
11.	Other hip disorders in childhood (Perthes disease, slipped upper femoral epiphysis. Transient arthritis of the hip.)	Infections of the bone. Arthritis. Bone tumors. X-ray demonstration. Case report.
12.	Osteoarthritis of the hip. Idiopathic necrosis capitis femoris.	Osteoarthritis. General affections of the skeleton. (Neurological disorders). X-ray demonstration. Case report.
13.	Disorders of the knee.	
14.	Neuromuscular diseases, general affections of the skeleton	

## Oto-Rhino-Laryngology

<b>Semester:</b>	9th or 10th	<b>Code:</b>	AOK-OAK301/AOK-OAK302
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2/3	<b>Department:</b>	Oto-Rhino-Laryngology
<b>Credit:</b>	4/-	<b>Form of Exam:</b>	Exam/Signature

### Lecture

Oto-rhino-laryngology in medicine.

History of oto-rhino-laryngology.

Anatomy and physiology of the ear.

Diseases of the external ear and their treatment.

Acute inflammation of the middle ear.

Complications of acute otitis media.

Non-suppurative diseases of the middle ear.

Chronic otitis media. Complications of chronic otitis media.

### Practice

Examination equipment in oto-rhino-laryngology.

Practice in use of forehead mirror and ear speculum.

Examination of the external auditory meatus and eardrum.

Practice in cleaning the external meatus. Diseases of the external meatus. Ear drops. Examination of the Eustachian tube.

Demonstration of eardrum perforations and various ear diseases.

X-ray, CT, MR pictures of the ear.

Examination of hearing by means of tuning forks.

Reconstruction of the hearing mechanism.	Measurement of hearing loss. The usual method of recording hearing by audiometer. Demonstration of various types of pure-tone audiograms. Hearing aids.
Anatomy of the inner ear. The vestibular and cochlear system.	Demonstrations of otoneurological examinations.
Examination of hearing and the vestibular system.	Clinical examination of the nose and nasal cavity. Practice in using nasal speculum. Posterior rhinoscopy. Demonstration of diseases of nasal cavity. Treatment of nasal injuries.
Diseases of the inner ear: toxic damage to the ear, inflammatory and vascular lesions of the inner ear. Acoustic trauma. Meniere's disease.	Haemorrhage from the nose. Treatment of epistaxis. Demonstration of Bellocq pack.
Diseases of the inner ear: acoustic neuroma, temporal bone fractures.	Treatment of sinusitis. Nasal drops. X-ray, CT, MR pictures of nasal sinuses. Demonstration of puncture of the maxillary sinus. Differential diagnosis of headache.
Anatomy of the nose and nasal sinuses.	Examination of the mouth and pharynx. Demonstration of pharyngeal diseases.
Diseases of the external nose and the nasal cavity.	Demonstration of tumors in the larynx and hypopharynx.
Sinusitis. Treatment and complications. Fractures of the sinuses.	Examination of the larynx. Demonstration of laryngeal diseases. Anaesthesia in oto-rhino-laryngology.
Haemorrhage from the nose. Tumors of the nose and paranasal sinuses.	Demonstration of patients after tracheostomy. Cleaning of tracheostomy tube.
Anatomy of the pharynx. Diseases of the nasopharynx.	Demonstration of esophagoscopes and bronchoscopes. The method of introducing the naso-esophageal nutrition tube. Differential diagnosis of neck nodes in practice.
Adenoid hyperplasia. Benign and malignant nasopharyngeal tumors.	
Acute and chronic inflammatory diseases of the pharynx.	
Acute and chronic tonsillitis. Peritonsillar abscess and complications.	
Indications of tonsillectomy. Tumors of mesopharynx.	
Functional anatomy of the larynx. Acute and chronic diseases of the larynx.	
Injuries of the larynx. Paralysis of the larynx.	
Tumors of the hypopharynx and the larynx.	
Classifications of malignant laryngeal tumors.	
Treatment of laryngeal tumors.	
Diseases of the oesophagus and the inferior respiratory tract.	
Differential diagnosis of neck nodes.	

## Pediatrics I.

<b>Semester:</b>	9th	<b>Code:</b>	AOK-OAK311/OAK312/OAK313
<b>Course type:</b>	Lecture/Practice/Seminar	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1/2/2	<b>Department:</b>	Pediatrics
<b>Credit:</b>	-/-/5	<b>Form of Exam:</b>	Signature/Signature/Term Mark

<b>week</b>	<b>Lecture</b>	<b>Practice/Seminar</b>
1.	Paediatric History Taking and Physical Examination Age- and developmentally-appropriate history How to perform a paediatric examination (to include respiratory, cardiovascular, gastrointestinal, central and peripheral nervous system, musculoskeletal, skin, eyes, ears/nose/throat) Newborn examination	pBLS – Paediatric Basic Life Support Prioritise the care of a sick child - Use a systematic approach (ABCDE) to the care of a sick child - Demonstrate basic airway management (including appropriate airway positioning, bag-valve mask ventilation) - Deliver age-appropriate cardio-pulmonary resuscitation (pBLS) - Recognise the need for help and identify how to obtain it
2.	General Paediatrics – Growth Normal growth in childhood (newborn-adolescence) Measurement; Puberty; Plot and interpret a growth chart; Main physiological changes from birth to adulthood	Skills/Procedures Common practical procedures in children (venepuncture, urinary catheterisation, lumbar puncture)
3.	General Paediatrics – Development Developmental milestones of children 0-5 years ; Developmental screening and assessment; Age- and developmentally-appropriate history and examination	General growth and development Normal growth in childhood (newborn-adolescence) Plot and interpret a growth chart Main physiological changes from birth to adulthood Developmental milestones of children 0-5 years Developmental examination in a child under 5 years
4.	General Paediatrics – Nutrition Normal feeding and eating behaviour from birth to adulthood ( <i>Breastfeeding, Formula feeding, Principals of normal nutrition of childhood</i> )	Nutrition, Feeding Infant feeding Failure to thrive Malnutrition Obesity
5.	Laboratory and Microbiology in Paediatrics Laboratory and microbiological investigations in Paediatric conditions Common (hematological and biochemistry) laboratory tests in children – normal values	Fluid balance Dehydration Fluid therapy in emergency care - Types of intravenous fluids, Calculate intravenous fluids (bolus and maintenance) etc. Shock management
6.	Acid base and electrolyte disorders Common acid base disorders and common causes in Paediatrics Interpret blood gases in children – normal values	Recognition of a sick child, Paediatric Emergencies Assessment of a seriously ill child Respiratory failure Sepsis Anaphylaxis ALTE

