

The accreditation process of the Basic Medical Programme of the Albert Szent-Györgyi Medical School, University of Szeged, based on the global requirements of the World Federation for Medical Education (WFME)

Resolution No. 2023/9/XI of the MAB Board

As a result of the WFME 2020 (World Federation for Medical Education) standards-based accreditation process, MAB accredits the basic medical programme of the Albert Szent-Györgyi Medical School, University of Szeged; the accreditation of the programme – provided that it continues to meet the accreditation standards – is valid for 8 years, until 15 December 2031, with an interim monitoring procedure combined with a site visit to be conducted by 31 December 2027. The monitoring process shall primarily examine the institutional measures taken on the basis of the recommendations of the accreditation report and their effectiveness.

Justification

Based on the WFME 2020 (World Federation for Medical Education) standards, the basic medical programme of the Albert Szent-Györgyi Medical School, University of Szeged is

- compliant with the minimum criteria (educational programme, selection of academic staff, admission and selection of students, educational infrastructure, clinical training resources, structure and organisation, organisational units supporting the operation of the medical school and its educational and academic activities),
- partially compliant with the quality assurance processes (mission statement, development and review of the educational programme, quality assurance of assessment, quality assurance),
- compliant with the support processes (educational methods used to deliver the educational programme, system of assessment, student support system, performance, training, and development of academic staff).

Budapest, 24 November, 2023