7.	Pharmacology/Drugs in Paediatrics Prescription by weight, age and body surface area in children Differences in drug metabolism between infants, children and adults Special routes of drug administration in children e.g. inhalation with babyhaler, suppository etc. Calculate (with given doses): Common analgesics, Common antibiotics, Oral rehydration solution, Common asthma medications (eg. beta-2 agonists, steroids), Common emergency drugs (eg. adrenaline for anaphylaxis)	Preventive paediatrics - Screening and Immunisation Role of prevention in Paediatric population Vaccinations, immunisation programme in Hungary Neonatal screening
8.	Antibiotic therapy in Paediatrics Common paediatric bacterial infections, appropriate antibiotic use	Infectious diseases Common viral infections in Pediatrics Common bacterial infections in Pediatrics Neuroinfections Management of a febrile infant TBC
9.	Paediatric Radiology Ordering Radiology Investigations in Paediatrics, Radiation, Radiation Free Imaging, Neuroimaging/Imaging of Musculoskeletal/GIT/Urogenital Tract, Interventions	Paediatric Surgery Congenital malformations of the gastrointestinal tract (Esophageal atresia, TOF, Duodenal atresia, Intestinal atresia, Anus atresia, Malrotation, Hirschprung disease) Acute abdomen (Appendicitis, Intussusception, Volvulus) Congenital diaphragmatic hernia Acute scrotum, Inguinal hernia, Hydrocele, Undescended testis Surgical management of congenital urinary tract malformations (PUJ obstruction, VUR, hypospadias)
10.	Newborn, infant Physiologic characteristics of the newborn, term and preterm infants Maternal diseases/drugs affecting the newborn (diabetes, gestational diabetes, lifestyle (alcohol, drugs, smoking), hypertension, chronic conditions)	Paediatric Emergencies (Trauma/Accident) Paediatric accidental injuries ( <i>Burn injury primary care, Airway and GI foreign body management, Road Accidents</i> )
11.	Toxicology Poisoning (General principles of toxicology)	Neonatology 1. (Neonatal Care in Delivery Room/Resuscitation) Adaptation to extrauterine life; Delivery room care Routine examination of the newborn infant Neonatal Resuscitation
12.	New Trends in Paediatrics	Child Protection Risk factors for child maltreatment Types of child abuse and neglect Symptoms, signs and red flags of child maltreatment Procedure for raising concerns about child maltreatment
13.	Ethics in Paediatrics, Communication	Child and Adolescent Psychiatry
14.	Child and Adolescent Psychiatry	

## Pediatrics II.

<b>Semester:</b>	10th	<b>Code:</b>	AOK-OAK314/AOK-OAK315
<b>Course type:</b>	Practice/Seminar	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2/2	<b>Department:</b>	Pediatrics
<b>Credit:</b>	-/4	<b>Form of Exam:</b>	Signature/Term Mark

### week   topic

1. Neonatology 2.  
Respiratory diseases of the newborn (*TTN, MAS, infection (sepsis, pneumonia), RDS, congenital malformations*)  
Jaundice - physiologic (*breast milk, breastfeeding*), pathologic (*ABO/Rh incompatibility*)  
Neonatal Sepsis (*Early and late onset*), Congenital infections  
Neonatal convulsion (*Metabolic, Congenital malformation, Bleeding/Ischaemia, Infection, Hypoxic ischemic encephalopathy*)  
Summary of problems with preterm babies (*RDS, Intracranial hemorrhage, Necrotizing enterocolitis, Persistent ductus arteriosus, Bronchopulmonary dysplasia, Retinopathy of prematurity (ROP)*)
2. Gastroenterology  
Problems of infant feeding (*Gastro-oesophageal reflux disease, Pyloric stenosis*)  
Malabsorption/malnutrition syndromes (*Inflammatory bowel disease, Food adverse reactions*); Constipation
3. Respiratory disorders 1  
Upper respiratory tract infection (*pharyngitis, laryngitis, epiglottitis, otitis media*)  
Community acquired bacterial pneumonia in children; Cystic fibrosis
4. Respiratory disorders 2  
Pulmonary physiology, pulmonary function tests  
Wheeze (*Viral induced wheeze, obstructive bronchitis, asthma bronchiale, bronchiolitis*)  
Acute therapy of respiratory distress (*O<sub>2</sub> delivery, non-invasive, invasive ventilation*)
5. Diabetes in childhood  
Diabetes mellitus; Diabetic ketoacidosis, treatment; Evaluation of hypoglycemia in childhood
6. Endocrinology  
Endocrine emergencies; Thyroid disorders; Evaluation of growth retardation, short stature  
Disorders of sexual differentiation and puberty (*precocious/delayed*)
7. Nephrology  
Congenital urinary tract malformations; Urinary tract infection in children  
Nephrosis syndrome, Nephritis syndrome; Acute kidney injury; Hypertension; Enuresis
8. Cardiology  
Symptoms and differential diagnosis of congenital heart defects; Hypertension  
Arrhythmias (*SVT, Bradycardia, VT, VF*); Cardiogenic shock (*Diagnosis, Differential diagnosis, Therapy*)
9. Hematology  
Anaemia in paediatrics  
Bleeding disorders, coagulopathies in children, Immune thrombocytopenic purpura (ITP)  
Acute leukemia in pediatrics (ALL), lymphoma
10. Oncology  
Most common solid tumors in Pediatrics (CNS tumours, Lymphoma, Neuroblastoma, Wilms tumour); Principles of treatment of malignancies, Side effects of treatment, Supportive care
11. Neurology  
Differential diagnosis of a floppy infant (*HIE, Haemorrhage, SMA, Myopathies, Metabolic*)  
Hydrocephalus  
Headache in childhood (*Migrain, Secondary headaches*)

	Seizures in childhood ( <i>Febrile seizure, Epilepsy, Acute symptomatic seizure</i> ) Demyelinating of the central nervous system ( <i>Guillain-Barré syndrome</i> )
12.	Metabolic Disorders, Genetics General rules of inborn errors of metabolism; Newborn screening of inherited metabolic disorders Chromosomal abnormalities (Down, Klienefelter, Turner syndrome)
13.	Immunology Classification, presentation and investigation of immun defects
14.	Case based discussions/Consultation

## Pharmacology and pharmacotherapy II.

<b>Semester:</b>	7th	<b>Code:</b>	AOK-OAK291/AOK-OAK292
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	4/2	<b>Department:</b>	Pharmacology
<b>Credit:</b>	2/-	<b>Form of Exam:</b>	Comprehensive Exam/ Signature

<u>week</u>	<u>Lecture</u>	<u>Practice</u>
1.	Opioid analgesics. Anxiolytics. Sedatohypnotics.	Requirements.
2.	Antiepileptic drugs. General anaesthesia.	Anxiolytics, sedatohypnotics.
3.	Antipsychotic drugs. Antidepressants.	Opioids, antiepileptic drugs.
4.	Pharmacotherapy of neurodegenerative disorders. Central muscle relaxants. Therapy of migraine.	General anaesthesia, antiparkinson drugs.
5.	Spasmolytics. Pharmacotherapy of asthma bronchiale.	Antipsychotics and antidepressants.
6.	Local anesthetics. Uterotonics, tocolytics.	MTO I. - Drugs acting on the CNS.
7.	Toxicology I. Toxicology II. Psychoactive agents.	Local anaesthetics.
8.	Toxicology III. Expectorants and antissuvie agents.	Smooth muscle relaxants. Uterotonics, tocolytics.
9.	Drugs acting in the GIT I. Drugs acting in the GIT II.	Antiasthmatics.
10.	Drugs used in the chemotherapy of neoplastic diseases I. Drugs used in the chemotherapy of neoplastic diseases II.	Discussion of drugs that influence the GIT.
11.	Drugs used in the chemotherapy of neoplastic diseases III. Antibacterial drugs I.: Introduction. Cell wall synthesis inhibitors.	MTO II. Antibacterial drugs.
12.	Antibacterial drugs II.: Protein synthesis inhibitors. Antibacterial drugs III.: Sulfonamides, kinolones.	Antiviral and antifungal drugs.

13.	Toxicology I. Toxicology II.	Treatment of protozoon infections.
14.	Principles of immunopharmacology. Discussion.	Discussion

### Pharmacology Cases I.

<b>Semester:</b>	8th	<b>Code:</b>	AOK-OAKV271
<b>Course type:</b>	Practice	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	2	<b>Department:</b>	Pharmacology
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation(5)

#### week Topic:

1.	Requirements
2.	Pharmacodynamics: drug-receptors, dose-response curves
3.	Pharmacodynamic interactions
4.	Pharmacokinetics I.
5.	Pharmacokinetics II.
6.	Pharmacokinetic question of repeated drug administration
7.	Parasympathomimetics
8.	Parasympatholytics, case reports
9.	Sympathomimetics
10.	Sympatholytics
11.	Review test of pharmacology of ANS I.
12.	Review test of pharmacology of ANS II.
13.	Pharmacology of NSAIDs. Case report: Aspirin and Reye syndrome.
14.	Discussion.

### Pharmacology Cases II.

<b>Semester:</b>	9th	<b>Code:</b>	AOK-OAKV272
<b>Course type:</b>	Practice	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	2	<b>Department:</b>	Pharmacology
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation(5)

#### week Topic:

1.	Requirements
2.	Pharmacology of opioids.
3.	Pharmacotherapy of pain. Case report.
4.	CNS depressants. Case reports.
5.	Review test questions I.
6.	Review test questions II.
7.	Parkinson's disease. Case report. Review test questions.
8.	Antipsychotics. Case report. Review test questions.
9.	Review test questions III.

10. Pharmacotherapy of hypertension. Case report. Review test questions.
11. Pharmacotherapy of angina pectoris. Case report. Review test questions.
12. Pharmacotherapy of heart failure. Case report. Review test questions.
13. Review test questions IV.
14. Discussion.

## Psychiatry I.

<b>Semester:</b>	9th	<b>Code:</b>	AOK-OAK441/AOK-OAK442
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1/1	<b>Department:</b>	Psychiatry
<b>Credit:</b>	2/-	<b>Form of Exam:</b>	Evaluation(5)/Signature

<u>week</u>	<u>Lecture</u>	<u>Practice</u>
1.	Introduction to Psychiatry	Psychiatric patient examination related to the lecture
2.	Psychiatric Interview, Psychopathology I.	Psychiatric patient examination related to the lecture
3.	PsychopathologyII.	Psychiatric patient examination related to the lecture
4.	ADHD, PTSD	Psychiatric patient examination related to the lecture
5.	Disorders of Attachment	Psychiatric patient examination related to the lecture
6.	Anxiety Disorders	Psychiatric patient examination related to the lecture
7.	Mood Disorders	Psychiatric patient examination related to the lecture
8.	Bipolar Affective Disorders	Psychiatric patient examination related to the lecture
9.	Suicide	Psychiatric patient examination related to the lecture
10.	Sleep Related Disorders	Psychiatric patient examination related to the lecture
11.	Somatoform Disorders	Psychiatric patient examination related to the lecture
12.	Forensic and Ethical Issues in Psychiatry	Psychiatric patient examination related to the lecture
13.	Obsessive and Compulsive and Related Disorders	Psychiatric patient examination related to the lecture

## Psychiatry II.

<b>Semester:</b>	10th	<b>Code:</b>	AOK-OAK443/AOK-OAK444
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2/1	<b>Department:</b>	Psychiatry
<b>Credit:</b>	3/-	<b>Form of Exam:</b>	Exam/Signature

<u>week</u>	<u>Lecture</u>	<u>Practice</u>
1.	Neurocognitive Disorders	Neurobiological Basis of Psychotherapy

2.	Behavioral and Psychological Symptoms of Dementia	First Interview, Psychotherapy Contract, Common Effective Factors of Psychotherapy
3.	Delirium Syndromes	Humanistic – Patient Centered Therapy
4.	Alcohol Use Disorders	Cognitive Behavioral Therapy
5.	Substance Related and Addictive Disorders	Psychotherapy in Addictology
6.	Schizophrenia I.	Psychotherapy in Psychosis
7.	Schizophrenia II.	Opportunities of Group Therapies
8.	Trauma- and Stressor-Related Disorders	Crisis Intervention Approaches
9.	Personality Disorders I.	Expressive and Supportive Psychodynamic Therapies
10.	Personality Disorders II.	Relaxation, Symbol and Art Therapies
11.	Feeding and Eating Disorders	Hypnosis, Suggestive Communication
12.	Psychopharmacology III. Pharmacotherapy of Addictions and Mood Stabilizers	Psychopharmacology IV. Pharmacotherapy of Anxiety and Sleep-Related Disorders
13.	Non-Pharmacological Biological Therapies I.	Non-Pharmacological Biological Therapies II.

## Public Health and Preventive Medicine I.

<b>Semester:</b>	7th	<b>Code:</b>	AOK-OAK371/AOK-OAK372
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2/2	<b>Department:</b>	Public Health
<b>Credit:</b>	3/-	<b>Form of Exam:</b>	Exam/Signature

<b>week</b>	<b>Lecture</b>	<b>Practice</b>
1.	The scope and goal of preventive medicine and public health. The levels of prevention. The global health situation; priorities in global health. Measuring health status of a population; the theoretical basis of demography.	Requirements of the semester. Health determinants and prevention. Health promotion.
2.	Measuring health status of a population; the theoretical basis of epidemiology. Health status of high-risk populations.	Demographic indexes and their use. Measuring mortality; standardization. Analysis of statistical data-bases.
3.	Epidemiology of cardiovascular diseases. Epidemiology of chronic respiratory diseases.	Measuring morbidity. Epidemiological studies: ecological, cross sectional, case-control and cohort studies, interventional studies. Planning and preparation of epidemiological surveys.
4.	Epidemiology of malignant tumors. Epidemiology of metabolic and musculoskeletal diseases.	Practical aspects of the prevention of cardiovascular diseases.
5.	Epidemiology of mental disorders, suicide and accidents I-II.	The role of screening in the prevention of selected chronic diseases.

6.	Nutrition in public health. Basics of nutrition. Malnutrititions. Epidemiology of chronic gastrointestinal diseases.	Measuring nutritional status. Dietary guidelines, healthy nutrition. The role of diet in the prevention of diet-related diseases: CVD, diabetes mellitus.
7.	Food quality and safety.	The role of diet in the prevention of diet-related diseases: obesity, tumors and osteoporosis.
8.	Epidemiology of smoking.	The role of physical activity in the prevention of chronic diseases.
9.-11.	Clinical practice	Clinical practice
12.	Epidemiology of alcohol and drug consumption.	Smoking cessation guidelines for health professionals.
13.	Structure and operation of health systems.	Prevention of alcohol and drug consumption. Lifestyle interventions.
14.	Health and health care in the family (mother, infant, child, adolescent).	Quality improvement in health care, quality tools in PDCA cycle.

## Public Health and Preventive Medicine II.

<b>Semester:</b>	8th	<b>Code:</b>	AOK-OAK373/AOK-OAK374
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2/2	<b>Department:</b>	Public Health
<b>Credit:</b>	3/-	<b>Form of Exam:</b>	Comprehensive Exam/Signature

<u>week</u>	<u>Lecture</u>	<u>Practice</u>
1.	Principles of communicable diseases epidemiology. Global burden of communicable diseases. Epidemiology of airborne diseases I-II.	Requirements of the semester. General aspects of control and prevention of communicable diseases. Surveillance systems. Epidemic and pandemic preparedness
2.	Epidemiology of enteric diseases I-II.	Best practice for hand hygiene. Immunization strategies and practices; global vaccination schedules.
3.	Epidemiology of hematogenic and cutaneous diseases. Epidemiology of sexually transmitted diseases.	Beliefs and misconceptions: methods of reducing vaccine hesitancy
4.	Epidemiology of healthcare associated infections (infection control, nosocomial surveillance). Global problem of antimicrobial resistance.	Practical aspects of the prevention of selected airborne diseases.
5.	Epidemiology of zoonoses, transmissible spongiform encephalopathies; emerging and re-emerging diseases. The effect of climate change on the human health and environment.	Practical aspects of the prevention of selected foodborne diseases and hepatitis infections

6.	Air pollutants and their effect on human health. The quality of water/drinking water and its effect on human health I.	Practical aspects of the prevention of tick-borne diseases, tetanus, lyssa. Case studies about healthcare associated infections.
7.	The quality of water/drinking water and its effect on human health II. Sewage, soil pollutions, waste management.	Prevention of outdoor and indoor air pollution and their health damaging effects
8.	Occupational health. Occupational diseases caused by physical (temperature, pressure, vibration, radiation) exposures	Public health responses for climate change
9.	Spring holiday	Environmental epidemiology: examining health-damaging effects of surface and drinking water pollution.
10.	Environment and occupation related diseases caused by chemical exposures	Chemical safety, risk assessment. Case studies about health effects of certain chemicals.
11.	Occupational diseases caused by biological, ergonomic and psychosocial exposures. Occupational pneumoconiosis	The burden of occupational morbidity and mortality. Health effects of workplace-related exposures: occupational hazards in health care.
12-14.	Clinical practice	Clinical practice

## Pulmonology

<b>Semester:</b>	7th	<b>Code:</b>	AOK-OAK451/AOK-OAK452
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1/2	<b>Department:</b>	Pulmonology
<b>Credit:</b>	2/-	<b>Form of Exam:</b>	Oral Exam/Signature

<u>week</u>	<u>Lecture</u>	<u>Practice</u>
1.	Pulmonological diagnostics	Morphology and roentgen anatomy of lung. Physical examination.
2.	Bronchial asthma, COPD (Obstructive respiratory disorders, spirometry)	Characteristic X-ray findings.
3.	Differential diagnosis of cough, dyspnea and chest pain	Chronic bronchitis. "Pink puffers" and "blue bloaters".
4.	Pneumonia (COVID), Lung abscess, Tuberculosis	Lung function tests. Pharmacospirometry.
5.	Asthma bronchiale	Diagnosis of asthma bronchiale. Aspecific provocation tests, skin test, IgE.
6.	Malignant lung tumors	Bronchoscopy, Thoracoscopy, mediastinoscopy.
7.	Interstitial lung diseases (Restrictive lung disorders, blood gas)	Radiographic findings of lung cancer. Transthoracic needle-biopsy. Cytology. TNM classification.
8.	Pulmonary embolism, Pulmonary hypertension, Cor pulmonale	Radiographic findings of pneumonia. Sputum examination. Treatment.

9.	Cystic fibrosis, Lung transplantation, Smoking cessation	Pletysmography. Diffusing capacity. Cardiopulmonary exercise test.
10.	Sleeping disorders, Respiratory failure, ECMO, Respiratory rehabilitation	Aetiology of pleural effusions. Aspiration of the pleural effusion. Laboratory findings.
11.	Diseases of the pleura and the mediastinum	X-ray findings in tuberculosis.
12.	The frontier areas of pulmonology (cardiology, immunology, infectology, neurology, orthopedics, urology, gynecology, ophthalmology, etc.)	Sputum examination in tuberculosis. Tuberculin test. Treatment. Cor pulmonale. Differential diagnosis of disseminated lung diseases.

## Radiology I.

<b>Semester:</b>	7th	<b>Code:</b>	AOK-OAK461/AOK-OAK462
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1/1	<b>Department:</b>	Radiology
<b>Credit:</b>	2/-	<b>Form of Exam:</b>	Evaluation(5)/Signature

<u>week</u>	<u>Lecture</u>	<u>Practice</u>
1.	Imaging diagnostics: role, development, present and future	Imaging diagnostics: role, development, present and future
2.	Conventional radiology	Conventional radiology
3.	Contrast agents	Contrast agents
4.	Ultrasound	Ultrasound
5.	Computed tomography and magnetic resonance imaging	Computed tomography and magnetic resonance imaging
6.	Interventional radiology	Interventional radiology
7.	Gastroenterology I.(esophagus, stomach, duodenum)	Gastroenterology I.
8.	Gastroenterology II. (mesenteric small bowels large intestine)	Gastroenterology II.
9.	Joints	Joints
10.	Bones	Bones
11.	Chest I. (lung)	Chest I. (lung)
12.	Chest II. (mediastinum)	Chest II. (mediastinum)
13.	Heart and peripheric vessels	Heart and peripheric vessels
14.	Head and neck	Head and neck

## Radiology II.

<b>Semester:</b>	8th	<b>Code:</b>	AOK-OAK463/AOK-OAK464
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1/1	<b>Department:</b>	Radiology
<b>Credit:</b>	2/-	<b>Form of Exam:</b>	Exam/Signature

<b>week</b>	<b>Lecture</b>	<b>Practice</b>
1.	Radiology of the breasts and female reproductive system	Radiology of the breasts
2.	Radiology of the liver	Radiology of the liver
3.	Radiology of the biliary tract	Radiology of the biliary tract
4.	Radiology of the pancreas & spleen	Radiology of the pancreas & spleen
5.	Neuroradiology I. (image modalities, congenital anomalies and vascular lesions of the head)	Neuroradiology I.
6.	Neuroradiology II. (Tumours, infections, trauma of the head)	Neuroradiology II.
7.	Neuroradiology III. (Spinal diseases)	Neuroradiology III.
8.	Pediatric radiology	Pediatric radiology
9.	Radiology of the kidneys & the urinary tract	Radiology of the kidneys & the urinary tract
10.	Radiology of the retroperitoneal space	Radiology of the retroperitoneal space
11.	Radiology of the pelvis and the male reproductive organs	Radiology of the pelvis and the male reproductive organs
12.	Radiological aspects of emergency	Radiological aspects of emergency
13.	Radiological aspects of trauma	Radiological aspects of trauma

## Rheumatology

**Semester:** 7th, 9th  
**Course type:** Lecture  
**Hours/week:** 2  
**Credit:** 2

**Code:** AOK-OAKV551  
**Category:** compulsory  
**Department:** Rheumatology  
**Form of Exam:** Evaluation(5)

The course „Rheumatology” covers the whole spectrum of musculoskeletal diseases including the immune-mediated internal medical systemic inflammatory diseases. The aim of the course is to provide a more detailed and practical overview of various types of arthritis and systemic autoimmune diseases, in addition to the limited topics covered within the clinical immunology section of the Internal Medicine course (10th semester).

The topics are delivered in interactive, seminar-like lectures and in practicals at the Department of Rheumatology and Immunology. Special emphasis is put on „hands-on” training at bedside. The lectures are interactive, focus on live or slide-based patient presentation, and on critical thinking, decision-making and differential diagnostic thinking.

The immunological basis of the diseases, novel treatment paradigms, the principles of immunosuppressive therapy, the innovative biological therapies, and the systematic diagnostic work-up of patients with arthritis, and other immune-mediated manifestations, such as Raynaud's phenomenon, skin, renal, pulmonary, neurological, etc. involvements typical of systemic autoimmune diseases are detailed within the course „Rheumatology”.

### topic

Lecture – Introduction. Systemic lupus erythematosus, antiphospholipid syndrome; László Kovács

Practical – max. 20 students

Lecture – Rheumatoid arthritis, spondylarthritis; Attila Balog

Practical – max. 20 students

Practical – max. 20 students

Practical – max. 20 students

Lecture - Systemic sclerosis (scleroderma), Systemic vasculitides; László Kovács

Practical – max. 20 students

Lecture - Sjögren's syndrome, polymyositis, dermatomyositis; Attila Kovács

Practical – max. 20 students

Practical – max. 20 students

Practical – max. 20 students

Consultation; László Kovács

## Social and Health Policy

**Semester:** 8th or 10th

**Course type:** Lecture

**Hours/week:** 2

**Credit:** 2

**Code:** AOK-OAKV591

**Category:** compulsory elective

**Department:** Public Health

**Form of Exam:** Evaluation(5)

### week Topic:

1. Introduction to social policy. The aim and task of social policy. The basic values and principles of social policy.
2. Social policy in welfare states. The structure and function of social policy in the European Union. Social policy in developing countries
3. Poverty, deprivation, patterns of inequalities. Social policies towards families.
4. Social policy of high-risk populations (immigrant, ethnicity, unemployed, disabled, chronic diseased, elderly).
5. Introduction to health policy. The influence of international organisations (WHO, World Bank etc.) on national health policies.
6. Health and health policy in the European Union. The basic principles of health care systems. Health care services in selected European countries.
7. Health care services in North American countries. Human resource management in health care.
8. Quality assurance in health care.
9. The evaluation of the social and health care reforms from the beginning of '90s – world tendencies (Final evaluation).

## Sports Medicine

**Semester:** 7th

**Course type:** Lecture

**Hours/week:** 2

**Credit:** 2

**Code:** AOK-OAKV561

**Category:** compulsory elective

**Department:** Dep. of Sports Medicine

**Form of Exam:** Evaluation (5)

**week Topic:**

1. Introduction
2. Sport physiology, exercise prescription for training, recreation and fitness
3. Sport injuries I.  
Sport injuries II.
4. Overuse sport syndrome
5. Doping
6. The pediatric athletes and sport cardiology
7. Clinical and morphological basis of sport related sudden deaths (introductory lecture)  
Non-arrhythmic cause of sudden cardiac death
8. Internal medicine cardiology in sport II.  
Sudden cardiac death in athletes: clinical and biological principles
9. Impairment of ventricular repolarisation reserve implications for sudden cardiac death in athletes
10. Pulmonary functional tests in athletes. Adaptation of ventilation to exercise
11. Nutrition and sport I.  
Introduction to Sport Nutrition
12. Nutrition in Sport II.  
Sportperformance enhancement athletes diet recommendations
13. The positive and negative effects on performance  
of athletes of myofascial adaptability

**Surgery I.**

<b>Semester:</b>	7th	<b>Code:</b>	AOK-OAK471/AOK-OAK472
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2/2	<b>Department:</b>	Surgery
<b>Credit:</b>	3/-	<b>Form of Exam:</b>	Evaluation(5)/Signature

**week Lecture****Practice**

1. Benign diseases of the breast,  
Surgery of the breast cancer
2. Surgery of the breast cancer,  
Surgery of the thyroid gland
3. Oncoplastic breast surgery,  
Surgery of the adrenal gland
4. Surgery of the mediastinum
5. Surgery of the thorax
6. **BLOCK PRACTICE**

Active participation in examination of patients and in the daily work on different units. Taking part in operations as 2nd assistant, and observation of operations. Case discussion every day: 12.00-13.00h.

7.	<b>BLOCK PRACTICE</b>	Active participation in examination of patients and in the daily work on different units. Taking part in operations as 2nd assistant, and observation of operations. Case discussion every day: 12.00-13.00h.
8.	<b>BLOCKP RACTICE</b>	Active participation in examination of patients and in the daily work on different units. Taking part in operations as 2nd assistant, and observation of operations. Case discussion every day: 12.00-13.00h.
9.	Surgery of the lung cancer	
10.	Vascular surgery	
11.	Vascular surgery	
12.	Vascular surgery	
13.	Cardiac surgery	
14.	Cardiac surgery	

## Surgery II.

<b>Semester:</b>	8th	<b>Code:</b>	AOK-OAK473/AOK-OAK474
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2/2	<b>Department:</b>	Surgery
<b>Credit:</b>	3/-	<b>Form of Exam:</b>	Evaluation (5)/Signature

<u>week</u>	<u>Lecture</u>	<u>Practice</u>
1.	Benign and malignant diseases of the oesophagus I. Benign and malignant diseases of the oesophagus II.	
2.	Malignant diseases of the stomach, Benign diseases of the stomach	
3.	Surgery of the liver I Surgery of the liver II	
4.	Surgery of the pancreas I. Surgery of the pancreas II.	
5.	Surgery of the gallbladder and biliary tract I. Surgery of the gallbladder and biliary tract II.	
6.	Minimal invasive surgery, Surgery of the spleen	
7.	Benign diseases of the large intestine	
8.	Malignant diseases of the colon and rectum	
9.	SPRING BREAK	
10.	Proctology, the care of intestinal stoma wearing patients	
11.	Emergency colorectal surgery	

12.	<b>BLOCK PRACTICE</b>	Active participation in examination of patients and in the daily work on different units. Taking part in operations as 2nd assistant, and observation of operations. Case discussion every day: 12.00-13.00h.
13.	<b>BLOCK PRACTICE</b>	Active participation in examination of patients and in the daily work on different units. Taking part in operations as 2nd assistant, and observation of operations. Case discussion every day: 12.00-13.00h.
14.	<b>BLOCK PRACTICE</b>	Active participation in examination of patients and in the daily work on different units. Taking part in operations as 2nd assistant, and observation of operations. Case discussion every day: 12.00-13.00h.

### Surgery III.

<b>Semester:</b>	9th	<b>Code:</b>	AOK-OAK475/AOK-OAK476
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1/1	<b>Department:</b>	Surgery
<b>Credit:</b>	2/-	<b>Form of Exam:</b>	Evaluation(5)/Signature

<u>week</u>	<u>Lecture</u>	<u>Practice</u>
8.	Appendicitis	Demonstration, investigation of surgical patients. Consultation about the topics of lectures
9.	Peritonitis	Demonstration, investigation of surgical patients. Consultation about the topics of lectures
10.	Ileus	Demonstration, investigation of surgical patients. Consultation about the topics of lectures
11.	Differential diagnostics of acute abdomen	Demonstration, investigation of surgical patients. Consultation about the topics of lectures
12.	Most frequent interventions in the gastrointestinal surgery	Demonstration, investigation of surgical patients. Consultation about the topics of lectures
13.	Surgical immunology, organ transplantation	Demonstration, investigation of surgical patients. Consultation about the topics of lectures
14.	Consultation	Demonstration, investigation of surgical patients. Consultation about the topics of lectures

### The Clinical Basics of Aviation and Space Medicine

<b>Semester:</b>	8th or 10th	<b>Code:</b>	AOK-OAKV061
<b>Course type:</b>	Lecture	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	2	<b>Department:</b>	Aviation and Space Medicine
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation(5)

<u>week</u>	<u>topic</u>
1.	The aeromedical qualification system in civilian and military practice.

2. Functional diagnostic examinations in practical aviation medicine.
3. Aeromedical problems in pulmonology and gastroenterology.
4. The cardiological aspects of aviation medicine.
5. Excess temperature in aviation.
6. Neurological and psychiatric problems in aviation medicine.
7. Ophtalmology in aviation medicine.
8. Emphasized aeromedical issues in oto-rhino-laryngology.
9. The pilots' lifestyle, nutrition and sports. Health maintenance, job specific preventive medicine, diet, possible medication.
10. The issues of alcoholism & consumption of energy drinks in aviation.
11. Rheumatological aspects of aviation.
12. The medical background of the International Space Station (ISS). Medical care during long-term space flights.
13. Aeromedical evacuation /intensive transport of sick and injured patients (case reports).

### The Language of Effective Doctor-Patient Communication I.

<b>Semester:</b>	7th or 9th	<b>Code:</b>	AOK-OAKV621
<b>Course type:</b>	Practice	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	2	<b>Department:</b>	Med. Comm. and Translation
<b>Credit:</b>	2	<b>Form of Exam:</b>	Term Mark

<u>week</u>	<u>Lecture</u>	<u>Practice</u>
1.	An introduction to physician – patient communication 1	An overview of communication. Identifying the elements that make up communication
2.	An introduction to physician – patient communication 2	The patient centered approach: patient friendly language in history taking, instructing patients during examinations and discussing treatment options.
3.	Gastroenterology 1	Receiving patients: greeting them and putting them at ease. Introducing yourself as the attending physician and explaining your role.
4.	Gastroenterology 2	The presenting complaint. Encouraging patients to describe their problems in their own words.
5.	Gynecology and obstetrics 1	Asking for history of menstruation Encouraging withdrawn patients to speak
6.	Gynecology and obstetrics 2	Taking obstetric history: previous pregnancies, complications, deliveries, asking for present complaints
7.	Orthopedics	Patient's past medical history. Discussing family medical history. Taking effective notes during the interview.

8.	Endocrinology	Explaining medical terminology to a patient Updating patient notes
9.	Surgery 1	Giving results: explaining results to patients, giving a prognosis
10.	Surgery 2	Planning surgical treatment: explaining treatments/ surgical interventions to a patient, discussing options
11.	Surgery 3	Describing benefits and side effects, negotiating treatment Informed decision making
12.	Pulmonology	Delivering bad news Writing concise and accurate notes
13.	Dental care	Preparing and reassuring the patient during the examination. Negotiating the treatment.
14.	Test/exam	

### The Language of Effective Doctor-Patient Communication II.

<b>Semester:</b>	8th or 10th	<b>Code:</b>	AOK-OAKV622
<b>Course type:</b>	Practice	<b>Category:</b>	compulsory elective
<b>Hours/week:</b>	2	<b>Department:</b>	Med. Comm. and Translation
<b>Credit:</b>	2	<b>Form of Exam:</b>	Term Mark

<u>week</u>	<u>Lecture</u>	<u>Practice</u>
1.	Cardiology	Enquiring about patient's social history. Asking about life-style and environmental health
2.	Anesthesiology and intensive care	Anesthesiological assessment of a patient Describing types of anesthesia Postoperative care
3.	Oncology	Educating and counseling patients and their families Revision of the written documentation of patient care
4.	Dermatology	Discussing treatment options Showing sensitivity and respect to patients
5.	Pediatrics 1	Communicating with children and adolescents. Establishing and developing rapport with a child.
6.	Pediatrics 2	Reassuring a child. Child-friendly instructions. Asking about substance use.
7.	Psychology	Encouraging withdrawn patients to speak. Calming aggressive or angry patients.
8.	Neurology 1	Reassuring a patient or relative. Showing empathy.
9.	Neurology 2	Techniques for communicating with patients with neurological problems. Language to show sensitivity.
10.	Rheumatology	Encouraging patients to express their fears and concerns. Giving a prognosis.

11.	Oto-rhino-laryngology	Summarizing and structuring the interview Communicating with elderly patients
12.	Ophthalmology	Handling complaints Managing unrealistic requests (saying no)
13.	Urology	Encouraging patients to express their fears and concerns Advising on lifestyle
14.	Test/exam	

## The role of sonography in critical care

<b>Semester:</b>	8th or 10th	<b>Code:</b>	AOK-OASZV681
<b>Course type:</b>	Seminar	<b>Category:</b>	elective
<b>Hours/week:</b>	Total 6	<b>Department:</b>	Anaesthesiology & Int. Ther.
<b>Credit:</b>	1	<b>Form of Exam:</b>	Evaluation (5)

### topic

Proper place for point- of-care sonography  
 Ultrasound techniques and point-of-care sonography  
 Basic properties of ultrasound machines, basic settings, transducers

Basic US planes of the heart.  
 Estimation of global left ventricular function and heart chamber dimensions.  
 Suspicion and identification of acute myocardial infarction, acute valvular regurgitation, acute right-heart failure.  
 Identification of pericardial effusion. US-guided pericardial tap (pericardiocentesis)

Role of point-of-care sonography during management of polytraumatised patients: FAST („focused assesment with sonography for trauma“)  
 Suspicion and identifying of abdominal and pelvic fluid collections, hematomas, bleeding, urinary retention. US-guided abdominal tap.  
 US-guided peritoneal tap  
 Signs of atelectasis, infiltration  
 Pleural effusion, pneumothorax

Role of transoesophageal ECHO in the cardiac surgery anesthesia  
 Examination of inferior vena cava, collaptibility, fluid responsiveness.  
 US guided vascular interventions: insertion of a central venous cannula, US guided intervention: percutaneous tracheotomy  
 Role of ultrasound in intracranial pathology (trauma, intracranial bleeding, intracranial pressure elevation ): measurement of n. opticus diameter, role of transcranial Doppler ultrasound

Ultrasound guided regional anaesthesia: basic principles.  
 Regional anaesthesia of the thrunk, the upper and the lower limb, nerve blockades.

Bedside practice

## Thesis writing in English-academic language and style

<b>Semester:</b>	9th	<b>Code:</b>	AOK-OASZV641
<b>Course type:</b>	Practice	<b>Category:</b>	elective
<b>Hours/week:</b>	2	<b>Department:</b>	Med. Comm. and Translation
<b>Credit:</b>	2	<b>Form of Exam:</b>	Term Mark

**topic**

General structure of the thesis, thesis types

Scientific English style: objectivity, formality, complexity, explicitness, hedging, responsibility, and precision

The Abstract

The Introduction. Formulating hypotheses and research questions.

Citation rules, in-text and end-text referencing.

The Methods

The Results. Tables, charts and other types of illustration.

The Discussion.

Other parts of the thesis: Acknowledgements, Appendix, Questionnaires, Conflict of interest, Declaration of ethics.

Presenting the thesis. How to make oral presentations?

## Traumatology

<b>Semester:</b>	10th	<b>Code:</b>	AOK-OAK511/AOK-OAK512
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	2/2	<b>Department:</b>	Traumatology
<b>Credit:</b>	3/-	<b>Form of Exam:</b>	Exam/Signature

<b>week</b>	<b>Lecture</b>	<b>Practice</b>
1.	Introduction to the evaluation and treatment of the trauma patient, primary – secondary survey Role of trauma care	Types of wounds, wound management. Types of sutures. The primary survey: physical examination of trauma patients (ABCs), imaging techniques. Interpretation of X-ray images.
2.	General principles of wound management and healing. Fracture healing, delayed bone healing, non-union. Pathological fractures. AO principals of fractures management	Classification of fractures, principles of fracture management. Introduction to trauma implants. Plaster technique.
3.	Upperextremity III. wrist injuries, hand injuries. Hand infections. Replantation. Reconstructive procedures. Peripheralnerve injuries. Injuries of the brachialplexus.	Shoulder examination. Replacement techniques of shoulder dislocation (Artl, Hippocrates). Introduction to Gilchrist bandage. Examination of rotator cuff injuries.
4.	Upper extremity II. Distal humeral injuries, elbow injuries, forearm injuries.	Indications for functional and surgical treatment of surgical neck fractures of the humerus. Treatment options for humeral diaphysis fractures. X-ray presentation.
5.	Upper extremity I, shoulder girdle injuries, proximal humeral injuries	Diagnosis of radius fractures, demonstration of closed reduction and plaster fixation. Practice of plaster technique, application of radius plaster. Indications for conservative and surgical treatment. X-ray presentation.

6.	Burn injuries.	Examination of the hand function. Demonstration of Moberg's scheme. Treatment options for tendon and nerve injuries.
7.	Special considerations (pregnant, elderly, pediatric patients, PTSD)	Radiological presentation of scaphoideal fractures, carpal instabilities, treatment options.
8.	Cranio cerebral injuries, spine injuries	Examination of pelvic and acetabulum fractures, options for temporary fixation of the pelvis. Transport of trauma patient with pelvic fracture. X-ray presentation.
9.	Torso trauma I. chest injuries, Torso trauma II. abdominal trauma	Clinical diagnosis of femoral neck fractures. Examination of the hip joint. Patient examination. Treatment options for hip fractures. X-ray presentation.
10.	Torso trauma III. Pelvic fractures, acetabular fractures	Examination of the knee joint (Sternmann I-II, Böhler, McMurray, valgus-varus stress, anterior-posterior tableau symptom, Lachmann test). Diagnosis of meniscus injuries, treatment options. Cruciate ligament replacements.
11.	Polytrauma	Ankle joint examination. Functional anatomy of the ankle and foot. Principles of care for ankle fractures, ligament injuries. Diagnosis and treatment of calcaneal fractures. X-ray presentation.
12.	Lower extremity I. Proximal femoral region injuries, hip-, femoral shaft fractures. Traumatic hip displacement.	Neurological examination of head injury. Examination of brain nerves, sensory and motor functions. Neurological examination of spinal cord injury. Transport of the spinal cord injured.
13.	Lower extremity II. Distal femoral fractures, knee injuries, proximal tibia fractures	Examination of a polytrauma patient. Primary and secondary survey. Presentation of FAST. DCS and ETC principles. Examination of chest trauma, differential diagnosis of chest injuries.
14.	Lower extremity III. Injuries fractures around the ankle, foot injuries	Internal medicine examination of the injured, preparation of the patient for surgery in the ICU/ward. Importance of anaesthesiological investigations, consideration of surgical risk.

## Travel Medicine

<b>Semester:</b>	8th or 10th	<b>Code:</b>	AOK-OASZV071
<b>Course type:</b>	Lecture	<b>Category:</b>	elective
<b>Hours/week:</b>	30	<b>Department:</b>	Aviation and Space Medicine
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation(5)

### week   topic

1. Principles of Travel Medicine
2. Characteristics of passengers and (air) travellings

3. Diseases occurring during (air) travelling
4. Diving medicine
5. Short and long haul flights effects from the passengers' point of view
6. Haemorrhagic fever diseases during travelling
7. Alcoholism, energy drinks and flying
8. Water sports' and aero-sports' medicine
9. Travel Advices for passengers, the Health problems of the returning passengers
10. Extreme environmental temperatures, acclimatisation
11. Diseases Independent from travelling, accidents and diseases that are worsening during travelling
12. Acute mountain sickness Hiking, skiing and the winter sports' medicine
13. Space Turism, life on the Internatinal Space Station (ISS)
14. consultation

## Urology

<b>Semester:</b>	9th or 10th	<b>Code:</b>	AOK-OAK521/AOK-OAK522
<b>Course type:</b>	Lecture/Practice	<b>Category:</b>	compulsory
<b>Hours/week:</b>	1/2	<b>Department:</b>	Urology
<b>Credit:</b>	2/-	<b>Form of Exam:</b>	Exam/Signature

<b>week</b>	<b>Lecture</b>	<b>Practice</b>
1.	Signs and symptoms urological diseases. Case history and the physical examination.	Case history, physical examination. Case presentation.
2.	Congenital anomalies.	Signs and symptoms of the urology patient. Case presentation.
3.	Urolithiasis.	Catheters and endoscopic instruments.
4.	Incontinency.	Endoscopy.
5.	Urotraumatology.	Percutaneous epicystostomy and nephrostomy.
6.	Acute and chronic renal failure.	ESWL.
7.	Nonspecific infections in the urology.	Uro-radiology.
8.	Tumors of the kidney and ureter.	Physical examinations of patients.
9.	Tumors of the bladder.	Laboratory investigations in the urology.
10.	Tumors of the external male genitalia.	Biopsy from bladder, prostate and testis.
11.	Tumors of the prostate.	Evaluation of sonography.
12.	BPH.	Physical examinations. Case reports.
13.	Acute urology.	Visit to operating theatre.
14.	Consultation	Acute urology

### 3D printing in life sciences

<b>Semester:</b>	spring semesters	<b>Code:</b>	AOK-OASZV771
<b>Course type:</b>	Lecture	<b>Category:</b>	elective
<b>Hours/week:</b>	2	<b>Department:</b>	Medical Physics
<b>Credit:</b>	2	<b>Form of Exam:</b>	Evaluation (5)

#### week   topic

1. The Role of 3D Printing in Life Sciences
2. Basics of 3D Printing: History, Technologies
3. Characterization of Applied Materials
4. Software I: CAD Design Software, 3D Scanning, Slicing
5. Software II: Introduction to Using 3D Slicer. Understanding the Basic Operation of the Software, Loading, Saving, Displaying Data.
6. Software III: Practical Implementation of Medical Image Segmentation and Registration with Examples. Anatomical Models.
7. 3D Printing (Operating Principle, Construction, Settings, Troubleshooting), Post-processing
8. Basics of Bioprinting
9. Characterization of Applied Materials in Bioprinting
10. Applications of 3D Printing in Drug Development
11. Quality Assurance Aspects of 3D Printing
12. Life Sciences Applications of 3D Printing. Future Development Directions, Innovations in the Field of 3D Printing
13. Visit to SZTE 3D Center

## VOW TO BE MADE BY 1ST YEAR MEDICAL STUDENTS

I ....., /  
 as the student of the University of Szeged /  
 promise solemnly /  
 that I will observe and adhere /  
 to the rules and regulations of Hungary. /  
 Also I will observe and adhere /  
 to the rules and regulations /  
 of the University of Szeged /  
 and I am aware of these. /  
 I devote all my best efforts /  
 to go through with my studies here /  
 as efficiently as possible. /  
 I will give my teachers /  
 the respect and gratitude /  
 which is their due. /  
 I will respect the secrets /  
 which are confided in me /  
 even after the patient has died. /  
 I will maintain by all means in my power /  
 the honor and the noble traditions /  
 of the medical profession. /  
 I will devote my time and efforts /  
 to learn the progressive achievements /  
 of the basic and clinical sciences /  
 in order to use this knowledge /  
 for advancing medicine, /  
 for the care of my patients /  
 and to promote man's progress on Earth. /  
 I will use the University's computer network and tools /  
 solely for the purpose of studying /  
 and I will adhere /  
 to the data protection /  
 and network usage regulations. /  
 I make these promises solemnly, /  
 freely, /  
 and upon my honor. /

## OATH TO BE TAKEN BY MEDICAL GRADUATES

I, ..... name ....., / on this occasion / of my admission / to the ranks of the medical profession / swear on my honor / to devote my talents and knowledge / to the benefit of mankind.  
 I shall hold / University of Szeged in esteem.  
 I shall count those / who have instructed me / in the science of medicine / as my masters, / and shall show them / gratitude and respect at all times.  
 I shall impart my medical knowledge / and experience / to the generations of physicians to come. / I shall constantly labour / to increase my erudition / with a view to developing / and advancing medical science. / I shall practice my profession / conscientiously.  
 I vow to devote / my medical knowledge / to the protection of health / and to the benefit of the sick. / I shall treat / and advise patients / in the best of their interest / and to the best of my knowledge / and convictions / and I shall strive / to safeguard their health / against hazardous / and injurious effects.  
 I shall reveal no secret / concerning my fellow men / whether learned within my practice of medicine / or outside it / unless the law demands this.  
 I shall inform the patients / and also their relatives / if the patients' interest so requires / as to the patients' condition / and the method of treatment / in a timely and considerate manner. / I shall issue a medical certificate / only in accordance with my true convictions.  
 I shall conduct myself / towards the patients / my fellow physicians and the society as a whole, / in a matter befitting my calling as a physician. / I shall preserve the honor / of the medical profession / and its noble traditions.  
 I shall not be hampered / from fulfilling the duties of my profession / on the grounds of social, / political, / national, / racial / or religious distinction.  
 I take this oath solemnly / and of my own free will.
